DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[DOcket ID FEMA–2018–0017]

Assistance to Firefighters Grant Program; Fire Prevention and Safety Grants

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice of guidance.

SUMMARY: This Notice provides guidelines that describe the application process for grants and the criteria the Federal Emergency Management Agency (FEMA) will use for awarding Fire Prevention and Safety (FP&S) grants in the Fiscal Year (FY) 2017 Assistance to Firefighters Grant (AFG) Program. It explains the differences, if any, between these guidelines and those recommended by representatives of the Nation’s fire service leadership during the annual Criteria Development meeting, which was held February 28—March 3, 2017. The application period for the FY 2017 FP&S Grant Program year will be February 12, 2018—March 16, 2018, and will be announced on the AFG website (www.fema.gov/firegrants), www.grants.gov, and the U.S. Fire Administration website (www.usfa.fema.gov). The applications that are determined most likely to enable improvement in firefighter safety, health, or wellness will be reviewed first by a panel of fire service members to identify those applications most relevant to the fire service. The following evaluation criteria will be used for this review:

1. Activities designed to reach high-risk target groups and mitigate the incidence of death, injuries, and property damage caused by fire and fire-related hazards (“FP&S Activity”).

2. Projects aimed at improving firefighter safety, health, or wellness through research and development that reduces firefighter fatalities and injuries (“R&D Activity”).

The purpose of the FP&S Program is to reduce fire and fire-related injuries and prevent deaths among the public and firefighters by assisting fire prevention programs and supporting firefighter health and safety research and development. The FEMA Grant Programs Directorate administers the FP&S Grant Program as part of the AFG Program.

FP&S Grants are offered to support projects in two activities:

1. Activities designed to reach high-risk target groups and mitigate the incidence of death, injuries, and property damage caused by fire and fire-related hazards (“FP&S Activity”).

2. Projects aimed at improving firefighter safety, health, or wellness through research and development that reduces firefighter fatalities and injuries (“R&D Activity”).

The grant program’s authorizing statute requires that DHS publish in the Federal Register each year the guidelines that describe the application process and the criteria for grant awards. Approximately 1,000 applications for FP&S Grant Program funding are anticipated to be submitted electronically, using the application submission form and process available at the AFG e-Grant application portal (https://portal.fema.gov). Specific information about the submission of grant applications can be found in the FY 2017 Fire Prevention and Safety Program Notice of Funding Opportunity (NOFO), which will be available for download at www.fema.gov/firegrants and at www.regulations.gov under Docket ID: FEMA–2018–0017.

Appropriations

Congress appropriated $345,000,000 for AFG in FY 2017 pursuant to the Department of Homeland Security Appropriations Act, 2017, Public Law 115–31. From this amount, $345,000,000 will be made available for FP&S Grant awards, pursuant to 15 U.S.C. 2229(h)(5), which states that not less than 10 percent of available grant funds each year are awarded under the FP&S Grant Program. Funds appropriated for all FY 2017 AFG awards, pursuant to Public Law 115–31, will be available for obligation and award until September 30, 2018.

From the approximately 1,000 applications that will be requesting assistance, FEMA anticipates that it will award approximately 150 FP&S Grants from available grant funding.

Background of the AFG Program

DHS awards grants on a competitive basis to applicants that best address the FP&S Grant Program’s priorities and provide the most compelling justification. Applications that best address the Program’s priorities will be reviewed by a panel composed of fire service personnel.

Award Criteria

All applications for grants will be prepared and submitted through the AFG e-Grant application portal (https://portal.fema.gov). The FP&S Grant Program panels will review the applications and score them using the following criteria areas:

- Financial Need
- Vulnerability Statement
- Implementation Plan
- Evaluation Plan
- Cost-Benefit
- Funding Priorities

The applications submitted under the R&D Activity will be reviewed first by a panel of fire service members to identify those applications most relevant to the fire service. The following evaluation criteria will be used for this review:

- Purpose
- Potential Impact
- Implementation by the Fire Service
- Partners
- Barriers

The applications that are determined most likely to enable improvement in firefighter safety, health, or wellness will be deemed to be in the “competitive range” and forwarded to the second level of application review, which is the scientific panel review process. This panel will be comprised of scientists and technology experts who have expertise pertaining to the subject matter of the proposal.

