Once submitted, comments cannot be edited or removed from Regulations.gov. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (i.e., on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit http://www2.epa.gov/dockets/commenting-epa-dockets.

SUPPLEMENTARY INFORMATION:

I. Background

On October 27, 2016, the EPA published in the Federal Register the “Release of Final Control Techniques Guidelines for the Oil and Natural Gas Industry.” 81 FR 74798. The CTG provided information to state, local, and tribal air agencies to assist them in determining reasonably available control technology (RACT) for VOC emissions from select oil and natural gas industry emission sources. Section 182(b)(2)(A) of the Clean Air Act (CAA) requires that for ozone NA areas classified as Moderate, states must revise their SIPs to include provisions to implement RACT for each category of VOC sources covered by a CTG document issued between November 15, 1990, and the date of attainment. CAA section 182(c) through (e) extends this requirement to states with ozone NA areas classified as Serious, Severe, and Extreme. CAA section 184(b) further extends this requirement to states in the OTR. §

Section 182(b)(2) of the CAA requires that a CTG document issued between November 15, 1990, and the date of attainment include the date by which states must submit their SIP revisions. In the final action issuing the CTG, the EPA established a SIP submission deadline of October 27, 2018, for addressing sources covered by the CTG. 81 FR 74799. According to the CTG implementation memo issued on October 20, 2016, “[t]he emissions controls determined by the state to be RACT for sources covered by the Oil and Gas CTG must be implemented as soon as practicable, but in no case later than January 1, 2021.” §

This implementation period includes the 2-year period between the publication of the CTG in the Federal Register and the SIP submission date of October 27, 2018. Because the October 27, 2018, deadline is not imminent, no state has an impending RACT SIP deadline associated with the CTG.

The CTG relied upon underlying data and conclusions from the 2016 NSPS, as well as the final rule titled “Oil and Natural Gas Sector: New Source Performance Standards and National Emission Standards for Hazardous Air Pollutants Reviews,” published in the Federal Register on August 16, 2012 (2012 NSPS). 77 FR 49490. The RACT recommendations for VOC emission reductions contained in the final CTG were based on a review of the 2012 NSPS and the 2016 NSPS. 81 FR 74799. In the final CTG, the EPA states, “[s]everal of the technical support documents (TSDs) prepared in support of the NSPS actions for the oil and natural gas industry include data and analyses considered in developing RACT recommendations in this CTG.” §

RACT recommendations for storage vessels, compressors, pneumatic controllers, and equipment leaks from natural gas processing plants were based on the 2012 NSPS TSDs, and RACT recommendations for pneumatic pumps and fugitive emissions from well sites and compressor stations were based on the 2016 NSPS TSDs. It should be noted that facilities throughout the oil and natural gas sector (e.g., well sites,
compressor stations, and natural gas processing plants) may contain certain sources subject to the 2012 NSPS and other sources subject to the 2016 NSPS. On April 18, 2017, the EPA announced in a letter that it was convening a proceeding for reconsideration of certain core provisions of the 2016 NSPS, and on June 5, 2017, EPA granted reconsideration in regard to additional provisions of the 2016 NSPS. Pursuant to those actions, EPA is currently looking broadly at the 2016 NSPS. 82 FR 25730.

II. Discussion

The EPA is seeking comment on a proposed withdrawal of the CTG. If finalized, the withdrawal would remove the mandatory RACT review requirement for affected sources in ozone NA areas classified as Moderate or higher and states in the OTR. The withdrawal would not impact oil and natural gas industry sources otherwise covered by the major source thresholds for RACT review (100 tons per year (tpy) for Moderate areas, 50 tpy for Serious areas, 25 tpy for Severe areas, and 10 tpy for Extreme areas). The EPA notes that unless and until EPA decides to withdraw the CTG, states remain obligated to revise their SIPs to address RACT requirements for oil and gas sources in ozone NA areas classified as Moderate or higher and the states in the OTR. Moreover, withdrawal of the CTG will not hinder states from establishing, where desired or otherwise required, emissions standards for sources in the oil and natural gas industry, including standards based on the recommendations contained in the withdrawn CTG. Having said that, the withdrawal of the CTG will relieve state, local, and tribal air agencies of the requirement to address RACT for non-major sources in this sector (and the associated need to consider the recommendations in the CTG for the time being).

The EPA notes that after it issued the 2016 NSPS, it exercised its discretion to issue the CTG to inform air agencies of “determinations as to what constitutes RACT for VOC for those oil and natural gas industry emission sources in their particular areas.” 81 FR 74799. The EPA emphasized that the information contained in the CTG was “provided only as guidance.” Id. The guidance did not “change, or substitute for, requirements specified in applicable sections of the CAA or the EPA’s regulations; nor is it a regulation itself.” Id. The RACT recommendations in the CTG posed no “legally binding requirements on any entity.” Id. It only provided “recommendations for air agencies to consider in determining RACT.” Id. The CTG noted that the recommendations were based on “data and information currently available to the EPA.” Id.

