

Wireless Telecommunications Bureau and Wireline Competition Bureau (the Bureaus) may implement, and (3) certify its challenge. The USAC system will validate a challenger's evidence using an automated challenge validation process. Once all valid challenges have been identified, a challenged party that chooses to respond to any valid challenge(s) may submit additional data via the online USAC portal during the established response window. A challenged party may submit technical information that is probative regarding the validity of a challenger's speed tests, including speed test data and other device-specific data collected from transmitter monitoring software or, alternatively, may submit its own speed test data that conforms to the same standards and requirements specified by the Commission and the Bureaus for challengers.

In conjunction with the qualified 4G LTE data separately collected pursuant to OMB 3060-1242 that will be used to create the map of areas presumptively eligible for MF-II support, the information collected under this MF-II challenge process collection will enable the Commission to efficiently resolve disputes concerning the eligibility or ineligibility of an area initially deemed ineligible for MF-II support and establish the final map of areas eligible for such support, thereby furthering the Commission's goal of targeting MF-II support to areas that lack adequate mobile voice and broadband coverage absent subsidies through a transparent process.

The Commission received approval from OMB for the information collection requirements contained in OMB 3060-1251 on February 7, 2018.

Federal Communications Commission.

Marlene H. Dortch,

Secretary, Office of the Secretary.