The Scientific Technical Evaluation Panel for the R&D Activity will review the application and evaluate it using the following criteria:

- Project goals, objectives, and specific aims
- Literature Review
- Project Methods
- Project Measurements
- Project Analysis
- Dissemination and Implementation
- Cost vs. Benefit (additional consideration)
- Financial Need (additional consideration)
- Mentoring (additional consideration for Early Career Investigator Projects only)
Eligible Applicants

Under the FY 2017 FP&S Grant Program, eligible applicants are limited to those entities described below within each activity:

1. Fire Prevention and Safety (FP&S) Activity: Eligible applicants for this activity include fire departments; and national, regional, State, local, federally recognized tribal, and nonprofit organizations that are recognized for their experience and expertise in fire prevention and safety programs and activities. Both private and public non-profit organizations are eligible to apply for funding in this activity. For-profit organizations, Federal agencies, and individuals are not eligible to receive a FP&S Grant Award under the FP&S Activity.

2. Firefighter Safety Research and Development (R&D) Activity: Eligible applicants for this activity include national, State, local, federally recognized tribal, and nonprofit organizations, such as academic (e.g., universities), public health, occupational health, and injury prevention institutions. Both private and public non-profit organizations are eligible to apply for funding in this activity.

The aforementioned entities are encouraged to apply, especially those that are recognized for their experience and expertise in firefighter safety, health, and wellness research and development activities. Fire departments are not eligible to apply for funding in the R&D activity. Additionally, for-profit organizations, Federal agencies, and individuals are not eligible to receive a grant award under the R&D Activity.

Funding Limitations

Awards are limited to a maximum federal share of $1.5 million dollars, regardless of applicant type, in accordance with 15 U.S.C. 2229(d)(2). FP&S Research and Development applicants applying under the Early Career Investigator category are limited to a maximum federal share of $75,000 per project year.

Cost Sharing

Grant recipients must share in the costs of the projects funded under this grant program as required by 15 U.S.C. 2229(k)(1) and in accordance with 2 CFR 200.101(b)(1), but they are not required to have the cost-share at the time of application nor at the time of award. However, before a grant is awarded, FEMA must contact potential awardees to determine whether the grant recipient has the funding in hand or whether the grant recipient has a viable plan to obtain the funding necessary to fulfill the cost-sharing requirement.

In general, an eligible applicant seeking an FP&S grant to carry out an activity shall agree to make available non-Federal funds to carry out such activity in an amount equal to, and not less than, 5 percent of the grant awarded. Cash match and in-kind matches are both allowable in the FP&S Grant Program. Cash (hard) matches include non-Federal cash spent for project-related costs. In-kind (soft) matches include, but are not limited to, the valuation of in-kind services; complementary activities; and provision of staff, facilities, services, material, or equipment. In-kind is the value of something received or provided that does not have a cost associated with it. For example, where an in-kind match (other than cash payments) is permitted, then the value of those services could be used to comply with the match requirement. Also, third party in-kind contributions may count toward satisfying match requirements provided the grant recipient receiving the contributions expends them as allowable costs in compliance with provisions listed above.

Grant recipients under this program must also agree to a maintenance of effort requirement per 15 U.S.C. 2229(k)(3) (referred to as a “maintenance of expenditure” requirement in that statute). Per this requirement, a grant recipient shall agree to maintain during the term of the grant, the grant recipient’s aggregate expenditures relating to the activities allowable under the FP&S NOFO at not less than 80 percent of the average amount of such expenditures in the 2 fiscal years preceding the fiscal year in which the grant amounts are received.

In cases of demonstrated economic hardship and upon the request of the grant recipient, the FEMA Administrator may waive or reduce certain grant recipient’s cost share or maintenance of expenditure requirements (15 U.S.C. 2229(k)(4)(A)). As required by 15 U.S.C. 2229(k)(4)(B), the Administrator established guidelines for determining what constitutes economic hardship and published these guidelines at FEMA’s website www.fema.gov/grants. Per 15 U.S.C. 2229(k)(4)(C), FP&S nonprofit organization grant recipients that are not fire departments or emergency medical services organizations are not eligible to receive a waiver of their cost share or economic hardship requirements.