In the final CTG, EPA provided an estimate of the costs potentially associated with the CTG. With this action, the EPA has adjusted the analysis of costs and emission reductions associated with the final CTG to reflect state rules that have been finalized since the CTG was released, to adjust compliance costs from 2012S to 2016S, as well as to estimate present values (PV) and equivalent annualized values (EAV) of avoided costs. The EPA estimates these avoided costs under two analytical perspectives, one where all states fully adopt RACT under the CTG, but would avoid any controls in the absence of the CTG, and another that focuses on net changes across all industries and reflects the assumption that sources in Moderate or higher NA areas might need to incur costs to obtain emission reductions under SIPs.

Under the analytical perspective that assumes all states fully adopt RACT under the CTG, but would avoid any controls in the absence of the CTG, the avoided costs of withdrawing the CTG are reflected in the total avoided costs of the updated analysis. Under this perspective, the PV of avoided costs over 2021 through 2035 is estimated to be $599 million assuming a 3-percent discount rate and $439 million assuming a 7-percent discount rate. The EAV from this perspective is approximately $49 million per year and $45 million per year assuming 3-percent and 7-percent discount rates, respectively. Under the analytic perspective that focuses on net changes across all industries, which reflects that sources in Moderate or higher NA areas might need to incur costs to obtain emission reductions under SIPs in the scenario the CTG is withdrawn, the avoided costs are reflected in the estimates of avoided costs in the OTR. Under this perspective, the PV of avoided costs over 2021 through 2035 is estimated to be $14 million assuming a 3-percent discount rate and $16 million assuming a 7-percent discount rate. The EAV from this perspective is approximately $1.2 million per year and $1.6 million per year assuming 3-percent and 7-percent discount rates, respectively.

For the reasons outlined above, the EPA believes it is prudent to withdraw the CTG in its entirety. The EPA is seeking comment on a potential withdrawal of the CTG.

5 The RACT requirements for major sources are independent of CTG-based RACT requirements, and are defined in CAA sections 182(b)(2), 182(c), 182(d), 182(e), and 184(b)(2).

6 The RACT requirements for major sources are independent of CTG-based RACT requirements, and are defined in CAA sections 182(b)(2), 182(c), 182(d), 182(e), and 184(b)(2).

**SUPPLEMENTARY INFORMATION:**

**I. Background**

Title XI of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989, as amended (Title XI), established the ASC. The purpose of Title XI is “to provide that Federal financial and public policy interests in real estate related transactions will be protected by requiring that real estate appraisals utilized in connection with federally related transactions are performed in writing, in accordance with uniform standards, by individuals whose competency has been demonstrated and whose professional conduct will be subject to effective supervision.”

Title XI requires the use of State licensed or certified appraisers in federally related transactions. Section 1119(b) of Title XI, 12 U.S.C. 3348(b), authorizes the ASC to waive, on a temporary basis and with approval of the FFIEC, any certification or licensing requirement relative to certifying or licensing individuals to perform appraisals under Title XI in a State or geographic political subdivisions of a State upon a written determination that there is a scarcity of certified or licensed appraisers to perform appraisals in connection with federally related transactions leading to significant delays in the performance of such appraisals. The ASC has issued procedures governing the processing of temporary waiver requests. After receiving a waiver request, the ASC is required to issue a public notice in the Federal Register requesting comment on the request for a proposed temporary waiver. Within 15 days of the close of the 30-day comment period, the ASC, by order, will grant or deny a waiver, in whole or in part, and upon specified terms or conditions, including provisions for waiver termination. If the ASC approves any or all of the request, it is subject to approval by the FFIEC. The ASC’s order granting or denying the

[Docket No. AS18–03]

Appraisal Subcommittee; Notice of Received Request for a Temporary Waiver

**AGENCY:** Appraisal Subcommittee of the Federal Financial Institutions Examination Council, FFIEC.

**ACTION:** Notice of received request for a temporary waiver; request for comments.

**SUMMARY:** The Appraisal Subcommittee (ASC) of the Federal Financial Institutions Examination Council (FFIEC) has received a request for a temporary waiver of appraiser certification or licensing requirements pursuant to the Financial Institutions Reform, Recovery, and Enforcement Act, and the rules promulgated thereunder. The ASC is requesting comment (including written data, views and arguments) on the received request.

**DATES:** Comments must be received on or before April 9, 2018.

**ADDRESSES:** Commenters are encouraged to submit comments (including written data, views and arguments) by the Federal eRulemaking Portal or email, if possible. You may submit comments, identified by Docket Number AS18–03, by any of the following methods:
