Respondents/Affected Entities: Entities required to comply with reporting and recordkeeping requirements include, chemical producers, importers, and exporters (CFCs and HCFCs); research and development (laboratories); and methyl bromide producers, importers, exporters, distributors, and applicators.

Respondent's Obligation To Respond: Mandatory—Section 603(b) of the Clean Air Act.

Estimated Number of Respondents: 106 (total).

Frequency of Response: Quarterly, annually, and as needed.

Total Estimated Burden: 3,811 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total Estimated Cost: \$448,470 (per year), includes \$13,082.00 annualized capital or operation & maintenance costs.

Changes in Estimates: There is a decrease of 1,644 hours in the total estimated respondent burden compared with the ICRs currently approved by OMB. This decrease compared to previous ICRs is because the merged ICR accounts for the transition from paper to electronic reporting and the decrease in the number of respondents. The reporting community continues to change as ODS are phased out. Specifically, we estimate fewer companies reporting on imports and exports of ODS. These updates are based on 2015 reporting activity. While the one-time burden associated with the transition to electronic reporting (*i.e.*, CDX registration and electronic signature) temporarily increases burden, overall burden decreases because of the efficiencies associated with electronic reporting.

Dated: December 20, 2017.

Cynthia A. Newberg,
Acting Director, Stratospheric Protection Division.