System for Award Management (SAM)

Per 2 CFR 25.200, all grant applicants and recipients are required to register in https://SAM.gov, which is available free of charge. They must maintain validated information in SAM that is consistent with the data provided in their AFG grant application and in the Dun & Bradstreet (DUNS) database. FEMA will not accept any application, process any awards, consider any payment or amendment requests, or consider any amendment unless the applicant or grant recipient has complied with the requirements to provide a valid DUNS number and an active SAM registration with current information. The banking information, employer identification number (EIN), organization/entity name, address, and DUNS number provided in the application must match the information that is provided in SAM.

Application Process

Applicants may only submit one application, but may submit for up to three projects under each activity (FP&S and R&D). Any applicant that submits more than one application may have all applications deemed ineligible. Under the FP&S Activity, applicants may apply under the following categories:

• Community Risk Reduction
• Fire & Arson Investigation
• Code Enforcement/Awareness
• National/State/Regional Programs and Studies

Under the R&D Activity, applicants may apply under the following categories:

• Clinical Studies
• Technology and Product Development
• Database System Development
• Dissemination and Implementation Research
• Preliminary Studies
• Early Career Investigator

Prior to the start of the FY 2017 FP&S Grant Program application period, FEMA provided applicants with technical assistance tools (available at the AFG website: www.fema.gov/firegrants) and other online information to help them prepare quality grant applications. AFG will also staff a Help Desk throughout the application period to assist applicants with navigation through the automated application as well as assistance with related questions. Applicants can reach the AFG Help Desk through a toll-free telephone number (1–866–274–0960) or email (firegrants@fema.dhs.gov).

Applicants are advised to access the application electronically at https://portal.fema.gov. The application also is accessible from the Grants.gov website.
for the Nation’s fire service, and in particular for firefighter safety. In November 2015, the NFFF hosted its third working group to update the agenda with current priorities. A copy of the research agenda is available on the NFFF website at http://www.everyonegoeshome.com/resources/research-symposium-reports/.

All proposed projects, regardless of whether they have been identified by this working group, will be evaluated on their relevance to firefighter health and safety, and scientific rigor.

The electronic application process will permit the applicant to enter and save the application data. The system does not permit the submission of incomplete applications. Except for the narrative textboxes, the application will use a “point-and-click” selection process or require the entry of data (e.g., name and address). Applicants are encouraged to read the FP&S NOFO for more details.

Criteria Development Process

Each year, DHS convenes a panel of fire service professionals to develop the funding priorities and other implementation criteria for AFG. The Criteria Development Panel is composed of representatives from nine major fire service organizations that are charged with making recommendations to FEMA regarding the creation of new funding priorities, the modification of existing funding priorities, and the development of criteria for awarding grants. The nine major fire service organizations represented on the panel:

- Congressional Fire Services Institute (CFSI)
- International Association of Arson Investigators (IAAI)
- International Association of Fire Chiefs (IAFC)
- International Association of Fire Fighters (IAFF)
- International Society of Fire Service Instructors (ISFSI)
- National Association of State Fire Marshals (NASFM)
- National Fire Protection Association (NFPA)
- National Volunteer Fire Council (NVFC)
- North American Fire Training Directors (NAFTD)

The FY 2017 criteria development panel meeting occurred February 28–March 3, 2017. The content of the FY 2017 FP&S Notice of Funding Opportunity reflects the implementation of the Criteria Development Panel’s recommendations with respect to the priorities, direction, and criteria for awards. All of the funding priorities for the FY 2017 FP&S Grant Program are designed to address the following:

- First responder safety
- Enhancing national capabilities
- Risk
- Interoperability

Changes for FY 2017

FY 2017 FP&S Notice of Funding Opportunity Announcement

(1) Under the Fire Prevention and Safety Activity, a new priority has been added under the Community Risk Reduction Category to add community-appropriate comprehensive risk assessments and risk reduction planning.

(2) Under the Fire Prevention and Safety Activity, clarification has been provided to the Code Enforcement/Awareness Priority to ensure inclusion of Wildland Urban Interface (WUI) codes for communities with a WUI-wildfire risk.

(3) Under the Research and Development Activity, a new category has been added for Early Career Investigator projects.

(4) Under the Research and Development Activity, special emphasis topics have been added.

Application Review Process and Considerations

The program’s authorizing statute requires that each year DHS publish in the Federal Register a description of the grant application process and the criteria for grant awards. This information is provided below.

