part 395, for any truck added to its fleet on or after December 18, 2017, until the company’s full transition to ELDs can be accomplished. Old Dominion explained that the exemption would provide the company time to work with its AOBRD/ELD provider, PeopleNet, to complete the development of the software necessary to integrate ELD data with Old Dominion’s fleet management and safety systems. The integration of the hours-of-service data with the fleet management and safety systems would enable the company to achieve a high level of safety oversight of its drivers.

FMCSA considers the request to be on behalf of all motor carriers in similar situations concerning the integration of PeopleNet’s ELD software into fleet management systems.

Old Dominion explained that all of the PeopleNet AOBRD and ELD hardware currently installed in Old Dominion’s vehicles, and the systems that will be installed in the near future, would satisfy the ELD mandate after the company implements the transition to PeopleNet’s December 15, 2017, release. However, the new PeopleNet release does not include the necessary means to integrate into Old Dominion’s fleet management and safety software.

A copy of Old Dominion’s application for exemption is available for review in the docket for this notice.

Issued on: January 23, 2018.

Associate Administrator for Policy.
