The proposed project will expand the existing North City Water Reclamation Plant and construct an adjacent North City Pure Water Facility with a purified water pipeline to Miramar Reservoir. A project alternative would install a longer pipeline to deliver product water to the San Vicente Reservoir.

Other project components include: A new pump station and forcemain to deliver additional wastewater to the North City Water Reclamation Plant, a brine discharge pipeline, and upgrades to the existing Metropolitan Biosolids Center to accommodate additional biosolids from the increased treatment capacity at the North City Water Reclamation Plant.

A new North City Renewable Energy Facility is proposed and would be constructed at the North City Water Reclamation Plant to receive landfill gas from the City's Miramar Landfill gas collection system via a new gas pipeline, providing power to some of the North City Project components. The landfill gas line would cross Marine Corps Air Station Miramar and the Miramar National Cemetery.

The Bureau of Reclamation issued a Notice of Intent on August 5, 2016 (81 FR 51937). The United States Marine Corps, the Veterans Administration, and the Environmental Protection Agency have each accepted cooperating agency status.
