POLICY JUSTIFICATION**Finland—Evolved SEASPARROW Missiles (ESSM)**

The Government of Finland has requested a possible sale of sixty-eight (68) Evolved SEASPARROW Missiles (ESSM) and one (1) ESSM inert operational missile. Also included are seventeen (17) MK25 quad pack canisters, eight (8) MK783 shipping containers, spare and repair parts, support and test equipment, publications and technical documentation, training, U.S. Government/Contractor engineering, technical and logistics support services and technical assistance, and other related elements of logistical support. The estimated total case value is \$112.7 million.

This proposed sale will support the foreign policy and national security

objectives of the United States by improving the security of a partner nation that has been, and continues to be, an important force for political stability and economic progress in Europe.

Finland intends to use the missiles on its new Squadron 2020 class Corvette ships. The missiles will provide enhanced capabilities in effective defense of critical sea lanes and improve Finland's capability to meet current and future threats of enemy anti-ship weapons. Finland has not purchased ESSM previously, but will have no difficulty incorporating this capability into its naval forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors will be Raytheon Missile Systems (RMS) Tucson, AZ, for the missiles, and BAE Systems, Aberdeen, SD, for the missile canisters. The purchaser typically requests offsets. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will require up to 12 U.S. Government personnel to travel to Finland providing support over a period of five years.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Standard missile documentation will include:

- Parametric documents (classified CONFIDENTIAL)
- Missile Handling/Maintenance Procedures (UNCLASSIFIED)
- General Performance Data (classified CONFIDENTIAL)
- Firing Guidance (classified CONFIDENTIAL)
- Dynamics Information (classified CONFIDENTIAL)

2. The Evolved SEASPARROW Missile (ESSM) contains SENSITIVE technological information and/or RESTRICTED information in the missile guidance section. Certain operating frequencies and performance characteristics are classified SECRET

because they could be used to develop tactics and/or countermeasures to reduce or defeat the missile effectiveness.

3. If a technologically advanced adversary were to obtain knowledge of specific hardware, the information could be used to develop countermeasures which might reduce weapons system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Finland can provide substantially the same degree of protection for sensitive technology being released as the U.S. Government. This proposed sustainment program is necessary to the furtherance of the U.S. foreign policy and national security objectives outlined in the policy justification.

5. All defense articles and services listed on this transmittal are authorized for release and export to the Government of Finland.