DHS will review and evaluate all FP&S applications submitted using the funding priorities and evaluation criteria described in this document, which are based on recommendations from the AFG Criteria Development Panel.

Peer Review Process

Peer Review Panel Process—Fire Prevention and Safety Activity

All FP&S activity applications will be evaluated by a peer review process. A panel of peer reviewers is composed of fire service representatives recommended by the Criteria Development Panel. These reviewers will assess each application’s merits with respect to the detail provided in the Narrative Statement on the activity, including the evaluation elements listed in the Evaluation Criteria identified below. The panel will independently score each project within the application, discuss the merits and/or shortcomings of the application, and document the findings. A consensus is not required.
Peer Review Panel Process—Research and Development Activity

R&D applications will go through a two-phase review process. First, all applications will be reviewed by a panel of fire service experts to assess the need for the research results and the likelihood that the results would be implemented by the fire service in the United States. Applications that are deemed likely to be implemented to enable improvement in firefighter safety, health, or wellness will be deemed to be in the “competitive range” and will be forwarded to the second level of project review, which is the science review panel process. This panel will be composed of scientists and technology experts who have expertise pertaining to the subject matter of the proposal.

Scientific reviewers will independently score applications in the competitive range and, if necessary, discuss the merits or shortcomings of the project in order to reconcile any major discrepancies identified by the reviewers. A consensus is not required.

Technical Evaluation Process

The highest ranked projects from both Activities will be deemed in the fundable range. Applications that are in the fundable range will undergo a Technical Review by the FEMA Program Office prior to being recommended for award. The FEMA Program Office will assess the request with respect to costs, quantities, feasibility, eligibility, and recipient responsibility prior to recommending any application for award.

Once the review process is complete, each project’s score will be determined and a final ranking of project applications will be created. FEMA will award grants based on this final ranking. Award announcements will be made on a rolling basis until all available grant funds have been committed. Awards will not be made in any specified order. DHS will notify unsuccessful applicants as soon as it is feasible.

Evaluation Criteria for Projects—Fire Prevention and Safety Activity

Funding decisions will be informed by an assessment of how well the application addresses the criteria and considerations listed below. Applications will be reviewed by the peer reviewers using weighted evaluation criteria to score the project. These scores will impact the ranking of a project for funding.

The relative weight of the evaluation criteria in the determination of the grant award is listed below.

- **Financial Need (10%)**: Applicants should provide details on the need for financial assistance to carry out the proposed project(s). Included in the description might be other unsuccessful attempts to acquire financial assistance or specific examples of the applicant’s operational budget.
- **Vulnerability Statement (25%)**: The assessment of fire risk is essential in the development of an effective project goal, as well as meeting FEMA’s goal to reduce risk by conducting a risk assessment as a basis for action. Vulnerability is a “weak link” demonstrating high risk behavior, living conditions or any type of high risk situation or behavior. The Vulnerability Statement should include a description of the steps taken to determine the vulnerability (weak link) and identify the target audience. The methodology for determination of vulnerability (i.e., how the weak link was found) should be discussed in-depth in the application’s narrative Statement.
- The specific vulnerability (weak link) that will be addressed with the proposed project can be established through a formal or informal risk assessment. FEMA encourages the use of local statistics, rather than national statistics, when discussing the vulnerability.
- The applicant should summarize the vulnerability (weakness) the project will address in a clear, to-the-point statement that addresses who is at risk, what the risks are, where the risks are, and how the risks can be prevented.
- For the purpose of the FY 2017 FP&S NOFO, formal risk assessments consist of the use of software programs or recognized expert analysis that assess risk trends.
- Informal risk assessments could include an in-house review of available data (e.g., tional Fire Incident Reporting System) to determine fire loss, burn injuries or loss of life over a period of time, and the factors that are the cause and origin for each occurrence.
- **Implementation Plan (25%)**: Projects should provide details on the implementation plan, discussing the proposed project’s goals and objectives. The following information should be included to support the implementation plan:
  - Goals and objectives.
  - Details regarding the methods and specific steps that will be used to achieve the goals and objectives.
  - Timelines outlining the chronological project steps.
- Where applicable, examples of marketing efforts to promote the project, which will deliver the project (e.g., effective partnerships), and the manner in which materials or deliverables will be distributed.
- Requests for props (i.e., tools used in educational or awareness demonstrations), including specific goals, measurable results, and details on the frequency for which the prop will be utilized as part of the implementation plan. Applicants should include information describing the efforts that will be used to reach the high risk audience and/or the number of people reached through the proposed project.
- **Evaluation Plan (25%)**: Projects should include an evaluation of effectiveness and should identify measurable goals. Applicants seeking to carry out awareness and educational projects, for example, should identify how they intend to determine that there has been an increase in knowledge about fire hazards, or measure a change in the safety behaviors of the audience. Applicants should demonstrate how they will measure risk at the outset of the project in comparison to how much the risk decreased after the project is finished. There are various ways to measure the knowledge gained including the use of surveys, pre- and post-tests, or documented observations.
- **Cost-Benefit (10%)**: Projects will be evaluated based on how well the applicant addresses the fire prevention needs of the department or organization in an economical and efficient manner. The applicant should show how it will maximize the level of funding that goes directly into the delivery of the project.
- The costs associated with the project must also be reasonable for the target audience that will be reached, and a description of how the anticipated benefit(s) of their projects outweighs the cost(s) of the requested item(s) should be included. The application should provide justification for all costs included in the project in order to assist the FEMA Program Office with the Technical Evaluation Panel review.
- **Funding Priorities (5%)**: Applicants will be evaluated on whether the proposed project meets the stated funding priority (listed below) for the applicable category.
  - **Community Risk Reduction Priority**: Comprehensive home fire safety campaign with door-to-door smoke alarm installations and/or sprinkler awareness and/or community risk assessments.
  - **Fire/Arson Investigation Priority**: Projects that aim to aggressively investigate every fire.
  - **Code Enforcement/Awareness Priority**: Projects that focus on first time or reinstatement of code adoption and code enforcement, including Wildland
Urban Interface (WUI) codes for communities with a WUI-wildfire risk.

