implement the PLT and title II of the PLTIA, the USPTO provided that, in order to be accorded a filing date, a nonprovisional application (other than an application for a design patent) must include a specification with or without claims. See Changes To Implement the Patent Law Treaty, 78 FR 62367, 62369 (Oct. 21, 2013) (final rule). This change was effective on December 18, 2013, and applies to any application filed under 35 U.S.C. 111 on or after December 18, 2013. Although a claim is not required in a nonprovisional application (other than an application for a design patent) for filing date purposes and the applicant may file an amendment adding additional claims (as prescribed by 35 U.S.C. 112) and drawings (as prescribed by 35 U.S.C. 113) later during prosecution, the applicant should consider the benefits of submitting a complete set of claims and any necessary drawings on filing of the nonprovisional application. This would reduce the likelihood that any claims and/or drawings added later during prosecution might be found to contain new matter. Also, if a patent is granted and the patentee is successful in litigation against an infringer, provisional rights to a reasonable royalty under 35 U.S.C. 154(d) may be available only if the claims that are published in the patent application publication are substantially identical to the patented claims that are infringed, assuming timely actual notice is provided. Thus, the importance of the claims that are included in the patent application publication should not be overlooked.

Applicants are also advised that the extended missing parts period does not affect the 12-month priority period provided by the Paris Convention for the Protection of Industrial Property (Paris Convention). Accordingly, in most cases, any foreign filings must still be made within 12 months of the filing date of the provisional application if the applicant wishes to rely on the provisional application in the foreign-filed application or if protection is desired in a country requiring filing within 12 months of the earliest application for which rights are left outstanding in order to be entitled to priority.

For additional reminders, see Pilot Program for Extended Time Period To Reply to a Notice to File Missing Parts of Nonprovisional Application, 75 FR 76401, 76405 (Dec. 8, 2010), 1362 Off. Gaz. Pat. Office 44, 50 (Jan. 4, 2011).

Dated: January 5, 2018.

Joseph D. Matal,
Associate Solicitor, performing the functions and duties of the Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.

Fastener Quality Act Insignia Recordal Process

ACTION: Proposed extension of an existing information collection; comment request.

DATES: Written comments must be submitted on or before March 12, 2018.

ADDRESSES: You may submit comments by any of the following methods:
• Mail: Marcie Lovett, Records and Information Governance Division Director, Office of the Chief Technology Officer, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Catherine Cain, Attorney Advisor, Office of the Commissioner for Trademarks, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450; by telephone at 571–272–8946; or by email to Catherine.Cain@uspto.gov with “0651–0028 comment” in the subject line of the message.

SUPPLEMENTARY INFORMATION:

I. Abstract

Under Section 5 of the Fastener Quality Act (FQA) of 1999, 15 U.S.C. 5401 et seq., certain industrial fasteners must bear an insignia identifying the manufacturer. It is also mandatory for manufacturers of fasteners covered by the FQA to submit an application to the USPTO for recordal of the insignia on the Fastener Insignia Register.

The procedures for the recordal of fastener insignia under the FQA are set forth in 15 CFR 280.300 et seq. The purpose of requiring both the insignia and the recordation is to ensure that certain fasteners can be traced to their manufacturers and to protect against the sale of mismarked, misrepresented, or counterfeit fasteners.

The insignia may be sourced from an existing trademark registered at USPTO, from a trademark that is proposed in an application to obtain a registration currently before the USPTO, or from a unique alphanumeric designation issued upon request from the USPTO. After a manufacturer submits a complete application for recordal, the USPTO issues a Certificate of Recordal. These certificates remain active for five years. Applications to renew the certificates must be filed within six months of the expiration date or, upon payment of an additional surcharge, within six months following the expiration date.

If a recorded alphanumeric designation is assigned by the manufacturer to a new owner, the designation becomes “inactive” and the new owner must submit an application to reactivate the designation within six months of the date of assignment. If the recordal is based on a trademark application or registration and the registration is assigned to a new owner, the recordal becomes “inactive” and cannot be reassigned. Instead, the new owner of the trademark application or registration must apply for a new recordal. Manufacturers who record insignia must notify the USPTO of any changes of address.

This information collection includes one form, the Application for Recordal of Insignia or Renewal/Reactivation of Recordal Under the Fastener Quality Act (PTO–1611), which provides manufacturers with a convenient way to submit a request for the recordal of a fastener insignia or to renew or reactivate an existing Certificate of Renewal.

The public uses this information collection to comply with the insignia recordal provisions of the FQA. The USPTO uses the information in this collection to record or renew insignias under the FQA and to maintain the Fastener Insignia Register, which is open for public inspection and is updated quarterly. The public may download the Fastener Insignia Register from the USPTO website.
III. Method of Collection

By mail, facsimile, hand delivery, or electronic submission to the USPTO.

III. Data

OMB Number: 0651–0028.

IC Instruments and Forms: PTO–1611.

Type of Review: Revision of a Previously Existing Information Collection.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 96 responses per year.

Estimated Time per Response: The USPTO estimates that it will take the public approximately 20 minutes (0.33 hours) to gather the necessary information, prepare the form, and submit the request for recordal or renewal of a fastener insignia to the USPTO.

Estimated Total Annual Respondent Burden Hours: 32 hours.

Customers may incur postage costs when submitting some of the items covered by this collection to the USPTO by mail. The USPTO expects that approximately 98% of the response in this collection will be submitted electronically. Of the remaining 2%, will be submitted by mail for a total of 2 mailed submissions. The average cost for a first-class, 1-ounce large envelope is $0.98. Therefore, the USPTO estimates that the postage costs for the mailed submissions in this collection will total $1.96.

There are two filing fees associated with this collection, which total $2,120.00. These fees are detailed in the table below.

<table>
<thead>
<tr>
<th>IC No.</th>
<th>Item</th>
<th>Estimated time for responses (hours)</th>
<th>Estimated annual responses</th>
<th>Estimated annual burden cost</th>
<th>Rate</th>
<th>Estimated annual hourly cost ($)</th>

</tbody>
</table>

Estimated Total Annual Non-hour Respondent Cost Burden: $2,121.96. There are no capital start-up, recordkeeping, or maintenance costs associated with this information collection. However, this collection does have annual (non-hour) costs in the form of filing fees and postage costs.

Therefore, the USPTO estimates that the total annual (non-hour) cost burden for this collection in the form of filing fees ($2,120.00) and postage costs ($1.96) is $2,121.96 per year.

IV. Request for Comments

Comments submitted in response to this notice will be summarized or included in the request for OMB approval of this information collection. They also will become a matter of public record.

Comments are invited on:

(a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility;
(b) The accuracy of the agency’s estimate of the burden (including hours and cost) of the proposed collection of information;
(c) Ways to enhance the quality, utility, and clarity of the information to be collected; and
(d) Ways to minimize the burden of the collection of information on respondents, e.g., the use of automated collection techniques or other forms of information technology.

Marcie Lovett,
Records and Information Governance Division Director, OCTO, United States Patent and Trademark Office.
