Nature and Extent of Confidentiality: In general, there is no need for confidentiality with this collection of information. The Commission, however, will allow filing entities to seek confidential treatment of their data.

Needs and Uses: The Federal Communications Commission (Commission) is requesting that the Office of Management and Budget

(OMB) approve a revision of an existing information collection, titled "47 CFR 43.62, Annual Reporting Requirements for U.S. Providers of International Services and Circuits." The purpose of the revision is to obtain OMB approval of the annual reporting requirements under the newly adopted 47 CFR 43.82 which will require that entities holding capacity on submarine cables file electronically annual circuit capacity reports, in a format set out in a Filing Manual. The Commission is requesting a revision of OMB Control No. 3060-1156 in order to obtain final approval for the requirements in 47 CFR 43.82, the filing manual, and the electronic filing of the data.

Previously, U.S. providers of international services were required to file annual traffic and revenue reports and circuit capacity reports as required by 47 CFR 43.62. The Commission has adopted rules changes that eliminate the traffic and revenue reports and further streamline the circuit capacity reports. Upon OMB approval of this collection, 47 CFR 43.62 will be eliminated and replaced with 47 CFR 43.82 for the filing of circuit capacity reports.

The current title of OMB Control No. 3060-1156 is "47 CFR 43.62, Annual Reporting Requirements for U.S. Providers of International Services and Circuits." The Commission would like to change the title to "47 CFR 43.82, Annual International Circuit Capacity Reports" in order to more accurately describe the information collection requirements under 47 CFR Section 43.82.

The uses to which the Commission puts the information from the annual circuit capacity report, and the Registration Form are as follows:

(a) Annual Circuit Capacity Reports [Section 43.82 (a)]

The circuit capacity reports are comprised of two parts. First, licensees of a submarine cable extending between the United States and a foreign point as of December 31 of the reporting period report the available capacity and planned capacity of the cable—the cable operators report. Second, each cable landing licensee and common carrier that holds capacity on the U.S. end of a submarine cable extending between the United States and a foreign point as of December 31 of the reporting period ("capacity holders") reports its available capacity on the U.S. end of every submarine cable between the United States and any foreign point on which it holds capacity as of that date—the capacity holders report. A holding of capacity is an interest in the U.S. end of an international submarine cable

through cable ownership, an indefeasible right of use (IRU), or an inter-carrier lease (ICL).

The Commission uses the circuit capacity data for such purposes as analyzing international transport markets in merger reviews. More importantly, these data are essential for our national security and public safety responsibilities in regulating communications, an important linchpin of the Commission's statutory authority. Submarine cables are critical infrastructure and the circuit capacity data are important for the Commission's contributions to the national security and defense of the United States. The Commission uses the data, for example, to have a complete understanding of the ownership and use of submarine cable capacity and to assist in the protection, restoration, and resiliency of the infrastructure during national security or public safety emergencies, such as hurricanes. The Department of Homeland Security (DHS) filed comments stating that it also finds this information to be critical to its national and homeland security functions, and states that this information, when combined with other data sources, is used to protect and preserve national security and for its emergency response purposes. There are no alternative reliable third party commercial sources for the reported data. Although some sources collect general capacity information from cable owners, neither the FCC nor DHS has found any alternative sources for capacity holder data. Commercial source data may include capacity information, but the data are not verified by company officials and do not include capacity holder data. Although the Commission obtains the ownership and location of individual cables through the licensing process, distribution of a cable's capacity among providers is not required to be reported under our current submarine cable licensing rules and is provided only annually through the Circuit Capacity Reports. Further, the Commission's licensing rules do not require an applicant to include the entities that have acquired capacity on the cable through an IRU or ICL.

(b) Registration Form [Section 43.82 (b)]

The Registration Form provides basic information about the filing and about the entity itself—such as address, phone number, email address, and the international Section 214 authorizations and cable landing licenses held by the filer. This information will assist in keeping track of who holds international circuit capacity and how to contact them. The Registration Form also

includes a certification by the filing entity to certify the accuracy and completeness of its report. The Registration Form provides the means by which the filing entity may request confidential treatment of the data filed in the report.

(c) Filing Manual [Section 43.82(c)]

The Filing Manual sets forth instructions on how to file the reports.

Federal Communications Commission.

FEDERAL ELECTION COMMISSION

[NOTICE 2018-03]

Price Index Adjustments for Expenditure Limitations and Lobbyist Bundling Disclosure Threshold

AGENCY: Federal Election Commission.

ACTION: Notice of adjustments to expenditure limitations and lobbyist bundling disclosure threshold.

SUMMARY: As mandated by provisions of the Federal Election Campaign Act (“the Act”), the Federal Election Commission (“the Commission”) is adjusting certain expenditure limitations and the lobbyist bundling disclosure threshold set forth in the Act, to index the amounts for inflation. Additional details appear in the supplemental information that follows.

DATES: These adjustments are applicable January 1, 2018.

FOR FURTHER INFORMATION CONTACT: Ms. Elizabeth S. Kurland, Information Division, 999 E Street NW, Washington, DC 20463; (202) 694-1100 or (800) 424-9530.

SUPPLEMENTARY INFORMATION: Under the Federal Election Campaign Act, 52 U.S.C. 30101-46, coordinated party expenditure limits (52 U.S.C. 30116(d)(3)) and the disclosure threshold for contributions bundled by lobbyists (52 U.S.C. 30104(i)(3)(A)) are adjusted periodically to reflect changes in the consumer price index. See 52 U.S.C. 30104(i)(3), 30116(c); 11 CFR 109.32, 110.17(a), (f). The Commission is publishing this notice to announce the adjusted limits and disclosure threshold for 2018.

Coordinated Party Expenditure Limits for 2018

Under 52 U.S.C. 30116(c), the Commission must adjust the expenditure limitations established by

52 U.S.C. 30116(d) (the limits on expenditures by national party committees, state party committees, or their subordinate committees in connection with the general election campaign of candidates for Federal office) annually to account for inflation. This expenditure limitation is increased by the percent difference between the price index, as certified to the Commission by the Secretary of Labor, for the 12 months preceding the beginning of the calendar year and the price index for the base period (calendar year 1974). 52 U.S.C. 30116(c).

1. Expenditure Limitation for House of Representatives in States With More Than One Congressional District

Both the national and state party committees have an expenditure limitation for each general election held to fill a seat in the House of Representatives in states with more than one congressional district. See 52 U.S.C. 30116(d)(3)(B). This limitation also applies to the District of Columbia and territories that elect individuals to the office of Delegate or Resident Commissioner.¹ *Id.* The formula used to calculate the expenditure limitation in such states and territories multiplies the base figure of \$10,000 by the difference in the price index (4.97135), rounding to the nearest \$100. See 52 U.S.C. 30116(c)(1)(B), (d)(3)(B); 11 CFR 109.32(b), 110.17. Based upon this formula, the expenditure limitation for 2018 general elections for House candidates in these states, districts, and territories is \$49,700.

2. Expenditure Limitation for Senate and for House of Representatives in States With Only One Congressional District

Both the national and state party committees have an expenditure limitation for a general election held to fill a seat in the Senate or in the House of Representatives in states with only one congressional district. See 52 U.S.C. 30116(d)(3)(A). The formula used to calculate this expenditure limitation considers not only the price index but also the voting age population (“VAP”) of the state. *Id.* The VAP figures used to calculate the expenditure limitations were certified by the U.S. Census Bureau. The VAP of each state is also published annually in the **Federal Register** by the U.S. Department of Commerce. 11 CFR 110.18. The general election expenditure limitation is the
