Nominations for membership may be submitted by any source. Nominations should include a resume providing an adequate description of the nominee’s qualifications, including information that would enable the Department of the Interior to make an informed decision regarding meeting the membership requirements of the Public Advisory Committee and permit the Department of the Interior to contact a potential member.

Individuals who are federally registered lobbyists are ineligible to serve on all FACA and non-FACA boards, committees, or councils in an individual capacity. The term “individual capacity” refers to individuals who are appointed to exercise their own individual best judgment on behalf of the government, such as when they are designated Special Government Employees, rather than being appointed to represent a particular interest.

Public availability of comments. Before including your address, phone number, email address, or other personal identifying information in your nomination/comment, you should be aware that your entire nomination/comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your nomination/comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 5 U.S.C. Appendix 2
Michaela E. Noble, Director, Office of Environmental Policy and Compliance.

SUMMARY: On September 14, 2016, the Bureau of Land Management (BLM) issued the Record of Decision (ROD) for the Desert Renewable Energy Conservation Plan Land Use Plan Amendment (DRECP), which amended the California Desert Conservation Area (CDCA) Plan, Bishop Resource Management Plan (RMP), and the Bakersfield RMP in the Mojave and Colorado/Sonoran Desert regions of southern California. On March 28, 2017, the President issued Executive Order 13783, “Promoting Energy Independence and Economic Growth,” which directs all Federal agencies to review all actions that could “potentially burden the development or use of domestically produced energy resources.” To facilitate the BLM’s review of the DRECP, including potential burdens on domestic renewable energy production in California, the BLM, by this notice, is announcing the beginning of the scoping process to solicit public comments and identify issues.

DATES: This notice initiates the public scoping process for the potential plan amendments and associated National Environmental Policy Act (NEPA) documents. Comments on issues may be submitted in writing until March 19, 2018. The dates and locations of any scoping meetings will be announced at least 15 days in advance through local media, newspapers and the BLM website at www.blm.gov/california/drecp. In order to be included in the analysis, all comments must be received prior to the close of the scoping period or 15 days after the last public meeting, whichever is later. We will provide additional opportunities for public participation upon publication of the Draft Plan Amendment and NEPA document.

ADDITIONAL INFORMATION CONTACTS: Jeremiah Karuzas, Renewable Energy Lead, 916–978–4644, 2800 Cottage Way, Rm W–1623, Sacramento, CA 95825 or electronically to jkaruzas@blm.gov. Documents relevant to this planning process can be found at the above address. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 to reach BLM contact person. The FRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

BLM seeks additional comment on the DRECP ROD, including the renewable energy and conservation designations made through that decision. In 2008, Governor Schwarzenegger signed an executive order that required that 33 percent of California’s energy production be via renewable energy in 2020. In October 2015, Governor Edmund G. Brown Jr. signed into law a measure which requires retail sellers and publicly owned utilities to procure 50 percent of their electricity from renewable energy resources by 2030. And, on March 28, 2017, the President issued Executive Order 13783, “Promoting Energy Independence and Economic Growth,” which directs all Federal agencies to review all actions that could “potentially burden the development or use of domestically produced energy resources.” In recognition of these goals and direction, BLM seeks comment on the potential impacts that land use
designations contained in the amended RMPs will have on commercial-scale renewal energy projects, including wind, solar and geothermal. In particular, the BLM seeks comment on the Areas of Critical Environmental Concern that were designated, including where private lands lie within the external boundaries of such designations, as well as comments on increasing opportunities for increased renewable energy development, recreational and off-highway vehicle (OHV) access, mining access, and grazing.

Finally, on January 8, 2018, the President signed an Executive Order on Streamlining and Expediting Requests to Locate Broadband Facilities in Rural America, which directs Federal agencies: “. . . to reduce barriers to capital investment, remove obstacles to broadband services, and more efficiently employ Government resources” in order to foster rural broadband infrastructure projects. Therefore, the BLM also seeks comment on the impact that land use designations, land disturbance limits (or “caps”), and visual management classifications contained in the amended RMPs may have on the deployment of future communications infrastructure.

You may submit comments in writing to the BLM at any public scoping meeting, or you may submit them to the BLM using the method listed in the ADDRESSES section. To be most helpful, you should submit comments by the close of the 45-day scoping period or within 15 days after the last public meeting, whichever is later.

The BLM will utilize and coordinate the NEPA scoping process to help fulfill the public involvement process under the National Historic Preservation Act (54 U.S.C. 306108) as provided in 36 CFR 800.2(d)(3). The information about historic and cultural resources within the area potentially affected by the proposed action will assist the BLM in identifying and evaluating impacts to such resources.

The BLM will consult with Indian tribes on a government-to-government basis in accordance with Executive Order 13175 and other policies. Tribal concerns, including impacts on Indian trust assets and potential impacts to cultural resources, will be given due consideration. Federal, State, and local agencies, along with tribes and other stakeholders that may be interested in or affected by the proposed action that the BLM is evaluating, are invited to participate in the scoping process and, if eligible, may request or be requested by the BLM to participate in the development of the environmental analysis as a cooperating agency.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

The minutes and list of attendees for each scoping meeting will be available to the public and open for 30 days after the meeting to any participant who wishes to clarify the views he or she expressed. The BLM will evaluate identified issues to be addressed in the plan, and will place them into one of three categories:

1. Issues to be resolved in the plan amendment;
2. Issues to be resolved through policy or administrative action; or
3. Issues beyond the scope of this plan amendment.

The BLM will provide an explanation in the Draft Plan Amendment and NEPA document as to why an issue was placed in category two or three. The public is also encouraged to help identify any management questions and concerns that should be addressed in the plan. The BLM will work collaboratively with interested parties to identify the management decisions that are best suited to local, regional, and national needs and concerns. The BLM will use an interdisciplinary approach to develop the plan amendment in order to consider the variety of resource issues and concerns identified.

Authority: 40 CFR 1501.7 and 43 CFR 1610.2.

Jerome E. Perez,
California State Director.

SUMMARY: The Commission hereby gives notice of the scheduling of the final phase of antidumping and countervailing duty investigation Nos. 701–TA–581 and 731–TA–1374–1376 (Final) pursuant to the Tariff Act of 1930 (“the Act”) to determine whether an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of citric acid and certain citrate salts from Belgium, Colombia, and Thailand, provided for in subheadings 2918.14.00, 2918.15.10, 2918.15.50, 3824.99.92, and 3824.99.92 of the Harmonized Tariff Schedule of the United States, preliminarily determined by the Department of Commerce to be subsidized and sold at less-than-fair-value.

DATES: January 8, 2018.

General information concerning the Commission may also be obtained by accessing its internet server (https://www.usitc.gov). The public record for these investigations may be viewed on the Commission’s electronic docket (EDIS) at https://edis.usitc.gov.

SUPPLEMENTARY INFORMATION:
Scope.—For purposes of these investigations, the Department of Commerce has defined the subject merchandise as “all grades and granulation sizes of citric acid, sodium citrate, and potassium citrate in their unblended forms, whether dry or in solution, and regardless of packaging type. The scope also includes blends of citric acid, sodium citrate, and potassium citrate; as well as blends with other ingredients, such as sugar, where the unblended form(s) of citric acid, sodium citrate, and potassium citrate constitute 40 percent or more, by weight, of the blend.

The scope also includes all forms of crude calcium citrate, including dicalcium citrate monohydrate, and tricalcium citrate tetrahydrate, which are intermediate products in the production of citric acid, sodium citrate, and potassium citrate.
