

including six self-contained breathing apparatus, gas monitors, cap lamps, and oxygen bottles to the Sugar Creek Mine rescue station to ensure that the combined mine rescue station is in compliance with 30 CFR 49.6(a).

(7) Pursuant to the mine rescue services arrangement between petitioner and Central Plains, there will always be two mine rescue teams available whenever miners are underground and a minimum of twelve approved self-contained breathing apparatus available for a mine emergency. When maintained in the individual mine rescue stations, the apparatus could be used immediately or transported to another mine within a maximum forty-five minutes ground travel time.

(8) The Petitioner proposes the following for its mine rescue station:

(a) **Self-Contained Breathing Apparatus:** The mine rescue station will be equipped with a minimum of six self-contained breathing apparatus, each with a minimum of four hours capacity (approved by MSHA and the National Institute for Occupational Safety and Health under 42 CFR part 84, subpart H), and any necessary equipment for testing such apparatus.

(b) The mine operator will maintain a mine rescue station provided with all equipment identified in 30 CFR 49.6(a)(2) through (a)(9).

The petitioner asserts that the proposed alternative method will at all times guarantee no less than the same measure of protection afforded the miners under the existing standard.
