DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission**

[Project No. 12532–006]

Pine Creek Mine, LLC; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969, and the Federal Energy Regulatory Commission’s (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47,897), the Office of Energy Projects has reviewed Pine Creek Mine, LLC’s (PCM or applicant) application for a license to construct its proposed Pine Creek Mine Tunnel Hydroelectric Project (Pine Creek Mine or project), and has prepared an Environmental Assessment (EA). The proposed 1.5-megawatt (MW) project would be located largely inside the Pine Creek Mine tunnel and adjacent to Morgan Creek and Pine Creek in Inyo County, California. The project would occupy only subsurface federal lands managed the U.S. Forest Service.

The EA contains Commission staff’s analysis of the potential environmental impacts of the proposed hydroelectric project. The EA concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

A copy of the EA is available for review at the Commission in the Public Reference Room or may be viewed on the Commission’s website at www.ferc.gov using the “eLibrary” link. DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission**

[Docket Nos. CP17–441–000, CP17–441–001]

Northwest Pipeline LLC; Notice of Availability of the Environmental Assessment for the Proposed North Seattle Lateral Upgrade Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the North Seattle Lateral Upgrade Project, proposed by Northwest Pipeline LLC (Northwest) in the above-referenced docket. Northwest requests authorization to replace approximately 5.9 miles of 8-inch-diameter natural gas pipeline with 20-inch-diameter pipeline in Snohomish County, Washington. According to Northwest, the North Seattle Lateral Upgrade Project would increase service reliability and enable Northwest to provide an incremental 159,299 dekatherms per day of firm capacity to serve Puget Sound Energy.

The EA assesses the potential environmental effects of the

construction and operation of the North Seattle Lateral Upgrade Project in accordance with the requirements of the National Environmental Policy Act (NEPA). The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The proposed North Seattle Lateral Upgrade Project would consist of the following facilities:

- Replace 5.9-miles of 8-inch-diameter pipeline with 20-inch-diameter pipeline;
- rebuild the existing North Seattle/Everett meter station in order to accommodate the increased delivery capacity of the North Seattle Lateral;
- abandon and relocate approximately 0.1 mile of 16-inch-diameter pipeline;
- relocate an existing 8-inch pig launcher and a 20-inch pig receiver¹ to project milepost 7.76; and
- replace an existing 8-inch mainline valve with a 20-inch valve.

The FERC staff mailed copies of the EA to federal, state, and local government representatives and agencies; elected officials; Native American tribes; potentially affected landowners and other interested individuals and groups; and newspapers and libraries in the project area. In addition, the EA is available for public viewing on the FERC’s website (www.ferc.gov) using the eLibrary link. A limited number of copies of the EA are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference Room, 888 First Street NE, Room 2A, Washington, DC 20426, (202) 502–8371.

Any person wishing to comment on the EA may do so. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. The more specific your comments, the more useful they will be. To ensure that the Commission has the opportunity to consider your comments prior to making its decision on this project, it is important that we receive your comments in Washington, DC on or before March 13, 2018.

For your convenience, there are three methods you can use to file your comments to the Commission. In all instances, please reference the project docket number (CP17–441–000 and
