

revision also adds paragraph 4 which states: “For purposes of enforcement for a specific source, the test methods specified in these regulations, in the approved SIP, or in a permit issued pursuant to these regulations shall be used to be consistent with state regulations.” EPA is proposing to approve these revisions because they are consistent with the definition of VOC at 40 CFR 51.100(s) and with other similar SIP-approved regulations.

Finally, the SIP revision adds paragraph 5 which states: “The following compound(s) are VOC for purposes of all recordkeeping, emissions reporting, photochemical dispersion modeling and inventory requirements which apply to VOC and shall be uniquely identified in emission reports, but are not VOC for purposes of VOC emissions limitations or VOC content requirements: t-butyl acetate.” Through this revision, Hamilton County is also adding t-butyl acetate to the list of negligibly reactive compounds, but maintaining the requirements of recordkeeping, emissions reporting, and inventory. EPA is proposing to approve this revision because it is consistent with the definition of VOC at 40 CFR 51.100(s).^{3 4}

Pursuant to CAA section 110(l), the Administrator shall not approve a revision of a plan if the revision would interfere with any applicable requirement concerning attainment and reasonable further progress (as defined in CAA section 171), or any other applicable requirement of the Act. The State’s addition of the County’s exemptions from the definition of VOC, addition of recordkeeping, emissions reporting, photochemical dispersion modeling, and inventory requirements for t-butyl acetate, and other changes in paragraphs 3 and 4 to Chapter 4 of Part II, Section 4–2, of the Chattanooga Code “Definitions” are approvable under section 110(l) because they reflect changes to federal regulations based on findings that the aforementioned compounds are negligibly reactive and

make a negligible contribution to troposphere ozone formation.

III. Incorporation by Reference

In this rule, EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is proposing to incorporate by reference Chapter 4 of Part II, Section 4–2, “Definitions” effective August 16, 1995, which revised the definition of VOC. EPA has made, and will continue to make, these materials generally available through www.regulations.gov and at the EPA Region 4 Office (please contact the person identified in the “For Further Information Contact” section of this preamble for more information).

IV. Proposed Action

Pursuant to section 110 of the CAA, EPA is proposing to approve the aforementioned changes to Tennessee’s SIP for Chapter 4 of Part II, Section 4–2. EPA has evaluated the relevant portions of Tennessee’s June 25, 2008, SIP revision and has determined that it meets the applicable requirements of the CAA and EPA regulations and is consistent with EPA policy.

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. See 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA’s role is to approve state choices, provided that they meet the criteria of the CAA. This action merely proposes to approve state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866.
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: February 20, 2018.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 81

[EPA–R04–OAR–2018–0017; FRL–9975–52–Region 4]

Air Plan Approval and Air Quality Designation; SC; Redesignation of the Greenville-Spartanburg Unclassifiable Area

AGENCY: Environmental Protection Agency.

³ In EPA’s November 29, 2004, final rulemaking, the Agency added tertiary butyl acetate to the list of excluded compounds from the definition of VOCs. See 69 FR 69298.

⁴ While EPA added t-butyl acetate to the list of negligibly reactive compounds in the November 29, 2004, final rulemaking, t-butyl acetate continued to be a VOC for purposes of all recordkeeping, emissions reporting, and inventory requirements which applied to VOC. See 69 FR 69298. Subsequently, on February 25, 2016 (81 FR 9339), EPA issued a final rule removing recordkeeping, emissions reporting, and inventory requirements for t-Butyl acetate. Although EPA no longer requires recordkeeping, emissions reporting, and inventory requirements for t-butyl acetate, this SIP revision includes this requirement.

ACTION: Proposed rule.

