available financial statements, requested tax returns, reports, information requested by CVE or VA’s Office of Inspector General, or other requested information or data within 30 days of the date of request.
(6) Cessation of the participant’s business operations.
(7) Failure by the concern to provide an updated VA Form 0877 within 30 days of any change in ownership, except as provided in paragraph 74.3(f)(3) of this part.
(8) Failure to inform CVE of any such changed circumstances, as outlined in paragraphs (c) and (d) of this section.
(9) Failure by the concern to obtain and keep current any and all required permits, licenses, and charters, including suspension or revocation of any professional license required to operate the business.
(e) The examples of good cause listed in paragraph (c) of this section are intended to be illustrative only. Other grounds for canceling a participant’s verified status include any other cause of so serious or compelling a nature that it affects the present responsibility of the participant.
§ 74.22 What are the procedures for cancellation?
(a) General. When CVE believes that a participant’s verified status should be cancelled prior to the expiration of its eligibility term, CVE will notify the participant in writing. The Notice of Proposed Cancellation Letter will set forth the specific facts and reasons for CVE’s findings and will notify the participant that it has 30 days from the date CVE sent the notice to submit a written response to CVE explaining why the proposed ground(s) should not justify cancellation.
* * * * *
(e) Appeals. A participant may file an appeal with OHA concerning the Notice of Verified Status Cancellation decision in accordance with 13 CFR part 134. The decision on the appeal shall be final.
§ 74.25 What types of personally identifiable information will VA collect?
40 CFR Part 52
[40 CFR 52.109(a)(1); FRL–9972–79]
Air Plan Approval; Arizona; Stationary Sources; New Source Review; Ammonia
AGENCY: Environmental Protection Agency (EPA).
ACTION: Supplemental proposed rule.
SUMMARY: The Environmental Protection Agency (EPA) is supplementing its prior proposed approval of regulatory revisions to the Arizona Department of Environmental Quality (ADEQ) portion of the applicable Clean Air Act (CAA or Act) state implementation plan (SIP) for the State of Arizona. This supplemental proposal is primarily intended to make corrections to ADEQ’s SIP-approved rules for the issuance of CAA New Source Review (NSR) permits for stationary sources, with a focus on preconstruction permit requirements under the Act for major stationary sources and major modifications of such sources. It proposes conditional approval of ADEQ’s NSR submittal specifically with respect to the CAA requirements related to ammonia as a precursor to PM$_2.5$ under the NA–NSR program requirements in CAA section 189(e). We are seeking comment on our proposed action and plan to follow with a final action.
DATES: Any comments must arrive by February 9, 2018.
ADDRESSES: Submit comments, identified by Docket ID No. EPA–R09–OAR–2017–0255, at https://www.regulations.gov, or via email to R9airpermits@epa.gov. For comments submitted at Regulations.gov, follow the online instructions for submitting comments. Once submitted, comments cannot be removed or edited from Regulations.gov. For either manner of submission, the EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (i.e. on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the FOR FURTHER INFORMATION CONTACT section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit https://www.epa.gov/dockets/commenting-epa-dockets.
FOR FURTHER INFORMATION CONTACT: Lisa Beckham, EPA Region 9, (415) 972–3811, beckham.lisa@epa.gov.
SUPPLEMENTARY INFORMATION:
Throughout this document, the terms “we,” “us,” and “our” refer to the EPA.

Definitions
For this notice, we are giving meaning to certain words or initials as follows:
(i) The words Act or CAA mean or refer to the Clean Air Act, unless the context indicates otherwise.
(ii) The initials CFR mean or refer to Code of Federal Regulations.
(iii) The initials EPA, we, us or our mean or refer to the United States Environmental Protection Agency.
(iv) The initials FIP mean or refer to Federal Implementation Plan.
(v) The initials NA–NSR mean or refer to Nonattainment New Source Review.
(vi) The initials NOx mean nitrogen oxides.
(vii) The initials NSR mean or refer to Prevention of Significant Deterioration.
(viii) The initials PM2.5 mean or refer to particulate matter with an aerodynamic diameter of less than or equal to 2.5 micrometers (fine particulate matter).
(ix) The initials PSD mean or refer to Particulate Matter (PM2.5) precursors as required by section 189(e) of the Act for the Nogales and West Central Pinal PM2.5 nonattainment areas.
(x) The initials new mean or refer to those rules that were the focus of a 2016 EPA rule.
(xi) The initials new mean or refer to those rules that were the focus of a 2016 EPA rule.
(xii) The initials SIP mean or refer to State Implementation Plan.
(xiii) The words State or Arizona mean the State of Arizona, unless the context indicates otherwise.
(xiv) The initials SO2 mean sulfur dioxide.
(xv) The initials TSD mean or refer to technical support document.
(xvi) The initials VOC means volatile organic compounds.

