SUPPLEMENTARY INFORMATION: Notice is hereby given that the Director, Office of Nuclear Reactor Regulation, has issued a director's decision (ADAMS Accession No. ML17304A893) under Title 10 of the *Code of Federal Regulations* (10 CFR) section 2.206 on a petition filed by the Petitioners on February 19, 2016 (ADAMS Accession No. ML16050A223).

The Petitioners requested that the NRC take enforcement action against all operating nuclear power plants. Specifically, the Petitioners requested

that the NRC either: (1) Issue orders to require immediate corrective actions including compensatory measures to address the operability of electric power systems in accordance with their plant technical specifications, and to implement plant modifications in accordance with current NRC regulatory requirements and staff guidance provided in the references within the 2.206 petition; or (2) issue orders to immediately shut down the nuclear power plants that are operating without addressing the significant design deficiency identified in NRC Bulletin 2012-01, "Design Vulnerability in Electric Power System," dated July 27, 2012, (ADAMS Accession No. ML12074A115) since the licensees are not in compliance with their technical specifications (typically Section 3.8.1) related to onsite and offsite power systems.

On February 24, 2016, the NRC's petition manager acknowledged receipt of the petition and offered the Petitioners an opportunity to address the Petition Review Board (PRB). The Petitioners declined an opportunity to address the PRB on the basis that the petition already contained all of the relevant facts to support the PRB's review.

The NRC sent a copy of the proposed director's decision to the Petitioners and to the licensees for comment by letters dated September 18, 2017 (ADAMS Accession Nos. ML17156A197 and ML17156A214). The Petitioners and the licensees were provided the opportunity to provide comments on any part of the proposed director's decision that was considered to be erroneous or any issues in the petition that were not addressed. The Petitioners provided comments by letter dated October 11, 2017 (ADAMS Accession No. ML17291A040), and the Nuclear Energy Institute (NEI) provided comments, on behalf of licensees, by letter dated October 16, 2017 (ADAMS Accession No. ML17291A846). No new information was provided. To enhance the clarity of the director's decision, the NRC staff revised the description of the NRC's accident sequence precursor (ASP) program provided in Section D of the director's decision, to differentiate between condition and event assessments. The comments from the Petitioners and NEI, along with the NRC staff's responses to the comments, are included as an attachment to the director's decision. The attachment identifies any updates to the director's decision, as a result of comments received from the Petitioners and NEI.

The Director, Office of Nuclear Reactor Regulation, has determined that the request(s) to issue orders to

operating reactor licensees regarding an open phase condition be denied. The reasons for this decision are explained in the Director's Decision DD-17-04, pursuant to 10 CFR 2.206.

The NRC will file a copy of the director's decision with the Secretary of the Commission for the Commission's review in accordance with 10 CFR 2.206. As provided by this regulation, the director's decision will constitute the final action of the Commission 25 days after the date of the decision unless the Commission, on its own motion, institutes a review of the director's decision in that time.

Dated at Rockville, Maryland, this 19th day of December 2017.

For the Nuclear Regulatory Commission.

Tanya M. Mensah,

Senior Project Manager, ROP Oversight and Generic Communications Branch, Division of Inspection and Regional Support, Office of Nuclear Reactor Regulation.
