[Project No. 14868-000]

Pioneer Valley Renewables; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On February 13, 2018, Pioneer Valley Renewables, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Scotlandville Bend Project (Scotlandville Project or project) to be located on the Mississippi River, in West Baton Rouge and East Baton Rouge Parishes, Louisiana. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) Four underwater, carbon fiber shroud and blade design turbine-generating units, each with a diameter of 18 meters and a cross section of 4 meters; (2) each pair of units will be mounted on a riverbed secured piling, 30 meters apart; (3) flexible cables would convey power to a metering station; and (4) a transmission line would interconnect with the power grid. Each unit would have an installed capacity of 1.5 megawatts for a total generating capacity of 6 megawatts. The proposed project would have an estimated average annual generation of 40,000 megawatt-hours, which would be sold.
