SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995, we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on September 12, 2017 (82 FR 42832). No comments were received.

We are again soliciting comments on the proposed ICR that is described below. We are especially interested in public comment addressing the following issues: (1) Is the collection

necessary to the proper functions of the BLM; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the BLM enhance the quality, utility, and clarity of the information to be collected; and (5) how might the BLM minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. Abstract: Various Federal and Indian mineral leasing statutes authorize the BLM to grant and manage onshore oil and gas leases on Federal and Indian (except Osage Tribe) lands. In order to fulfill its responsibilities under these statutes, the BLM needs to perform the information collection (IC) activities set forth in the regulations at 43 CFR parts 3160 and 3170, and in onshore oil and gas orders promulgated in accordance with 43 CFR 3164.1. The BLM requests renewal and revision of OMB control number 1004-0137. Some of the revisions are a result of the rules and the order that are listed in the following table:

RECENT BLM ACTIONS THAT AFFECT INFORMATION COLLECTION ACTIVITIES IN CONTROL NO. 1004-0137

Title of order or rule	Regulatory information No.	Federal Register citation	Control No.
Onshore Oil and Gas Operations; Federal and Indian Oil and Gas Leases; Onshore Oil and Gas Order Number 1, Approval of Operations (Final Order).	RIN 1004-AE37	82 FR 2906 (Jan. 10, 2017)	1004-0213 (expires March 31, 2020).
Onshore Oil and Gas Operations; Federal and Indian Oil and Gas Leases; Site Security (Final Rule).	RIN 1004-AE15	81 FR 81356 (Nov. 17, 2016)	1004-0207 (expires Jan. 31, 2020).
Waste Prevention, Production Subject to Royalties, and Resource Conservation (Final Rule) ¹ .	RIN 1004-AE14	81 FR 83008 (Nov. 18, 2016)	1004-0211 (expires Jan. 31, 2018).

¹ This rule is under review in federal district court (*State of Wyoming v. U.S. Department of the Interior*, Case No. 2:16-CV-0285-SWS (D. Wyo.)).

The effects of the revision of Onshore Order 1 and control number 1004–0213 on control number 1004–0137 are as follows:

- The incorporation of a general requirement to use an electronic system to file Application for Permits to Drill (Form 3160–3) and Notices of Staking;
- The addition of a new activity to authorize requests for a waiver of the electronic-filing requirement; and
- The addition of “Notice of Staking,” which is a historic IC activity that has been in use without a control number.

After control number 1004–0137 is renewed with the changes listed above, we plan to request discontinuation of control number 1004–0213, since we anticipate that all of the IC activities in that control number will be merged with control number 1004–0137.

The effects of the Site Security Rule and control number 1004–0207 on control number 1004–0137 are as follows:

- The transfer of new uses of Form 3160–5 (Sundry Notice) from control number 1004–0207 to control number 1004–0137;
- The removal of “Records for Seals,” a historic IC activity in control number 1004–0137;
- The removal of “Site Security,” a historic IC activity in control number 1004–0137; and
- The removal of “Schematic/Facility Diagrams,” a historic IC activity in control number 1004–0137.

After control number 1004–0137 is renewed, we plan to submit an IC request to reflect the changes listed

above, and keep the remaining IC activities in the Site Security rule in control number 1004–0207. Consequently, we do not anticipate the discontinuation of control number 1004–0207.

The sole effect of the Waste Prevention Rule and control number 1004–0211 on control number 1004–0137 is the removal of “Gas Flaring,” a historic IC activity in control number 1004–0137. While there are some continuing IC activities pertaining to venting and flaring in 1004–0211, BLM anticipates that rulemakings in the near future will result in changes to those activities. Because the content of those rulemakings is uncertain at this time, the BLM is not requesting merger of those activities with control number 1004–0137.

In addition to the rules and order listed above, we note a recent BLM rule on hydraulic fracturing and a recent federal district court ruling. On June 21, 2016, the U.S. District Court for the District of Wyoming set aside a BLM rule on hydraulic fracturing (80 FR 16128 (March 26, 2015)). See *Wyoming v. U.S. Department of the Interior*, Order on Petition for review of Final Agency Action, Case No. 2:15–CV/043–SWS (D. Wyo.). Previously, the court had issued an order postponing the effective date of the rule. Thus, the rule never became effective, and its pre-approved control number (1004–0203) has never been activated.

In these circumstances, the BLM rescinded the March 2015 rule on

hydraulic fracturing (82 FR 61924, December 29, 2017) and the BLM is requesting revision of the information collection activity labeled “Subsequent Well Operations” by removing “nonroutine fracturing jobs” from the list of subsequent well operations that require the submission of Form 3160–5. We are also requesting the removal of a reference to “Post hydraulic fracturing chemical disclosures on FracFocus.org” from Item 27 of Form 3160–4, Well Completion or Recompletion Report and Log.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.
