

NMFS has determined that the Cape Cod/Gulf of Maine and Southern New England/Mid-Atlantic stocks of yellowtail flounder and Gulf of Maine Atlantic cod are still subject to overfishing and overfished. These determinations are based on the most recent stock assessments, completed in 2017, using data through 2016, which indicate that biomass remains below targets and fishing mortality remains above thresholds. The 2017 assessment provided no accepted models and no qualitative information to recommend stock status for Georges Bank yellowtail flounder and Georges Bank cod. Thus, status for these stocks continues to be listed as subject to overfishing and overfished, based on the last accepted assessment conducted in 2013. These assessments continue status determinations made previously and NMFS has informed the New England Council that it must take action to end overfishing and rebuild these stocks.

Dated: February 28, 2018.

Acting Director, Office of Sustainable Fisheries Service, National Marine Fisheries Service.