National/State/Regional Programs and Studies Priority: Projects that focus on residential fire issues, and/or firefighter safety projects or strategies that are designed to measurably change firefighter behavior and decision-making.

- Meeting the needs of people with disabilities (additional consideration): Applicants in the Community Risk Reduction category will receive additional consideration if, as part of their comprehensive smoke alarm installation and education program, they address the needs of people with disabilities (e.g., deaf/hard-of-hearing) in their community.
- Experience and Expertise (additional consideration): Applicants that demonstrate their experience and ability to conduct fire prevention and safety activities, and to execute the proposed or similar project(s), will receive additional consideration.

Evaluation Criteria—Firefighter Safety Research and Development Activity

Funding decisions will be informed by an assessment of how well the application addresses the criteria and considerations listed below. All applications will be reviewed by a fire service expert panel using weighted evaluation criteria, and those projects deemed to be in the “competitive range” will then be reviewed by a scientific peer review panel using weighted evaluation criteria to score the project. Scientific evaluations will impact the ranking of the project for funding.

Fire Service Evaluation Criteria:
- Purpose (25%): Applicants should clearly identify the benefits of the proposed research project to improve firefighter safety, health, or wellness, and identify specific gaps in knowledge that will be addressed.
- Implementation by Fire Service (25%): Applicants should discuss how the outcomes/products of this research, if successful, are likely to be widely/nationally adopted and accepted by the fire service as changes that enhance firefighter safety, health, or wellness.
- Potential Impact (15%): Applicants should discuss the potential impact of the research outcome/product on firefighter safety by quantifying the possible reduction in the number of fatal or non-fatal injuries, or on the projected wellness by significantly improving the overall health of firefighters.
- Barriers (15%): The applicant needs to identify and discuss potential fire service and other barriers to successfully complete the study on schedule, including contingencies and strategies to deal with barriers if they materialize. This may include barriers that could inhibit the proposed fire service participation in the study or the adoption of successful results by the fire service when the project is completed.
- Partners (20%): Applicants should recognize that participation of the fire service as a partner in the research, from development to dissemination, is regarded as an essential part of all projects. Applicants should describe the fire service partners and contractors that will support the project to accomplish the objectives of the study. The specific roles and contributions of the partners should be described. Partnerships may be formed with local and regional fire departments, and also with national fire-related organizations. Letters of support and letters of commitment to actively participate in the project should be included in the appendix of the application. Generally, participants of a diverse population, including both career and volunteer firefighters, are expected to facilitate acceptance of results nationally. In cases where this is not practical, due to the nature of the study or other limitations, these circumstances should clearly be explained.

