Proposed Project

National Vital Statistics Report Forms (OMB Control Number 0920–0213, expires 04/30/2018)—Revision—National Center for Health Statistics (NCHS, Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The compilation of national vital statistics dates back to the beginning of the 20th century and has been conducted since 1960 by the Division of Vital Statistics of the National Center for Health Statistics, CDC. The collection of the data is authorized by 42 U.S.C. 242k. This submission requests approval to collect the monthly and annually summary statistics for three years.

The Monthly Vital Statistics Report forms provide counts of monthly

occurrences of births, deaths, and infant deaths. Similar data have been published since 1937 and are the sole source of these data at the National level. The data are used by the Department of Health and Human Services and by other government, academic, and private research and commercial organizations in tracking changes in trends of vital events. Respondents for the Monthly Vital Statistics Reports Form are registration officials in each State and Territory, the District of Columbia, and New York City. This form is also designed to collect counts of monthly occurrences of births, deaths, and infant deaths immediately following the month of occurrence.

The Annual Vital Statistics Occurrence Report Form collects final annual counts of marriages and divorces by month for each State and Territory,

the District of Columbia, and New York City as well as 33 counties in New Mexico. These final counts are usually available from State or county officials about eight months after the end of the data year. The data are widely used by government, academic, private research, and commercial organizations in tracking changes in trends of family formation and dissolution.

This submission contains no changes to the actual data collection forms. However, the respondent numbers for the monthly and annual forms have shifted from 91 and 58 respectively to 58 and 91, since the 33 New Mexico Counties only send marriage and divorce information that is now only captured in the annual report. Consequently, the total burden has been reduced from 175 hours to 139 hours.

There are no costs to respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
State, Territory, and other officials	Monthly Vital Statistics Report	58	12	8/60
State, Territory, and New Mexico County Officials.	Annual Vital Statistics Occurrence Report	91	1	30/60

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled Workplace Violence Prevention Programs in NJ Healthcare Facilities (0920–0914, Expiration 3/31/2018) to the Office of Management and Budget (OMB) for review and approval. CDC previously published a “Proposed Data Collection Submitted for Public Comment and Recommendations” notice on November

21, 2017 to obtain comments from the public and affected agencies. CDC received two comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology,

e.g., permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570 or send an email to omb@cdc.gov. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Workplace Violence Prevention Programs in NJ Healthcare Facilities (0920–0914, Expiration 3/31/2018)—Extension—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The National Institute for Occupational Safety and Health (NIOSH) is requesting an extension to complete 20 nursing home interviews for 0920–0914.

Healthcare workers are nearly five times more likely to be victims of violence than workers in all industries combined.

While healthcare workers are not at particularly high risk for job-related homicide, nearly 60% of all nonfatal assaults occurring in private industry are experienced in healthcare. Six states have enacted laws to reduce violence against healthcare workers by requiring workplace violence prevention programs.

However, little is understood about how effective these laws are in reducing violence against healthcare workers.

The long-term goal of the proposed project is to reduce violence against healthcare workers. The objective of the proposed study is: (1) To examine

nursing home compliance with the New Jersey Violence Prevention in Health Care Facilities Act, and (2) to evaluate the effectiveness of the regulations in this Act in reducing assault injuries to nursing home workers. Our central hypothesis is that nursing homes with high compliance with the regulations will have lower rates of employee violence-related injury. NIOSH received OMB approval (0920–0914) to evaluate the legislation at 50 hospitals and at 40 nursing homes, to conduct a nurse survey and to conduct a home healthcare aide survey. Data collection is complete for the hospitals, the nurse survey, and the home healthcare aide survey. We have completed 20 out of 40 nursing home interviews. We still have

20 nursing home interviews to complete.

CDC will conduct face-to-face interviews with the Chairs of the Violence Prevention Committees in 20 nursing homes (10 in New Jersey and 10 in Virginia) who are in charge of overseeing compliance efforts. The purpose of the interviews is to measure compliance to the state regulations: Violence prevention policies, reporting systems for violent events, violence prevention committee, written violence prevention plan, violence risk assessments, post incident response and violence prevention training. A contractor will conduct the interviews.

There are no costs to respondents other than their time. The total estimated burden hours are 40.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
Nursing Home Administrators	Interview	20	1	1
Nursing Home Administrators	Abstraction	20	1	1

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled Healthy Homes and Lead Poisoning Surveillance System (HHLPPS) to the Office of Management and Budget (OMB) for review and approval. CDC previously published a “Proposed Data Collection Submitted for Public Comment and Recommendations” notice on [November 8, 2017] to obtain comments from the public and affected agencies. CDC did not receive comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570 or send an email to *omb@cdc.gov*. Direct written comments and/or suggestions regarding the items contained in this

notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Healthy Homes and Lead Poisoning Surveillance System (HHLPPS) (OMB Control Number 0920–0931, expires 05/31/2018)—Extension—National Center for Environmental Health (NCEH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The overarching goal of HHLPPS is to support healthy homes surveillance activities at the state and national levels. CDC seeks to request an OMB approval to extend the project for 18-months for up to 40 state and local Healthy Homes Childhood Lead Poisoning Prevention Programs (CLPPP) and the state-based Adult Blood Lead Epidemiology and Surveillance (ABLES) programs. The state programs will report information (e.g., presence of lead paint, age of housing, occupation of adults and type of housing) to the CDC under a one-year cost extension of the FY14 Funding Opportunity Announcement (FOA No. CDC–RFA–14–1408) titled “(PPHF) Childhood Lead Poisoning Prevention.” The 18-month extension will allow CDC to collect data for the third year
