Fisheries of the Exclusive Economic Zone Off Alaska; Inseason Adjustment to the 2018 Gulf of Alaska Pollock and Pacific Cod Total Allowable Catch Amounts

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason adjustment; request for comments.

SUMMARY: NMFS is adjusting the 2018 total allowable catch (TAC) amounts for the Gulf of Alaska (GOA) pollock and Pacific cod fisheries. This action is necessary because NMFS has determined these TACs are incorrectly specified, and will ensure the GOA pollock and Pacific cod TACs are the appropriate amounts based on the best available scientific information for pollock and Pacific cod in the GOA. This action is consistent with the goals and objectives of the Fishery Management Plan for Groundfish of the Gulf of Alaska.

DATES: Effective 0000 hours, Alaska local time (A.l.t.), January 1, 2018, until the effective date of the final 2018 and 2019 harvest specifications for GOA groundfish, unless otherwise modified or superseded through publication of a notification in the **Federal Register**.

Comments must be received at the following address no later than 4:30 p.m., A.l.t., January 4, 2018.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council (Council) under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The final 2017 and 2018 harvest specifications for groundfish in the GOA (82 FR 12032, February 27, 2017) set the 2018 pollock TAC at 163,479 metric tons (mt) and the 2018 Pacific cod TAC at 57,825 mt in the GOA. In December 2017, the North Pacific Fishery Management Council (Council) recommended a 2018 pollock TAC of 166,228 mt for the GOA, which is more than the 163,479 mt established by the final 2017 and 2018 harvest specifications for groundfish in the

GOA. The Council also recommended a 2018 Pacific cod TAC of 13,096 mt for the GOA, which is less than the 57,825 mt established by the final 2017 and 2018 harvest specifications for groundfish in the GOA. The Council’s recommended 2018 TACs, and the area and seasonal apportionments, are based on the Stock Assessment and Fishery Evaluation report (SAFE), dated November 2017, which NMFS has determined is the best available scientific information for these fisheries.

Steller sea lions occur in the same location as the pollock and Pacific cod fisheries and are listed as endangered under the Endangered Species Act (ESA). Pollock and Pacific cod are a principal prey species for Steller sea lions in the GOA. The seasonal apportionment of pollock and Pacific cod harvest is necessary to ensure the groundfish fisheries are not likely to cause jeopardy of extinction or adverse modification of critical habitat for Steller sea lions. The regulations at § 679.20(a)(5)(iv) specify how the pollock TAC will be apportioned. The regulations at § 679.20(a)(6)(ii) and § 679.20(a)(12)(i) specify how the Pacific cod TAC will be apportioned.

In accordance with § 679.25(a)(1)(iii), (a)(2)(i)(B), and (a)(2)(iv) the Administrator, Alaska Region, NMFS (Regional Administrator), has determined that, based on the November 2017 SAFE report for this fishery, the current GOA pollock and Pacific cod TACs are incorrectly specified. Consequently, pursuant to § 679.25(a)(1)(iii), the Regional Administrator is adjusting the 2018 GOA pollock TAC to 166,228 mt and the 2018 GOA Pacific cod TAC to 13,096 mt. Therefore, Table 2 of the final 2017 and 2018 harvest specifications for groundfish in the GOA (82 FR 12032, February 27, 2017) is revised consistent with this adjustment.

Pursuant to § 679.20(a)(5)(iv), Table 4 of the final 2017 and 2018 harvest specifications for groundfish in the GOA (82 FR 12032, February 27, 2017) is revised for the 2018 TACs of pollock in the Central and Western Regulatory Area of the GOA.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public

interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would allow for harvests that exceed the appropriate allocations for pollock and Pacific cod based on the best scientific information available. NMFS was unable to publish a notice providing time for public comment because the

most recent, relevant data only became available as of December 13, 2017, and additional time for prior public comment would result in conservation concerns for the ESA-listed Steller sea lions.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of

prior notice and opportunity for public comment.

Under § 679.25(c)(2), interested persons are invited to submit written comments on this action to the above address until January 4, 2018.