Science Panel Evaluation Criteria:
- Project goals, objectives, and specific aims (15%): Applicants should address how the purpose, goals, objectives, and aims of the proposal will lead to results that will improve firefighter safety, health, or wellness. For multi-year projects, greater detail should be given for the first year. For project measurements (20%):
- Literature Review (10%): Applicants should provide a literature review that is relevant to the project’s goals, objectives, and specific aims. The citations should be placed in the text of the narrative statement, with references listed at the end of the Narrative Statement (and not in the Appendix) of the application. The review should be in sufficient depth to make it clear that the proposed project is necessary, adds to an existing body of knowledge, is different from current and previous studies, and offers a unique contribution.

- Project Methods (20%): Applicants should provide a description of how the project will be carried out, including demonstration of the overall scientific and technical rigor and merit of the project. This includes the operations to accomplish the purpose, goals and objectives, and the specific aims of the project. Please describe the human participants for research, where applicable, should be described. Where human participants are involved in the project, the applicant should describe plans for submission to the Institutional Review Board (for further guidance and requirements, see page 23 of the FY 2017 FP&S NOFO.
- Project Measurements (20%): Applicants should provide evidence of the technical rigor and merit of the project, such as data pertaining to validity, reliability, and sensitivity (where established) of the facilities, equipment, instruments, standards, and procedures that will be used to carry out the research. The applicant should discuss the data to be collected to evaluate the performance methods, technologies, and products proposed to enhance firefighter safety, health, or wellness. The applicant should demonstrate that the measurement methods and equipment selected for use are appropriate and sufficient to successfully deliver the proposed project objectives.
- Project Analysis (20%): The applicant should indicate the planned approach for analysis of the data obtained from measurements, questionnaires, or computations. The applicant should specify within the plan what will be analyzed, the statistical methods that will be used, the sequence of steps, and interactions as appropriate. It should be clear that the Principal Investigator and research team have the expertise to perform the planned analysis and defend the results in a peer review process.

- Dissemination and Implementation (15%): Applicants should indicate dissemination plans for scientific audiences (such as plans for submissions to specific peer review publications) and for firefighter audiences (such as websites, magazines, and conferences). Also, assuming positive results, the applicant should indicate future steps that would support dissemination and implementation throughout the fire service, where applicable. These steps are likely to be beyond the current study, so those features of the research activity that will facilitate future dissemination and implementation should be discussed. All applicants should specify how the results of the project, if successful, might be disseminated and implemented in the fire service to improve firefighter safety, health, or wellness. It is expected that successful R&D Activity Projects may give rise to future programs including FP&S Activity Projects.

- Cost vs. Benefit (additional consideration): Cost vs. benefit in this evaluation element refers to the costs of the grant for the research and
development project as it relates to the benefits that are projected for firefighters who would have improved safety, health, or wellness. Applicants should demonstrate a high benefit for the cost incurred, and effective utilization of Federal funds for research activities.

- **Financial Need (additional consideration):** In the Applicant Information section of the application, applicants should provide details on the need for Federal financial assistance to carry out the proposed project(s). Applicants may include a description of unsuccessful attempts to acquire financial assistance. Applicants should provide detail about the organization’s operating budget, including a high-level breakdown of the budget; describe the department’s inability to address financial needs without Federal assistance; and discuss other actions the department has taken to meet their staffing needs (e.g., State assistance programs, other grant programs, etc.).

- **Mentoring (additional consideration for Early Career Investigator Projects only):** An important part of Early Career Investigator projects is the integration of mentoring for the principal investigator by experienced researchers in areas appropriate to the research project, including exposure to the fire service community as well as support for ongoing development of knowledge and skills. Mentoring is regarded as critical to the research skills development of early career principal investigators. As part of the application Appendix, the applicant should identify the mentor(s) who have agreed to support the applicant and the expected benefit of their interactions with the researcher. A biographical sketch and letter of support from the mentor(s) are encouraged and should be included in the Appendix materials.

**Other Selection Information**

Awards will be made using the results of peer-reviewed applications as the primary basis for decisions, regardless of activity. However, there are some exceptions to strictly using the peer review results. The applicant’s prior AFG, SAFER, and FP&S grant management performance will also be taken into consideration when making recommendations for award. All final funding determinations will be made by the FEMA Administrator, or the Administrator’s designee.

