

emissions factor for flares at natural gas production sites is somehow flawed or outdated and, thus, warrants revision. Therefore, our review did not result in a revision to this VOC emissions factor.

While we have not revised the existing VOC emissions factor, we did use the available THC emissions data for enclosed ground flares to develop six new THC emissions factors for enclosed ground flares. The six emissions factors are finalized as an update to Section 13.5 of AP-42, *Compilation of Air Pollutant Emission Factors*. AP-42 is the primary compilation of EPA's emissions factor information. We have also clarified the heating value basis for the emissions factors in AP-42 Tables 13.5-1 through 13.5-3 in order to allow users to generate more accurate emissions estimates and clarified that the emissions factors in the tables represent the emissions at the exit of a flare, not the uncontrolled VOC or THC emissions routed to the flare.

The final actions described above were issued on February 5, 2018. Our review and analysis of the data are documented in a report titled "Review and Analysis of Emissions Test Reports for Purposes of Reviewing the Natural Gas Production Flares Volatile Organic Compounds Emissions Factor Under Clean Air Act Section 130." Prior to taking final action, the EPA issued a proposal on its AP-42 website on June 5, 2017, and solicited comment on the proposal. The EPA responded to the comments received during the public comment period in a memorandum titled "Summary of EPA Responses to Public Comments Received on the Proposed Emissions Factors for Enclosed Ground Flares at Natural Gas Production Sites and Chemical Manufacturing Processes." These documents, along with a link to the updated section in AP-42, were posted on the website listed in the **ADDRESSES** section of this notice on February 5, 2018.

These actions constitute final agency action of national applicability for purposes of section 307(b)(1) of the CAA. Pursuant to CAA section 307(b)(1), judicial review of these final agency actions may be sought only in the United States Court of Appeals for the District of Columbia Circuit. Petitions for review must be filed by May 4, 2018. Judicial review of these final agency actions may not be obtained in subsequent proceedings, pursuant to CAA section 307(b)(2). These actions are not a rulemaking and are not subject to the various statutory and other provisions applicable to a rulemaking.

Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: This notice announces the collection of information related to the U.S. EPA National Environmental Information Exchange Network (NEIEN) Grant Program. EPA proposes to collect information from the NEIEN grantees on assistance agreements EPA has awarded. Specifically, for each project, EPA proposes to have grantees submit semi-annual reports on the progress and current status of each goal and output, completion dates for outputs, and any problems encountered. This information will help EPA ensure projects are on schedule to meet their goals and produce high quality environmental outputs. New award recipients will complete one Quality Assurance

Reporting Form for each award. This form provides a simple means for grant recipients to describe how quality will be addressed throughout their projects. Additionally, the Quality Assurance Reporting Form is derived from guidelines provided in the NEIEN 2018 Grant Solicitation Notice.

Form Numbers: EPA Form 5300–26 (Semi-Annual Progress Report Form) and EPA Form 5300–27 (Quality Assurance Reporting Form).

Respondents/affected entities: State, tribal, and territorial environmental government offices.

Respondent's obligation to respond: Mandatory (2 CFR part 200 and 2 CFR part 1500).

Estimated number of respondents: 172 (total).

Frequency of response: Twice per year for the Semi-Annual Progress Report Form; one time per grant for the Quality Assurance Reporting Form.

Total estimated burden: 340 hours (per year). Burden is defined at 5 CFR 1320.03(b) hours (per year). Burden is defined at 5 CFR 1320.03(b)

Total estimated cost: \$11,215 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in estimates: There is decrease of 3 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to a decrease in the number of grants that are awarded annually.

Dated: February 27, 2018.

Charles Freeman,

Acting Director, Information Exchange Services Division.
