#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

This request is for a new information collection.

The NOAA Fisheries Office of Science and Technology's Economics and Social Analysis Division seeks to conduct

assessments of the social and economic impacts from hurricanes and other climate related natural disasters on commercial and recreational fishing industries in the eastern, gulf coast and Caribbean territories of the United States. It seeks to collect data on the immediate and long-term disruption and impediments to recovery of normal business practices to the commercial and recreational fishing industries. Data would be collected from commercial and recreational for hire fishermen, fish dealers, bait and tackle stores, marinas and other businesses dependent on the fishing industry for livelihood. The data will improve research and analysis of potential fishery management actions by understanding the immediate effects and/or long-term compounding effects of natural disasters on communities most dependent on commercial and recreational fishing. This data collection is consistent with the Magnuson-Stevens Fishery Conservation and Management Act and essential for implementing National Standard 8, which calls for the sustained participation of fishing communities.
