

support cutting-edge science and education.

NSF remains deeply concerned about the impacts from recent hurricanes on Arecibo Observatory staff, the facility, and all citizens of Puerto Rico. The ROD arrives at a challenging time, but is necessary for the agency to secure a future for the Observatory, as it will allow negotiations to begin with potential collaborators who may take over management and operations as NSF funding is reduced.

Prior to issuance of the ROD, a Final Environmental Impact Statement (FEIS) was prepared in compliance with the Federal National Environmental Policy Act, 42 U.S.C. 4321, *et seq.* (NEPA), dated July 27, 2017, and availability of it was noticed in the **Federal Register** on August 4, 2017. As detailed in the FEIS, five Action Alternatives and a No-Action Alternative, were considered for the proposed change in operations of Arecibo Observatory. These Alternatives include:

- *Alternative 1:* Collaboration with Interested Parties for Continued Science-focused Operations (Agency-preferred Alternative)
- *Alternative 2:* Collaboration with Interested Parties for Transition to Education-focused Operations
- *Alternative 3:* Mothballing of Facilities
- *Alternative 4:* Partial Demolition and Site Restoration
- *Alternative 5:* Complete Demolition and Site Restoration
- *No-Action Alternative:* Continued NSF Investment for Science-focused Operations

The Preferred Alternative, which is also the environmentally preferable action alternative, was selected in the ROD. The ROD also reflected NSF's consideration of the outcomes of its compliance obligations under Section 106 of the National Historic Preservation Act and the Endangered Species Act.

The ROD is now available in both English and Spanish on the internet at: https://www.nsf.gov/mps/ast/env_impact_reviews/env_rev_arecibo.jsp in Adobe® portable document format (PDF). Limited hard copies of the ROD are also available, on a first request basis, by contacting the NSF contact, Elizabeth A. NUCLEAR REGULATORY COMMISSION

[Docket No. 50-271; NRC-2015-0157]

Entergy Nuclear Operations, Inc.; Vermont Yankee Nuclear Power Station

AGENCY: Nuclear Regulatory Commission.

ACTION: Final environmental assessment and finding of no significant impact; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing a final environmental assessment (EA) and finding of no significant impact (FONSI) regarding the issuance of two exemptions in response to a January 6, 2015 request from Entergy Nuclear Operations, Inc. (Entergy or the licensee), on behalf of the owners of the Vermont Yankee Nuclear Power Station (VY). The exemptions allow the licensee to use funds from the VY decommissioning trust fund (the Trust) for irradiated fuel management activities.

DATES: The EA and FONSI referenced in this document are available on December 26, 2017.

ADDRESSES: Please refer to Docket ID NRC-2015-0157 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking website:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2015-0157. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at

SUPPLEMENTARY INFORMATION:

I. Introduction

On June 23, 2015 (80 FR 35992), the NRC issued exemptions from sections 50.82(a)(8)(i)(A) and 50.75(h)(1)(iv) of title 10 of the *Code of Federal Regulations* (10 CFR) to Entergy, for VY's Renewed Facility Operating License No. DPR-28. The VY facility is located in Windham County, Vermont. The licensee requested the exemptions by letter dated January 6, 2015 (ADAMS Accession No. ML15013A171). The exemptions allow the licensee to use funds from the Trust for irradiated fuel management activities, in the similar manner that funds from the Trust are used under 10 CFR 50.82(a)(8) for decommissioning activities. As explained below, although the exemptions also exempted VY from the regulatory requirement for prior notification to the NRC of disbursements from the Trust for irradiated fuel management activities, the licensee is still required to provide such prior notification to the NRC because of a separate requirement in the VY Renewed Facility Operating License.

At the time of issuance, the NRC's approval of the exemptions referenced the categorical exclusion criteria under 10 CFR 51.22(c)(25). However, on November 4, 2015, the State of Vermont, the Vermont Yankee Nuclear Power Corporation, and Green Mountain Power Corporation (together, Petitioners) filed a petition (ADAMS Accession No. ML16137A554) with the Commission that, in part, challenged the NRC staff's use of a categorical exclusion in granting the exemption request. The Commission, in their

October 27, 2016 decision on the petition (ADAMS Accession No. ML16301A083), found that the exemptions were ineligible for a categorical exclusion under the National Environmental Policy Act (NEPA), and directed the staff to conduct an EA to examine the environmental impacts, if any, associated with the exemptions. Therefore, consistent with Commission direction and with 10 CFR 51.21, the NRC prepared a draft EA to document its environmental review for the exemption request, and published the draft EA for comment on March 8, 2017 (82 FR 13015). Comments were received from the Petitioners on April 7, 2017 (ADAMS Accession No. ML17107A145). After consideration of those comments, the staff has prepared this final EA. Based on the results of this final EA, the NRC has determined that it is not necessary to prepare an environmental impact statement and is therefore issuing this final FONSI.

II. Final Environmental Assessment

Description of the Action

The exemptions requested by Entergy on January 6, 2015, and granted by the NRC on June 23, 2015, exempt Entergy from the requirements set forth in 10 CFR 50.82(a)(8)(i)(A) and 50.75(h)(1)(iv). Specifically, the exemptions allow Entergy to use funds from the Trust for irradiated fuel management activities, not associated with radiological decommissioning.

Need for the Action

By letter dated January 12, 2015 (ADAMS Accession No. ML15013A426), Entergy informed the NRC that it had permanently ceased power operations at VY and that the VY reactor vessel had been permanently defueled.

In its January 6, 2015 exemption request, Entergy stated that it needed access to the funds in the Trust, in excess of those funds needed for radiological decommissioning, to support irradiated fuel management activities not associated with radiological decommissioning. As required by 10 CFR 50.82(a)(8)(i)(A), decommissioning trust funds may be used by a licensee if the withdrawals are for expenses for legitimate decommissioning activities consistent with the definition of decommissioning in 10 CFR 50.2. This definition addresses radiological decommissioning and does not include activities associated with irradiated fuel management. Similarly, the requirements of 10 CFR 50.75(h)(1)(iv) restrict decommissioning trust fund disbursements (other than for payments