SUMMARY: On January 22, 2018, the State of South Carolina, through the Department of Health and Environmental Control (DHEC), submitted a request for the Environmental Protection Agency (EPA) to redesignate the Greenville-Spartanburg, South Carolina fine particulate matter (PM_{2.5}) unclassifiable area (hereinafter referred to as the “Greenville Area” or “Area”) to unclassifiable/attainment for the 1997 primary and secondary annual PM_{2.5} national ambient air quality standards (NAAQS). The Greenville Area is comprised of Anderson, Greenville, and Spartanburg Counties in South Carolina. EPA now has sufficient data to determine that the Greenville Area is in attainment of the 1997 primary and secondary annual PM_{2.5} NAAQS. Therefore, EPA is proposing to approve the State’s request and redesignate the Area to unclassifiable/attainment for the 1997 primary and secondary annual PM_{2.5} NAAQS based upon valid, quality-assured, and certified ambient air monitoring data showing that the PM_{2.5} monitors in the Area are in compliance with the 1997 primary and secondary annual PM_{2.5} NAAQS.

DATES: Comments must be received on or before April 12, 2018.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R04–OAR–2018–0017 at <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

Implementation Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. Ms. Sanchez can be reached by telephone at (404) 562–9644 or via electronic mail at sanchez.madolyn@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Background

The Clean Air Act (CAA or Act) establishes a process for air quality management through the establishment and implementation of the NAAQS. After the promulgation of a new or revised NAAQS, EPA is required to designate areas, pursuant to section 107(d)(1) of the CAA, as attainment, nonattainment, or unclassifiable. On July 18, 1997 (62 FR 38652), EPA revised the NAAQS for particulate matter to add new standards for PM_{2.5} (annual and 24-hour). The primary and secondary annual standards were each set at a level of 15.0 micrograms per cubic meter (µg/m³), based on a 3-year average of annual mean PM_{2.5} concentrations. The primary and secondary 24-hour standards were each set at a level of 65 µg/m³, based on a 3-year average of the 98th percentile of 24-hour concentrations. EPA established the standards based on significant evidence and numerous health studies demonstrating that serious health effects are associated with exposures to particulate matter.

The process for designating areas following promulgation of a new or revised NAAQS is contained in section 107(d)(1) of the CAA. EPA and state air quality agencies initiated the monitoring process for the 1997 PM_{2.5} NAAQS in 1999, and deployed all air quality monitors by January 2001. On January 5, 2005 (70 FR 944), EPA designated areas across the country as nonattainment, unclassifiable, or unclassifiable/attainment¹ for the PM_{2.5} NAAQS based upon air quality monitoring data from these monitors for calendar years 2001–2003.

¹ For the initial PM area designations in 2005 (for the 1997 annual PM_{2.5} NAAQS), EPA used a designation category of “unclassifiable/attainment” for areas that had monitors showing attainment of the standard and were not contributing to nearby violations and for areas that did not have monitors but for which EPA had reason to believe were likely attaining the standard and not contributing to nearby violations. EPA used the category “unclassifiable” for areas in which EPA could not determine, based upon available information, whether or not the NAAQS was being met and/or EPA had not determined the area to be contributing to nearby violations. EPA reserves the “attainment” category for when EPA redesignates a nonattainment area that has attained the relevant NAAQS and has an approved maintenance plan.

Greenville County, South Carolina, had a monitor with less than three years of data since the monitor had not been in operation for the full 2001–2003 period. Based upon the data that was obtained during its operation, the monitor indicated a potential to violate the 1997 annual PM_{2.5} NAAQS. Also, Anderson and Spartanburg Counties had emissions and population levels that potentially contributed to the elevated concentrations of PM_{2.5} at the Greenville monitor in question. Therefore, EPA designated all three counties—Anderson, Greenville and Spartanburg—as unclassifiable for the 1997 annual PM_{2.5} NAAQS.

II. What are the criteria for redesignating an area from unclassifiable to unclassifiable/attainment?

Section 107(d)(3) of the CAA provides the framework for changing the area designations for any NAAQS pollutants. Section 107(d)(3)(A) provides that the Administrator may notify the Governor of any state that the designation of an area should be revised “on the basis of air quality data, planning and control considerations, or any other air quality-related considerations the Administrator deems appropriate.” The Act further provides in section 107(d)(3)(D) that even if the Administrator has not notified a state Governor that a designation should be revised, the Governor of any state may, on the Governor’s own motion, submit a request to revise the designation of any area, and the Administrator must approve or deny the request.

