SUPPLEMENTARY INFORMATION:

I. Background

This public meeting is intended to support FDA guidance development as required under section 3021 of the Cures Act. Section 3021 of the Cures Act directs FDA to develop a guidance document to address several areas related to CID, including the use of complex innovative clinical trial designs, ways sponsors may obtain feedback on technical issues related to simulations, the submission of resulting information, the types of quantitative information that should be submitted for review, and recommended analysis methodologies. Before issuing the guidance, FDA is required to conduct a public meeting to gather input from the wider community of stakeholders, including academic and medical researchers, expert practitioners, drug developers, and other interested persons.

The public meeting is also intended to meet a performance goal FDA agreed to under FDARA, in accordance with the PDUFA Reauthorization Performance Goals and Procedures Fiscal Years 2018 Through 2022 letter (PDUFA VI letter), which is available at <https://www.fda.gov/downloads/ForIndustry/UserFees/PrescriptionDrugUserFee/UCM511438.pdf>. Specifically, Section J.4 of the PDUFA VI letter, “Enhancing Capacity to Review Complex Innovative Designs,” (<https://www.fda.gov/downloads/ForIndustry/UserFees/PrescriptionDrugUserFee/UCM511438.pdf>) outlines commitments, including a public workshop to discuss various CIDs and a CID pilot program. The meeting will focus on clinical trial designs for which simulations are necessary to evaluate the operating characteristics of the trial and the acceptability of those designs in regulatory decision making.

II. Topics for Discussion at the Public Meeting

The purpose of this public meeting is to (1) facilitate discussion and information sharing about the use of CID in drug development and regulatory decision making and (2) obtain input from stakeholders about the CID pilot program.

The meeting will consist of four sessions. The sessions will focus on (1) complex adaptive designs; (2) other

innovative designs such as use of external/historical control subjects, Bayesian designs, and master protocols; (3) clinical trial simulations for confirmatory trial design and planning; and (4) the CID pilot program. Following each session there will be an opportunity for public comment.

After this public meeting, FDA will consider the stakeholder input from the meeting and the public docket, launch the pilot program by the end of fiscal year 2018, and publish a draft guidance within 18 months of the meeting.

Meeting updates, the agenda, and background materials (if any) will be made available at: <https://www.fda.gov/Drugs/NewsEvents/ucm587344.htm> prior to the workshop.