This action is required by § 679.20 and § 679.25 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Fisheries of the Exclusive Economic Zone Off Alaska; Inseason Adjustment to the 2018 Bering Sea and Aleutian Islands Pollock, Atka Mackerel, and Pacific Cod Total Allowable Catch Amounts

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason adjustment; request for comments.

SUMMARY: NMFS is adjusting the 2018 total allowable catch (TAC) amounts for the Bering Sea and Aleutian Islands (BSAI) pollock, Atka mackerel, and Pacific cod fisheries. This action is necessary because NMFS has determined these TACs are incorrectly specified, and will ensure the BSAI pollock, Atka mackerel, and Pacific cod TACs are the appropriate amounts based on the best available scientific information. Also, NMFS is announcing the Aleutian Islands Catcher Vessel (CV) Harvest Set-Aside and Bering Sea Trawl CV A-Season Sector Limitation will be in effect for 2018, and TACs in this inseason adjustment will apply for 2018. This action is consistent with the goals and objectives of the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area.

DATES: Effective 0000 hours, Alaska local time (A.l.t.), January 1, 2018, until the effective date of the final 2018 and 2019 harvest specifications for BSAI

groundfish, unless otherwise modified or superseded through publication of a notification in the **Federal Register**.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI exclusive economic zone according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The final 2017 and 2018 harvest specifications for groundfish in the BSAI (82 FR 11826, February 27, 2017) set the 2018 Bering Sea (BS) pollock TAC at 1,345,000 mt, the 2018 BSAI Atka mackerel TAC at 65,000 mt, the 2018 BS Pacific cod TAC at 223,704 mt, and the 2018 AI Pacific cod TAC at 15,695 mt. In December 2017, the North Pacific Fishery Management Council (Council) recommended a 2018 BS

pollock TAC of 1,364,341 mt, which is more than the 1,345,000 mt TAC established by the final 2017 and 2018 harvest specifications for groundfish in the BSAI. The Council also recommended a 2018 BSAI Atka mackerel TAC of 71,000 mt, which is more than the 65,000 mt TAC established by the final 2017 and 2018 harvest specifications for groundfish in the BSAI. The Council recommended a 2018 BS Pacific cod TAC of 188,136 mt, and an AI Pacific cod TAC of 15,695 mt, which is less than the BS Pacific cod TAC of 223,704 mt, and the same as the AI Pacific cod TAC of 15,695 mt established by the final 2017 and 2018 harvest specifications for groundfish in the BSAI. The Council's recommended 2018 TACs, and the area and seasonal apportionments, are based on the Stock Assessment and Fishery Evaluation report (SAFE), dated November 2017, which NMFS has determined is the best available scientific information for these fisheries.

Amendment 113 to the FMP (81 FR 84434, November 23, 2016) and regulations at § 679.20(a)(7)(viii) require NMFS to announce whether the Aleutian Islands incidental catch allowance, directed fishing allowance, CV Harvest Set-Aside, and Unrestricted Fishery, as well as the Bering Sea Trawl CV A-Season Sector Limitation will be in effect for 2018. NMFS received notification from Adak that a shoreplant will be processing Aleutian Islands Pacific cod in 2018. Therefore, the Pacific cod TACs in Table 9A of this inseason adjustment will be effective for 2018 and the harvest limits will apply in 2018.

Steller sea lions occur in the same location as the pollock, Atka mackerel, and Pacific cod fisheries and are listed as endangered under the Endangered Species Act (ESA). Pollock, Atka mackerel, and Pacific cod are a principal prey species for Steller sea lions in the BSAI. The seasonal apportionment of pollock, Atka mackerel, and Pacific cod harvest is necessary to ensure the groundfish fisheries are not likely to cause jeopardy of extinction or adverse modification of critical habitat for Steller sea lions. NMFS published regulations and the revised harvest limit amounts for Atka mackerel, Pacific cod, and pollock fisheries to implement Steller sea lion protection measures to insure that groundfish fisheries of the BSAI are not likely to jeopardize the continued existence of the western distinct population segment of Steller sea lions or destroy or adversely modify their designated critical habitat (79 FR 70286, November 25, 2014).
