Office of Procurement and Property Management

Title: Guidelines for Designating Biobased Products for Federal Procurement.

OMB Control Number: 0503-0011.

Summary of Collection: Section 9002 of the Farm Security and Rural Investment Act (FSRIA) of 2002, as amended by the Food, Conservation, and Energy Act (FCEA) of 2008, and the Agricultural Act of 2014 [7 U.S.C. 8102] provides for a preferred procurement program under which Federal agencies are required to purchase biobased products, with certain exceptions. Product categories (which are generic groupings of products) are designated by rulemaking for preferred procurement. To qualify product categories for procurement under this program, the statute requires that the Secretary of Agriculture consider information on the availability of biobased products, the economic and technological feasibility of using such products and the costs of using such products. In addition, the Secretary is required to provide information on designated product categories to Federal agencies about the availability, price, performance, and environmental and public health benefits of such product categories, and where appropriate shall recommend the level of biobased material to be contained in the procured product.

Need and Use of the Information: The Office of Procurement and Property Management (OPPM) and its contractors will interact with manufacturers and vendors to gather such information and material for testing, as may be required for designation of products categories for preferred procurement by Federal agencies. The information collected will continue to be gathered using a variety of methods, including face to face visits with a manufacturer or vendor, submission by manufacturers and vendors of information electronically to OPPM, and survey instruments filled out by manufacturers and vendors and submitted to OPPM.