I. The State’s Submittals

A. Which rules did the State submit?

On April 28, 2017, ADEQ submitted regulatory revisions for the ADEQ portion of the Arizona SIP to the EPA. This SIP revision submittal, which is the subject of this supplemental proposal and is referred to herein as the “April 2017 NSR submittal,” contains revisions to ADEQ’s rules governing preconstruction review and related permitting program requirements. These rule revisions are intended to correct deficiencies in ADEQ’s SIP-approved NSR program related to the requirements under both part C (prevention of significant deterioration or PSD) and part D (nonattainment new source review or NA–NSR) of title I of the Act, which apply to major stationary sources and major modifications of such sources. The preconstruction review and permitting programs are often collectively referred to as New Source Review or NSR. On June 1, 2017, we proposed approval of these revisions into the Arizona SIP. These revisions are necessary to correct several deficiencies we identified in a 2015 rule action to update ADEQ’s SIP-approved NSR program as well as certain deficiencies with ADEQ’s NSR program that were the focus of a 2016 EPA rule action related to PM2.5 precursors under the NA–NSR program requirements in CAA section 110(l) and in the Arizona SIP for compliance with the CAA’s general requirements for SIPs in CAA section 110(a)(2), the EPA’s regulations for stationary source permitting programs in 40 CFR part 51, subpart I, and the Arizona requirements for SIP revisions in CAA section 110(l) and in the Arizona SIP.

II. The EPA’s Evaluation

A. How is the EPA evaluating the State’s rules?

Section II.A of our June 1, 2017 proposed rule discusses our evaluation criteria for the April 2017 NSR submittal in detail. See 82 FR 25215.

Generally, the EPA has reviewed the provisions in the April 2017 NSR submittal for compliance with the CAA’s general requirements for SIPs in CAA section 110(a)(2), the EPA’s regulations for stationary source permitting programs in 40 CFR part 51, subpart I, and the Arizona requirements for SIP revisions in CAA section 110(l) and in the Arizona SIP.

For this supplemental proposal, our review focuses on one issue addressed in our 2016 PM2.5 precursor action (81 FR 40525), which finalized a limited disapproval action for ADEQ’s NA–NSR program specifically based on our finding that ADEQ’s program did not fully address fine particulate matter (PM2.5) precursors as required by section 189(e) of the Act for the Nogales and West Central Pinal PM2.5 nonattainment areas. This action triggered an obligation on the EPA to promulgate a Federal Implementation Plan (FIP) to address this deficiency unless the State of Arizona corrects the deficiency, and the EPA approves the related plan revisions, within two years of the final action. In addition, to avoid sanctions under section 179 of the Act, ADEQ has 18 months from the July 22, 2016 effective date of our 2016 PM2.5 precursor action to correct the deficiency as it relates to part D of title I of the Act.

B. Do the rules meet the evaluation criteria?

In this action, we are supplementing our prior proposal only as it relates to specific deficiencies with ADEQ’s NA–NSR rules identified in our 2016 PM2.5 precursor action concerning ammonia as a precursor to PM2.5. As part of our review of the April 2017 NSR submittal culminating in our June 1, 2017 proposed rule, we considered whether the ADEQ rule revisions in the April 2017 NSR submittal met the applicable requirements under section 189(e) of the Act and the associated regulatory provisions for PM2.5 for the Nogales and West Central Pinal PM2.5 nonattainment areas that were identified as deficiencies in our 2016 PM2.5 precursor action. 

B. Are there previous versions of the rules in the Arizona SIP?

As part of our June 1, 2017 proposed action on the April 2017 NSR submittal, we identified a number of rules in the Arizona SIP that would be superseded or removed from the Arizona SIP if the action were finalized as proposed; these rules would generally be replaced by the ADEQ rules proposed for approval. Please refer to Section I.B of our June 1, 2017 proposed rule for a detailed list of these rules (82 FR 25215). This supplemental action does not modify the particular ADEQ rules that we are proposing to approve into, or remove from, the Arizona SIP in our action on the April 2017 NSR submittal.

C. What is the purpose of the EPA’s supplemental proposal?

The purpose of this supplemental proposal is to (1) present our evaluation of ADEQ’s April 2017 NSR submittal as it relates to ammonia as a precursor to PM2.5 under the nonattainment NSR (NA–NSR) program requirements at CAA section 189(e) and EPA’s implementing regulations; (2) discuss our proposed conditional approval action related to this issue, including the basis for this action; and (3) provide notice of and seek public comment on our proposed action.
These deficiencies were related to our finding that ADEQ’s NSR program did not contain rules regulating volatile organic compounds (VOCs) or ammonia as PM2.5 precursors under the NA–NSR program as required by CAA section 189(e), nor did the ADEQ NSR SIP submittal under consideration at that time include a showing that the regulation of VOCs and ammonia was not necessary under section 189(e) of the Act. See 81 FR 40526.

