Federal Register

Vol. 83, No. 10

Tuesday, January 16, 2018

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2016–0038]

Notice of Determination of the Classical Swine Fever Status of Mexico

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public of our determination that Mexico is free of classical swine fever (CSF). Based on our evaluation of the animal health status of Mexico, which we made available to the public for review and comment through a previous notice, the Administrator has determined that CSF is not present in Mexico and that live swine, pork, and pork products may safely be imported into the United States from Mexico subject to conditions in the regulations.

DATES: This change in disease status will be recognized on January 16, 2018.

FOR FURTHER INFORMATION CONTACT: Dr. Chip Wells, Senior Staff Veterinarian, Regionalization Evaluation Services, National Import Export Services, VS, APHIS, USDA, 4700 River Road, Unit 38, Riverdale, MD 20737–1231; *Chip.J.Wells@aphis.usda.gov*; (301) 851–3317.

SUPPLEMENTARY INFORMATION: The Animal and Plant Health Inspection Service (APHIS) of the United States Department of Agriculture (USDA) regulates the importation of animals and animal products into the United States to guard against the introduction of animal diseases not currently present or prevalent in this country. The regulations in 9 CFR part 94 (referred to below as the regulations) prohibit or restrict the importation of specified animals and animal products to prevent the introduction into the United States of various animal diseases, including

classical swine fever (CSF), foot-and-mouth disease, swine vesicular disease, and rinderpest. These are dangerous and communicable diseases of ruminants and swine.

The regulations in § 94.32 specify conditions for the importation of live swine, pork, and pork products from certain regions that APHIS currently recognizes as CSF-free but whose products may be at risk of commingling with products from CSF-affected regions due to common land borders or other factors. The conditions for such imports include, among others, a requirement for certification by a full-time salaried veterinary officer of the national government of the region of export that the pork or pork products originated in a CSF-free region, requirements that the pork or pork products be derived only from swine that were born and raised in such a region and never lived in a CSF-affected region, a prohibition against the comingling of the pork or pork products with pork or pork products that have been in an affected region, and a requirement that any processing of the pork or pork products be done in a federally inspected processing plant in a CSF-free region.

The regulations in 9 CFR part 92 contain requirements for requesting the recognition of the animal health status of a region or for the approval of the export of a particular type of animal or animal product to the United States from a foreign region. If, after review and evaluation of the information submitted in support of the request APHIS believes the request can be safely granted, APHIS will make its evaluation available for public comment through a notice published in the **Federal Register**. Following the close of the comment period, APHIS will review all comments received and will make a final determination regarding the request that will be detailed in another notice published in the **Federal Register**.

In response to a series of requests submitted by the Government of Mexico between 2007 and 2009, we conducted a qualitative risk evaluation to evaluate the CSF status of Mexican States other than the nine States already recognized at that time as CSF-free. The resulting risk evaluation document, “APHIS Evaluation of the CSF Status of a Region in Mexico” (referred to below as the “2013 risk evaluation”), did not support

CSF-free recognition of all of Mexico; however, it did support access to the U.S. domestic market under certain risk-mitigating conditions. Based on the findings of the 2013 risk evaluation, on July 29, 2014, we published in the **Federal Register** (79 FR 43974–43980, Docket No. APHIS–2013–0061) a proposal¹ to amend the regulations by recognizing a new APHIS-defined low-risk CSF region consisting of all Mexican States except the nine CSF-free States and the State of Chiapas, which we did not recognize as CSF-free.

In February 2015, Mexico received notice that the World Organization for Animal Health (OIE) recognized the country as CSF-free. Citing the OIE decision, the Government of Mexico then requested that APHIS suspend its rulemaking and instead continue evaluating Mexico for CSF-free status.

In response to this request, APHIS reopened its evaluation of the CSF status of Mexico. This reevaluation incorporated findings from a 2015 APHIS site visit report, along with updated surveillance data and other information submitted by Mexico. These findings are documented in an April 2016 addendum to the 2013 risk evaluation.

On August 8, 2017, we published in the **Federal Register** (82 FR 37043–37044, Docket No. APHIS–2016–0038) a notice² in which we announced the availability for review and comment of the April 2016 addendum to the 2013 risk evaluation. In the addendum, we presented the results of our updated evaluation of the risk of introducing CSF into the United States via the importation of live swine, pork, and pork products from Mexico.

We solicited comments on the notice for 60 days ending on October 10, 2017. We received one comment by that date, from a domestic pork industry group.

The commenter supported our conclusion, as stated in the addendum, that the risk of introduction of CSF into the United States via the importation of live swine, pork, and pork products from Mexico is very low. Referencing a recommendation by our site visit team

¹ To view the 2013 risk evaluation, the proposed rule, and the comments we received, go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2013-0061>.

