Stock Assessment Report History for the Northern Sea Otter in Washington

The Washington sea otter SAR was last revised in August 2008. The Washington sea otter is not a strategic stock, thus the Service is required to

review the stock assessment at least once every 3 years. The Service reviewed the Washington sea otter SAR in 2011 and concluded that a revision was not warranted because the status of the stock had not changed, nor could it be more accurately determined. However, upon review in 2016, the Service determined that revision was warranted because of changes in population estimates and distribution.

Summary of Draft Revised Stock Assessment Report for the Northern Sea Otter in the State of Washington

The following table summarizes some of the information contained in the draft revised SAR for northern sea otters in Washington State, which includes the stock’s N_{min} , R_{max} , F_r , PBR, annual estimated human-caused mortality and serious injury, and status. After consideration of any public comments we receive, the Service will revise and finalize the SAR, as appropriate. We will publish a notice of availability and summary of the final SAR, including responses to submitted comments.

Abstract: The Department of the Interior (DOI) owns and manages over 204 million artifacts, scientific specimens, and documents in trust for the American public. This diverse collection consists of archaeological artifacts, archives, art, biological specimens, ethnographic objects, geological specimens, historic objects, and paleontological specimens that are held by ten of DOI's bureaus and offices. The majority of DOI's collections are housed in bureau facilities; however, over ten percent (more than 25 million objects and 19,000 cubic feet of objects) are housed by at least 882 non-Federal repositories, the majority of which are museums associated with, or departments of, U.S. colleges and universities. Most are scientific collections from the disciplines of archaeology, biology, geology, and paleontology and include associated archival records.

DOI museum collections, regardless of where they are housed, must be managed according to preservation, documentation, educational, and other requirements in the public interest. These requirements are mandated by a number of Federal laws, notably: Archaeological Resources Protection Act of 1979, as amended (16 U.S.C. 470aa–mm); Paleontological Resources Preservation Act of 2009 (16 U.S.C. 470aaa–4); Migratory Bird Treaty Act of 1918 (16 U.S.C. 703–712); Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407); Endangered Species Act of 1973, as amended (16 U.S.C. 1531–1543); Lacey Act of 1900 (16 U.S.C. 3371–3378; 18 U.S.C. 43–44); Native American Graves Protection and Repatriation Act of 1990 (25 U.S.C. 3001–3013); Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 524); National Park Service Organic Act of 1916 (54 U.S.C. 100101); Management of Museum Properties Act of 1955, as amended (54 U.S.C. 102501–102504); National Historic Preservation Act of 1966, as amended (54 U.S.C. 300101 *et seq.*); Historic Sites Act of 1935 (54 U.S.C. 320101–320104, 320106); and Monuments, Ruins, Sites, and Objects of Antiquity (Act for the Preservation of American Antiquities of 1906 (“Antiquities Act”)) (54 U.S.C. 320301–320303).