Fire departments and other eligible applicants that have received funding under the FP&S Grant Program in previous years are eligible to apply for funding in the current year. However, DHS may take into account an applicant’s performance on prior grants when making funding decisions on current applications.

Once every application in the competitive range has been through the technical evaluation phase, the applications will be ranked according to the average score awarded by the panel. The ranking will be summarized in a Technical Report prepared by the AFG Program Office. A Grants Management Specialist will contact the applicant to discuss and/or negotiate the content of the application and SAM.gov registration before making final award decisions.

**Authority:** 15 U.S.C. 2229.

**Dated:** March 9, 2018.

Brock Long,

Administrator, Federal Emergency Management Agency.

**BILLING CODE 9111–64–P**

## DEPARTMENT OF HOMELAND SECURITY

[DHS Docket No. ICEB–2013–0001]

**RIN 1653–ZA13**

**Extension of Employment Authorization for Syrian F–1 Nonimmigrant Students Experiencing Severe Economic Hardship as a Direct Result of Civil Unrest in Syria Since March 2011**

**AGENCY:** U.S. Immigration and Customs Enforcement (ICE), DHS.

**ACTION:** Notice.

**SUMMARY:** This notice informs the public of the extension of an earlier notice, which suspended certain requirements for F–1 nonimmigrant students whose country of citizenship is Syria and who are experiencing severe economic hardship as a direct result of the civil unrest in Syria since March 2011. This notice extends the effective date of that notice. The extension of the suspension applies to such students whose country of citizenship is Syria and who lawfully obtained F–1 nonimmigrant student status by September 9, 2016.

**DATES:** This notice is effective March 15, 2018 and will remain in effect until September 30, 2019.

**FOR FURTHER INFORMATION CONTACT:** Rachel Canty, Director, Student and Exchange Visitor Program, MS 5600, U.S. Immigration and Customs Enforcement, 500 12th Street SW, Washington, DC 20536–5600; email: sevp@ice.dhs.gov; telephone: (703) 603–3400. This is not a toll-free number. Program information can be found at http://www.ice.gov/sevis/.

**SUPPLEMENTARY INFORMATION:**

What action is the Department of Homeland Security (DHS) taking under this notice?

The Secretary of Homeland Security is exercising her authority under 8 CFR 214.2(f)(9) to extend the suspension of the applicability of certain requirements governing on-campus and off-campus employment for F–1 nonimmigrant students whose country of citizenship is Syria, who are lawfully present in the United States in F–1 nonimmigrant student status, obtained F–1 nonimmigrant status by September 9, 2016, and who are experiencing severe economic hardship as a direct result of the civil unrest in Syria since March 2011. See 77 FR 20038 (April 3, 2012); 81 FR 62520 (September 9, 2016). The original notice was effective from April 3, 2012 until October 3, 2013. A subsequent notice provided for an 18-month extension from October 3, 2013, through March 31, 2015. See 78 FR 36211 (June 17, 2013). A third notice provided another 18-month extension from March 31, 2015, through September 30, 2016. See 80 FR 232 (January 5, 2015). A fourth notice provided another 18-month extension from September 30, 2016, through March 31, 2018, and expanded the applicability of such suspension to Syrian F–1 students who lawfully obtained F–1 nonimmigrant student status between April 3, 2012 and September 9, 2016. See 81 FR 62520 (September 9, 2016). Effective with this publication, suspension of the employment limitations is extended for 18 months from March 31, 2018 until September 30, 2019.

F–1 nonimmigrant students granted employment authorization through the notice will continue to be deemed to be engaged in a “full course of study” for the duration of their employment authorization, provided they satisfy the minimum course load requirement described in 77 FR 20038. See 8 CFR 214.2(f)(6)(i)(F).

Who is covered under this action?

This notice applies exclusively to F–1 nonimmigrant students whose country of citizenship is Syria and who were lawfully present in the United States in F–1 nonimmigrant status under section 101(a)(15)(F)(i) of the Immigration and Nationality Act (INA), 8 U.S.C. 1101(a)(15)(F)(i), on September 9, 2016, and are—

1. Enrolled in an institution that is Student and Exchange Visitor Program (SEVP)-certified for enrollment of F–1 students,
