NATIONAL SCIENCE FOUNDATION

Notice of Permit Modification Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.
ACTION: Notice of permit modification request received and permit issued.

SUMMARY: The National Science Foundation (NSF) is required to publish a notice of requests to modify permits issued to conduct activities regulated and permits issued under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act in the Code of Federal Regulations. This is the required notice of a requested permit modification and permit issued.

FOR FURTHER INFORMATION CONTACT: Nature McGinn, ACA Permit Officer, Office of Polar Programs, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314; 703-292-8030; email: ACApermits@nsf.gov.

SUPPLEMENTARY INFORMATION: The National Science Foundation (NSF), as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95-541, 45 CFR 670), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas a requiring special protection.

NSF issued a permit (ACA 2018-012) to Jay J. Rotella on October 16, 2017. The issued permit allows the applicant to continue long-term studies of Weddell seal populations in Erebus Bay and the McMurdo Sound region to evaluate how temporal variation in the marine environment affects individual

life histories and population dynamics of a long-lived mammal. These studies may require the applicant and agents to enter into six ASPAs in the area. Research involves capture and release of up to 675 Weddell seal pups at one to four days after birth for flipper tagging per year. Now the applicant proposes a permit modification to increase the total take of Weddell seal pups for flipper tagging from 675 to 1000. The Environmental Officer has reviewed the modification request and has determined that the amendment is not a material change to the permit, and it will have a less than a minor or transitory impact.

Dates of Permitted Activities:

November 22, 2017 to September 30, 2022.

The permit modification was issued on November 22, 2017.

Nadene G. Kennedy,

Polar Coordination Specialist, Office of Polar Programs.

NUCLEAR REGULATORY COMMISSION

[Docket No. 40-9083; NRC-2017-0106]

U.S. Army Installation Command

AGENCY: Nuclear Regulatory Commission.

ACTION: 10 CFR 2.206 request; receipt.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is giving notice that by petition dated March 16, 2017, as supplemented on April 10, May 21, June 25, July 24, August 16, August 18, October 11, October 12, October 15, and October 16, 2017, Dr. Michael Reimer (the petitioner) has requested that the NRC take action with regard to depleted uranium (DU) from the M101 spotting

rounds licensed at the Pohakuloa Training Area (PTA) under source materials license SUC-1593. The petitioner's requests that have been accepted for evaluation are included in the **SUPPLEMENTARY INFORMATION** section of this document.

Amy Snyder, Senior Project Manager, Office of Nuclear Material Safety and Safeguards, Division of Decommissioning, Uranium Recovery and Waste Programs, Materials Decommissioning Branch, M.S. T8F05, 11545 Rockville Pike, Rockville, Maryland 20852-2738, Amy.Snyder@nrc.gov or 301 415-6822.

SUPPLEMENTARY INFORMATION: On March 16, 2017 (ADAMS Accession No. ML17110A308), as supplemented on April 10 (ADAMS Accession No. ML17250A248); May 21 (ADAMS Accession No. ML17143A165); June 25 (ADAMS Accession No. ML17177A703); July 24 (ADAMS Accession No. ML17249A091); August 16 (ADAMS Accession No. ML17248A524); August 18, 2017 (ADAMS Accession No. ML17249A075); and October 11, October 12, October 15, and October 16, 2017 (ADAMS Accession No.

ML17292A690 (Pkg.)), the petitioner requested that the NRC take action with regard to the U.S. Army Installation Command (ADAMS Accession No. ML17079A447). The petitioner requested that the NRC reconsider approval of License SUC-1593 (ADAMS Accession No. ML16343A164) for possession of DU at four ranges located on PTA, one of the facilities licensed under SUC-1593 paying particular attention to environmental radiation monitoring. The petitioner is concerned about the adequacy of various aspects of the Environmental Radiation Monitoring Program for the licensed DU that is located in the radiation control areas at the PTA, transparency in the licensing of DU at the PTA, and the appropriateness of the DU inventory estimate at the PTA. As the basis for this request, the petitioner identified concerns about the lack of air sampling, the inappropriateness of the location and number of sediment samples, and insufficient geologic sampling procedures for sediment collection for the licensed DU that is located in radiation controlled areas at the PTA.

The request is being treated pursuant to section 2.206 of title 10 of the *Code of Federal Regulations* (10 CFR) of the Commission's regulations. The request has been referred to the Director of Nuclear Material Safety and Safeguards. The NRC has accepted the following concerns for evaluation under the 10 CFR 2.206 process:

- Inappropriate number of sediment samples,
- Inappropriate frequency of sediment sampling,
- Inappropriate and poorly described analytical techniques (sample analysis methods),
- Inappropriate geological sampling procedures for sediment collection, and
- Inappropriate data evaluation methods (leading to dilution of samples) to determine the presence of depleted uranium outside the ranges associated with the Pohakuloa Training Area.

As provided by 10 CFR 2.206, appropriate action will be taken on this petition within a reasonable time.

Dated at Rockville, Maryland, this 22th day of November 2017.

For the Nuclear Regulatory Commission.

Scott W. Moore,

Acting Director, Office of Nuclear Material Safety and Safeguards.
