Partial Lift of Freeze on Filing Petitions for Rulemaking To Change Television Stations Community of License

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: This document announces that the Media Bureau is partially lifting the freeze on filing rulemaking petitions to change a full power television station's community of license, where no technical facility change is required.

DATES: February 12, 2018.

FOR FURTHER INFORMATION CONTACT:

Joyce Bernstein, Joyce.Bernstein@fcc.gov, or Kevin Harding, Kevin.Harding@fcc.gov, Video Division, Media Bureau, Federal Communications Commission.

SUPPLEMENTARY INFORMATION: On August 3, 2004, in connection with the development of a channel election and repacking process in advance of the DTV transition, the Media Bureau imposed a freeze on the filing of petitions requesting new channels or service areas for full power television stations in order to ensure a stable database in connection with that process. Although the DTV transition was completed in 2009, the Commission continued the freezes as a result of the National Broadband Plan, which recommended that the Commission reallocate spectrum for new broadband services and repack television channels to increase the efficiency of channel use. Auction 1000, which was conducted pursuant to Title VI of the Middle Class Tax Relief and Job Creation Act of 2012, was completed on April 13, 2017, and a 39-month post-auction transition period is underway during which some broadcast television stations will be relicensed to new channel assignments.

Because the DTV transition is complete and the post-incentive auction transition is underway, it is no longer necessary to freeze community of license petitions that do not require a change in the station's service area. The freeze on the filing of petitions for rulemaking for new station channel allotments, for changes in licensed

stations' channels, or to change community of license which include changes in authorized technical facilities, remain in place.

Federal Communications Commission.

Barbara Kreisman,

Chief, Video Division, Media Bureau.

Nature and Extent of Confidentiality: In general, there is no need for confidentiality with this collection of information. The Commission, however, will allow filing entities to seek confidential treatment of their data.

Needs and Uses: The Federal Communications Commission (Commission) is requesting that the Office of Management and Budget

(OMB) approve a revision of an existing information collection, titled "47 CFR 43.62, Annual Reporting Requirements for U.S. Providers of International Services and Circuits." The purpose of the revision is to obtain OMB approval of the annual reporting requirements under the newly adopted 47 CFR 43.82 which will require that entities holding capacity on submarine cables file electronically annual circuit capacity reports, in a format set out in a Filing Manual. The Commission is requesting a revision of OMB Control No. 3060-1156 in order to obtain final approval for the requirements in 47 CFR 43.82, the filing manual, and the electronic filing of the data.

Previously, U.S. providers of international services were required to file annual traffic and revenue reports and circuit capacity reports as required by 47 CFR 43.62. The Commission has adopted rules changes that eliminate the traffic and revenue reports and further streamline the circuit capacity reports. Upon OMB approval of this collection, 47 CFR 43.62 will be eliminated and replaced with 47 CFR 43.82 for the filing of circuit capacity reports.

The current title of OMB Control No. 3060-1156 is "47 CFR 43.62, Annual Reporting Requirements for U.S. Providers of International Services and Circuits." The Commission would like to change the title to "47 CFR 43.82, Annual International Circuit Capacity Reports" in order to more accurately describe the information collection requirements under 47 CFR Section 43.82.

The uses to which the Commission puts the information from the annual circuit capacity report, and the Registration Form are as follows:

(a) Annual Circuit Capacity Reports [Section 43.82 (a)]

The circuit capacity reports are comprised of two parts. First, licensees of a submarine cable extending between the United States and a foreign point as of December 31 of the reporting period report the available capacity and planned capacity of the cable—the cable operators report. Second, each cable landing licensee and common carrier that holds capacity on the U.S. end of a submarine cable extending between the United States and a foreign point as of December 31 of the reporting period ("capacity holders") reports its available capacity on the U.S. end of every submarine cable between the United States and any foreign point on which it holds capacity as of that date—the capacity holders report. A holding of capacity is an interest in the U.S. end of an international submarine cable
