

to review and to help finalize the meeting minutes and the final meeting report. The list of FIFRA SAP members participating at this meeting will be posted on the FIFRA SAP website at <http://www.epa.gov/scipoly/sap> or may be obtained from the OPP Docket at <http://www.regulations.gov>.

II. Background

A. Purpose of FIFRA SAP

FIFRA SAP serves as a primary scientific peer review mechanism of EPA's Office of Chemical Safety and Pollution Prevention (OCSPP) and is structured to provide scientific advice, information and recommendations to the EPA Administrator on pesticides and pesticide-related issues as to the impact of regulatory actions on health and the environment. FIFRA SAP is a Federal advisory committee established in 1975 under FIFRA that operates in accordance with requirements of the Federal Advisory Committee Act (5 U.S.C. Appendix). FIFRA SAP is composed of a permanent panel consisting of seven members who are appointed by the EPA Administrator from nominees provided by the National Institutes of Health and the National Science Foundation. The FIFRA SAP is assisted in their reviews by ad hoc participation from members of the Science Review Board (SRB). As a scientific peer review mechanism, FIFRA SAP provides comments, evaluations, and recommendations to improve the effectiveness and quality of analyses made by Agency scientists. The FIFRA SAP is not required to reach consensus in its recommendations to the Agency but consensus is a preferred outcome and possible under FACA.

B. Public Meeting

EPA-registered pesticide products are an important part of pest management programs to accomplish control of invertebrate pests. The Agency has a number of guidelines intended to assist in the development of appropriate protocols to test product efficacy. EPA Product Performance Test Guidelines OPPTS 810.3100 Soil Treatment for Imported Fire Ants and OPPTS 810.3500 Premises Treatments were published in March 1998. To increase clarity and consistency in efficacy testing and to include current scientific standards, the Agency is revising these product performance guidelines. The Agency will be seeking advice and recommendations from the SAP on scientific issues associated with the two proposed revised EPA guidelines.

The proposed premises treatment guideline contains recommended test

methodologies for a wide range of products intended to kill, control, flush, and/or knockdown invertebrate premises pests, such as cockroaches, ticks, mosquitoes, flies, and wasps. The guideline does not cover treatment of livestock or pets, wide area-mosquito control, or bed bug products. In addition to guidance for testing efficacy of direct pesticide application to pests, residual treatments, and cockroach and fly baits in the laboratory, the proposed guideline also includes field testing methods for outdoor misting systems, Hymenoptera nest treatments, and outdoor foggers. Finally, methods for resistance ratio determination and characterization of pest population strain susceptibility are described.

The proposed red imported fire ant treatment guideline contains recommended test methodologies for evaluating the performance of pesticide products for the treatment and control of red imported fire ant colonies/mounds. The guideline does not cover premises treatments for red imported fire ant workers/foragers, such as direct application to pests. Field tests for both mound- and area-applied pesticide products are proposed, along with accompanying laboratory studies for baits, barrier treatments, and insect growth regulators.

C. FIFRA SAP Documents and Meeting Minutes

EPA's background paper, draft charge questions to FIFRA SAP, and related supporting materials will be available on or before January 22, 2018. In addition, a list of candidates under consideration as prospective ad hoc panelists for this meeting will be available for a 15-day public comment period in early to mid-March. You may obtain electronic copies of most meeting documents, including FIFRA SAP composition (*i.e.*, members and ad hoc members for this meeting) and the meeting agenda, at <http://www.regulations.gov> and the FIFRA SAP website at <http://www.epa.gov/scipoly/sap>.

FIFRA SAP will prepare the meeting minutes and final report summarizing its recommendations to the Agency approximately 90 days after the meeting. The meeting minutes and final report will be posted on the FIFRA SAP website or may be obtained from the OPP Docket at <http://www.regulations.gov>.
