

Needs and Uses: This request is for extension of a currently approved information collection.

When creating a Request to Archive oceanographic data or information at the United States (U.S.) National Centers for Environmental Information (NCEI), well-organized and complete metadata describing those data are needed for long term understanding and use of those data. The Send2NCEI web application provides a web-based form for easily collecting required and optional descriptive metadata to describe oceanographic data in a way that supports Executive Order 12906 and structures those metadata to conform to the internationally used ISO 19115 Geospatial Metadata suite of standards. Descriptive metadata informs the suitability of data for use by future data users and should provide critical context about how data were collected, what techniques and measurements were made, and data quality characterizations. Information about the data provider or other individuals is only used by NCEI to contact the data provider with questions about submitted data, about the status of the data in the archival process, and to provide appropriate scientific recognition and attribution for submitted data. Send2NCEI will be used by earth, ocean, and atmospheric scientists and their data managers.

Affected Public: Not for profit institutions; state, local or tribal governments; business or other for-profit organizations.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved information collection.

The purpose of this information collection is to obtain information from individuals in the seven United States (U.S.) jurisdictions containing coral reefs. Specifically, NOAA is seeking information on the knowledge, attitudes and reef use patterns, as well as information on knowledge and attitudes related to specific reef protection activities. In addition, this survey will provide for the ongoing collection of social and economic data related to the communities affected by coral reef conservation programs.

The Coral Reef Conservation Program (CRCP), developed under the authority of the Coral Reef Conservation Act of 2000, is responsible for programs intended to enhance the conservation of coral reefs. We intend to use the information collected through this instrument for research purposes as well as measuring and improving the results of our reef protection programs. Because many of our efforts to protect reefs rely on education and changing attitudes toward reef protection, the information collected will allow CRCP staff to ensure programs are designed appropriately at the start, future program evaluation efforts are as successful as possible, and outreach efforts are targeting the intended recipients with useful information.

II. Method of Collection

Information will be collected in the means most efficient and effective in the individual jurisdiction. For the three years covered by this clearance we expect to use face-to-face interviews in American Samoa, and as appropriate, face-to-face, telephone and/or internet-based survey techniques in Hawaii and Florida, Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, and the U.S. Virgin Islands.
