Title: Crash Risk Associated with Drug and Alcohol Use by Drivers in Fatal and Serious Injury Crashes.

Form No.: NHTSA Form 1420, 1421, 1422.

Type of Review: Regular.

Respondents: Participants will include seriously or fatally injured crash-involved drivers ($n = 2,500$) and matched non-crash-involved drivers ($n = 5,000$). Crash-involved drivers will include seriously injured drivers who are transported to a trauma center by emergency medical services and fatally injured drivers who are transported directly to the medical examiner's office. Sampling will occur at three trauma centers and within the roadway catchment area served by the trauma center(s). Non-crash-involved drivers will be matched to injured drivers on crash day of the week, crash time of day, and crash direction of travel.

Estimated Time per Participant:

Surveys will be administered to control participants. Questions will be on demographics, trip information, and opinions about driving while using alcohol and or drugs. Control participants will also be asked to provide a preliminary breath test (PBT) sample, and a blood sample.

For control subjects, the total estimated time is approximately 5 minutes to complete the recruiting and consent process, 5 minutes to complete the survey, and 10 minutes to provide PBT and blood samples (20 minutes total). The time to decline participation would take approximately 1 minute to listen to the researcher describe the study. A person may drive away if not interested in participating.

For crash-involved drivers who survived, it will take less than one minute for obtaining the blood sample, and 4 minutes to review the study's description—and if not interested in participating—to complete the "opt-out" form (5 minutes total).

For crash-involved drivers who died, it will take less than one minute to obtain the blood sample. There will be no burden to the deceased person or to the public.

Total Estimated Annual Burden Hours: 965.5 hours per year; for a total of 1,931 hours across two years.

Frequency of Collection: Each participant will only respond to the survey and/or blood sample requests a single time during the study period.