² To view the notice, the addendum, and the comment we received, go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0038>.

that certain improvements should be made to slaughterhouse surveillance in Mexico, however, the commenter urged APHIS to ensure that those improvements were implemented before authorizing pork imports from Mexico.

In the April 2016 risk evaluation addendum, we indicated that our recommended improvements notwithstanding, the design of Mexico's active surveillance system for CSF is adequate. We made no statement suggesting that recognition of Mexico as CSF-free or trade with Mexico would be contingent upon any action by the Mexican Government to improve slaughter surveillance.

Based on the addendum and the reasons given in this document in response to comments, we are recognizing Mexico as free of CSF and adding it to the list of regions found on the APHIS website at http://www.aphis.usda.gov/import_export/animals/animal_disease_status.shtml that are considered to be free of CSF but from which live swine, pork, and pork products may only be imported into the United States under certain conditions. Copies of the list are also available via postal mail, fax, or email from the person listed under **FOR FURTHER INFORMATION CONTACT**.

Animal and Plant Health Inspection Service

[Docket No. APHIS–2016–0035]

Notice of Affirmation of Addition of Treatments for Aircraft for Certain Hitchhiking Pests

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are affirming our earlier determination that it was necessary to immediately add two new treatment schedules for aircraft for regulated pests to the Plant Protection and Quarantine (PPQ) Treatment Manual. In a previous notice, we made available to the public for review and comment a treatment evaluation document that discussed the

existing treatment schedules, described the new treatment schedules, and explained why these changes were immediately added to the PPQ Treatment Manual. Based on the treatment evaluation document and the comments we received, we are affirming the addition of those new treatments to the PPQ Treatment Manual.

DATES: The addition of the treatments is affirmed as of January 16, 2018.

FOR FURTHER INFORMATION CONTACT: Mr. George Balady, Senior Regulatory Policy Specialist, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737–1231; (301) 851–2240.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR chapter III are intended, among other things, to prevent the introduction or dissemination of plant pests and noxious weeds into or within the United States. Under the regulations, certain plants, fruits, vegetables, and other articles must be treated before they may be moved into the United States or interstate. The phytosanitary treatments regulations contained in part 305 of 7 CFR chapter III (referred to below as the regulations) set out standards for treatments required in parts 301, 318, and 319 of 7 CFR chapter III for fruits, vegetables, and other articles.

In § 305.2, paragraph (b) states that approved treatment schedules are set out in the Plant Protection and Quarantine (PPQ) Treatment Manual.¹ Section 305.3 sets out the processes for adding, revising, or removing treatment schedules in the PPQ Treatment Manual. In that section, paragraph (b) sets out the process for adding, revising, or removing treatment schedules when there is an immediate need to make a change. The circumstances in which an immediate need exists are described in § 305.3(b)(1). They are:

- PPQ has determined that an approved treatment schedule is ineffective at neutralizing the targeted plant pest(s).
- PPQ has determined that, in order to neutralize the targeted plant pest(s), the treatment schedule must be administered using a different process than was previously used.
- PPQ has determined that a new treatment schedule is effective, based on efficacy data, and that ongoing trade in a commodity or commodities may be adversely impacted unless the new treatment schedule is approved for use.

¹The PPQ Treatment Manual is available at http://www.aphis.usda.gov/import_export/plants/manuals/index.shtml or by contacting the Animal and Plant Health Inspection Service, Plant Protection and Quarantine, Manuals Unit, 92 Thomas Johnson Drive, Suite 200, Frederick, MD 21702.

- The use of a treatment schedule is no longer authorized by the U.S. Environmental Protection Agency or by any other Federal entity.

In accordance with § 305.3(b)(2), we published a notice² in the **Federal Register** on August 8, 2017 (82 FR 37042–37043, Docket No. APHIS–2016–0035), in which we announced the availability, for review and comment, of a treatment evaluation document (TED) we prepared to discuss the existing treatment schedules, describe the new treatment schedules, and explain why certain changes were immediately necessary.

We solicited comments on the notice for 60 days ending on October 10, 2017. We received two comments by that date, from private citizens. Both commenters supported the addition of the treatment schedules.

Therefore, in accordance with the regulations in § 305.3(b)(3), we are affirming our addition of the two new treatment schedules (T409–a and T409–b–3) for aircraft for regulated pests to the PPQ Treatment Manual. The treatment schedules will be listed in the PPQ Treatment Manual, which is available as described in footnote 1.

Authority: 7 U.S.C. 7701–7772 and 7781–7786; 21 U.S.C. 136 and 136a; 7 CFR 2.22, 2.80, and 371.3.

Done in Washington, DC, on January 10, 2018.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Alabama Advisory Committee To Discuss Proposed Panelists for a Hearing on Access To Voting in the State of Alabama

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act that the Alabama Advisory Committee (Committee) will hold a meeting on Tuesday, January 16, 2018, at 11:00 a.m. (Central) for the purpose of a discussion
