

The effects of the revision of Onshore Order 1 and control number 1004–0213 on control number 1004–0137 are as follows:

- The incorporation of a general requirement to use an electronic system to file Application for Permits to Drill (Form 3160–3) and Notices of Staking;
- The addition of a new activity to authorize requests for a waiver of the electronic-filing requirement; and
- The addition of “Notice of Staking,” which is a historic IC activity that has been in use without a control number.

After control number 1004–0137 is renewed with the changes listed above, we plan to request discontinuation of control number 1004–0213, since we anticipate that all of the IC activities in that control number will be merged with control number 1004–0137.

The effects of the Site Security Rule and control number 1004–0207 on control number 1004–0137 are as follows:

- The transfer of new uses of Form 3160–5 (Sundry Notice) from control number 1004–0207 to control number 1004–0137;
- The removal of “Records for Seals,” a historic IC activity in control number 1004–0137;
- The removal of “Site Security,” a historic IC activity in control number 1004–0137; and
- The removal of “Schematic/Facility Diagrams,” a historic IC activity in control number 1004–0137.

After control number 1004–0137 is renewed, we plan to submit an IC request to reflect the changes listed

above, and keep the remaining IC activities in the Site Security rule in control number 1004–0207. Consequently, we do not anticipate the discontinuation of control number 1004–0207.

The sole effect of the Waste Prevention Rule and control number 1004–0211 on control number 1004–0137 is the removal of “Gas Flaring,” a historic IC activity in control number 1004–0137. While there are some continuing IC activities pertaining to venting and flaring in 1004–0211, BLM anticipates that rulemakings in the near future will result in changes to those activities. Because the content of those rulemakings is uncertain at this time, the BLM is not requesting merger of those activities with control number 1004–0137.

In addition to the rules and order listed above, we note a recent BLM rule on hydraulic fracturing and a recent federal district court ruling. On June 21, 2016, the U.S. District Court for the District of Wyoming set aside a BLM rule on hydraulic fracturing (80 FR 16128 (March 26, 2015)). See *Wyoming v. U.S. Department of the Interior*, Order on Petition for review of Final Agency Action, Case No. 2:15–CV/043–SWS (D. Wyo.). Previously, the court had issued an order postponing the effective date of the rule. Thus, the rule never became effective, and its pre-approved control number (1004–0203) has never been activated.

In these circumstances, the BLM rescinded the March 2015 rule on

hydraulic fracturing (82 FR 61924, December 29, 2017) and the BLM is requesting revision of the information collection activity labeled “Subsequent Well Operations” by removing “nonroutine fracturing jobs” from the list of subsequent well operations that require the submission of Form 3160–5. We are also requesting the removal of a reference to “Post hydraulic fracturing chemical disclosures on FracFocus.org” from Item 27 of Form 3160–4, Well Completion or Recompletion Report and Log.