As discussed in the May 2017 Final Rule, the EPA must consider the permitting requirements for PM2.5 precursors under the CAA, including the requirements applicable to major stationary sources and major modifications of ammonia as a regulated NSR pollutant (as a PM2.5 precursor), the plan shall also define “significant” for ammonia for that area, subject to the approval of the EPA Administrator. See 40 CFR 51.165(a)(1)(x)(F). We found that while ADEQ’s updated NA–NSR program as reflected in the April 2017 NSR submittal, includes ammonia as a precursor to PM2.5 in PM2.5 nonattainment areas (at R18–2–101(124)[a][iv] in the definition of the term “regulated NSR pollutant”), the rules in the April 2017 NSR submittal do not define the term “significant” for purposes of applying the requirements of 40 CFR 51.165(a)(13) to modifications at existing major stationary sources of ammonia located in a PM2.5 nonattainment area, as required by 40 CFR 51.165(a)(1)(x)(F). See May 2017 TSD at 21–22. We noted in our June 1, 2017 proposal that ADEQ intended to address this deficiency in a separate SIP submittal. See 82 FR 52519.

To address this remaining deficiency, in a letter dated December 6, 2017, ADEQ committed to adopt revisions to provisions in R18–2–101 and make other specific demonstrations consistent with 40 CFR 51.165(a)(1)(x)(F) and/or 40 CFR 51.165(a)(13) to satisfy the requirements of section 189(e) and the PM2.5 Implementation Rule governing ammonia as a precursor to PM2.5 under the NA–NSR program. See Letter from Timothy S. Franquist, Director, Air Quality Division, ADEQ to Alexis Strauss, Acting Regional Administrator, EPA Region 9, dated Dec. 6, 2017. ADEQ committed in this letter to take certain specific actions, including the submittal of the required rule and/or demonstration to the EPA by March 31, 2019, or within one year from the date on which the EPA takes final action on the April 2017 NSR submittal, whichever is earlier. Accordingly, pursuant to section 110(k)(4) of the Act, the EPA is proposing a conditional approval of ADEQ’s NA–NSR program solely as it pertains to section 189(e) of the Act and the associated regulatory requirements for ammonia as a PM2.5 precursor. We are proposing to conditionally approve the April 2017 NSR submittal with respect to this issue because ADEQ’s 2017 NSR submittal largely includes the requirements for ammonia as a PM2.5 precursor required under section 189(e) of the Act and the associated regulatory requirements, and ADEQ’s December 6, 2017 commitment letter provides adequate assurance that the one deficiency concerning ammonia as a PM2.5 precursor will be addressed in a timely manner, consistent with CAA section 110(k)(4). We conclude that if ADEQ submits the rule revisions and/or demonstrations that it has committed to submit by the deadline that it has committed to meet, then this deficiency will be cured. However, if ADEQ fails to submit these revisions and/or demonstrations within the required timeframe, the conditional approval will automatically become a disapproval for the specific issue of whether ADEQ’s NA–NSR program meets the requirements of section 189(e) of the Act with respect to ammonia as a PM2.5 precursor, and the EPA will issue a finding of disapproval. The EPA is not required to propose the finding of disapproval.

C. Does the rule meet the evaluation criteria under Sections 110(l) and 193 of the Clean Air Act?

Please see Section II.G of our June 1, 2017 proposed rule that discusses our determination that the April 2017 NSR submittal meets the evaluation criteria under Sections 110(l) and 193 of the Act and that we can approve the April 2017 NSR submittal under Sections 110(l) and 193 of the Act. See 82 FR 25220. This supplemental proposal does not change our prior determinations in this regard with respect to the April 2017 NSR submittal.

III. Public Comment and Proposed Action

In conclusion, we have determined that the April 2017 NSR submittal, in conjunction with the commitment made by ADEQ in its December 6, 2017 commitment letter, adequately addresses the remaining deficiency related to section 189(e) of the Act and the associated regulatory requirements.
for ammonia as a precursor to PM$_{2.5}$ in PM$_{2.5}$ nonattainment areas. Accordingly, as authorized by section 110(k)(4) of the Act, the EPA proposes to conditionally approve the NA–NSR component of ADEQ’s April 2017 NSR submittal solely with respect to ammonia as a PM$_{2.5}$ precursor. While we cannot grant full approval of the submittal at this time with respect to this issue, ADEQ has satisfactorily committed to address this deficiency by providing the EPA with a SIP submittal by March 31, 2019, or within one year from the date on which the EPA takes final action on the April 2017 NSR submittal, whichever is earlier.

As noted previously, on June 1, 2017, we proposed full approval of all other aspects of ADEQ’s April 2017 NSR submittal, including but not limited to revisions to ADEQ’s NA–NSR program and the regulation of PM$_{2.5}$ precursors other than ammonia in accordance with section 189(e) of the Act. Today’s action does not modify the findings we made in that proposed action, and through this supplemental proposal, we are not reopening or otherwise seeking public comment on any other issues or findings in that June 1, 2017 proposed action. We will accept comments from the public on this supplemental proposal until February 9, 2018.

IV. Incorporation by Reference

This action supplements our prior proposed rule where the EPA has proposed to include in a final EPA rule regulatory text that includes incorporation by reference. This action does not propose additional material for incorporation by reference.

V. Statutory and Executive Order Reviews

Under the CAA, the EPA Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA’s role is to approve state choices, provided that they meet the criteria of the Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 3, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 18(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

List of Subjects in 40 CFR Part 52

Environmental protection, Administrative practice and procedure, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur dioxide, Volatile organic compounds.

Authority: 42 U.S.C. 7401 et seq.