When approving or denying a request to redesignate an area, EPA bases its decision on the air quality data for the area as well as the considerations provided under section 107(d)(3)(A).² In keeping with section 107(d)(1)(A), areas that are redesignated to unclassifiable/attainment must meet the requirements for attainment areas and thus must meet the relevant NAAQS. In addition, the area must not contribute to ambient air quality in a nearby area that does not meet the NAAQS. The relevant monitoring data must be collected and quality-assured in accordance with 40 CFR part 58 and recorded in the EPA Air Quality System (AQS) database. The designated monitors generally should have remained at the same location for the duration of the monitoring period

² While CAA section 107(d)(3)(E) also list specific requirements for redesignations, those requirements only apply to redesignations of nonattainment areas to attainment and therefore are not applicable in the context of a redesignation of an area from unclassifiable to unclassifiable/attainment.

upon which the redesignation request is based.³

III. What is EPA’s rationale for proposing to redesignate the Area?

In order to redesignate the Area from unclassifiable to unclassifiable/attainment for the 1997 primary and secondary annual PM_{2.5} NAAQS, the 3-year average of annual arithmetic mean concentrations (*i.e.*, design value) over

the most recent 3-year period must be less than or equal to 15.0 µg/m³ at all monitoring sites in the Area over the full 3-year period, as determined in accordance with 40 CFR 50.18 and Appendix N of Part 50. EPA reviewed PM_{2.5} monitoring data from monitoring stations in the Greenville Area for the 1997 primary and secondary annual PM_{2.5} NAAQS for the 3-year period from

2014–2016. These data have been quality-assured, certified, and recorded in AQS by South Carolina, and the monitoring locations have not changed during the monitoring period. As summarized in Table 1, the design values for the monitors in the Area for the 2014–2016 period are well below the 1997 primary and secondary annual PM_{2.5} NAAQS.

TABLE 1—1997 ANNUAL PM_{2.5} DESIGN VALUES FOR MONITORS IN THE GREENVILLE AREA FOR 2014–2016

Local site name	Monitoring site	2014–2016 Design value (µg/m ³)
Greenville ESC	45–045–0015	9.3
Hillcrest Middle School	45–045–0016	8.6
T.K. Gregg	45–083–0011	8.7

Because the 3-year design values, based on valid, quality-assured data, demonstrate that the Area meets the 1997 primary and secondary annual PM_{2.5} standards, EPA is proposing to redesignate the Greenville Area from unclassifiable to unclassifiable/attainment for this NAAQS.

IV. Proposed Action

EPA is proposing to approve South Carolina’s January 22, 2018, request to redesignate the Greenville Area from unclassifiable to unclassifiable/attainment for the 1997 primary and secondary annual PM_{2.5} NAAQS. If finalized, approval of the redesignation request would change the legal designation, found at 40 CFR part 81, of Anderson, Greenville, and Spartanburg Counties from unclassifiable to unclassifiable/attainment for the 1997 primary and secondary annual PM_{2.5} NAAQS.

V. Statutory and Executive Order Reviews

Under the CAA, redesignation of an area to unclassifiable/attainment is an action that affects the status of a geographical area and does not impose any additional regulatory requirements on sources beyond those imposed by state law. A redesignation to unclassifiable/attainment does not in and of itself create any new requirements. Accordingly, this proposed action merely proposes to redesignate an area to unclassifiable/attainment and does not impose additional requirements. For that reason, this proposed action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because redesignations are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Will not have disproportionate human health or environmental effects

under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this proposed action to redesignate the Greenville Area from unclassifiable to unclassifiable/attainment for the 1997 primary and secondary annual PM_{2.5} NAAQS does not have Tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). The Catawba Indian Nation Reservation is located within the State of South Carolina. Pursuant to the Catawba Indian Claims Settlement Act, S.C. Code Ann. 27–16–120, “all state and local environmental laws and regulations apply to the Catawba Indian Nation and Reservation and are fully enforceable by all relevant state and local agencies and authorities.” However, because no tribal lands are located within the Area and the redesignation does not create new requirements, EPA has determined that this proposed rule does not have substantial direct effects on an Indian Tribe. EPA notes this proposed action will not impose substantial direct costs on Tribal governments or preempt Tribal law.
