

the pool allowing for more recreational opportunities. The release schedule would be modified to create a more nature flow regime below the Dam. 15.4 feet of the existing unclaimed water conservation pool storage would be reallocated to the flood control pool.

E. Original Operation Plan—Under this alternative, USACE–SPL would drop the target water surface elevation to the original elevation listed in the 1973 Water Control Manual. The release schedule would be returned to the release schedule from the 1973 Water Control Manual.

3. Scoping. Scoping is the NEPA process utilized for seeking public involvement in determining the range of alternatives and significant issues to be addressed in the EIS. USACE–SPL invites full public participation to promote open communication on the issues surrounding the proposed action. The public will be involved in the scoping and evaluation process through advertisements, notices, and other means. Project information will also be available on USACE–SPL's website at <http://www.spl.usace.army.mil/>. All individuals, NGOs, affected Indian Tribes, and local, state, and Federal agencies that have an interest are urged to participate in the scoping process. Public scoping meetings will be held to present information to the public and to receive comments from the public. The meetings will be held in Lake Havasu and Phoenix. The date, time and exact location are to be determined. Notice of the public scoping meetings will be posted on the Los Angeles District Public Notice web page: <http://www.spl.usace.army.mil/Media/Public-Notices/>. Comments will also be accepted via email (AlamoDamSPL@usace.army.mil) or postal mail (Los Angeles District, U.S. Army Corps of Engineers, ATTN: CESPL–AMO, 915 Wilshire BLVD, Suite 930, Los Angeles, CA 90017). In addition to the two proposed public scoping meetings, the USACE–SPL scoping process for this action will include potential additional public scoping meeting(s) and workshop(s) (exact number TBD) with affected Federal, state, and local agencies.

Public Scoping Meeting: The date, time and exact location are to be determined. Notice of the public scoping meetings will be posted on the Los Angeles District Public Notice web page: <http://www.spl.usace.army.mil/Media/Public-Notices/>.

4. Potentially Significant Issues. The EIS will analyze the potential impacts on the human and natural environment resulting from the project. The scoping, public involvement, and interagency

coordination processes will help identify and define the range of potential significant issues that will be considered. Important resources and issues evaluated in the EIS could include, but are not limited to, the direct, indirect, and cumulative effects on fish and wildlife, recreation, land use, hydrology and hydraulics, property values, and induced flooding. USACE–SPL will also consider issues identified and comments made throughout scoping, public involvement, and interagency coordination. USACE–SPL expects to better define the issues of concern and the methods that will be used to evaluate those issues through the scoping process.

5. Environmental Consultation and Review. USACE–SPL is requesting that the U.S. Fish and Wildlife Service, U.S. Bureau of Recreation, U.S. Bureau of Land Management, Arizona Department of Game and Fish, and the Arizona State Park Department act as cooperating agencies on this EIS. In addition to the federal interests noted above for general development of the EIS, USFWS will assist in documenting existing conditions and assessing effects of project alternatives through the Fish and Wildlife Coordination Act consultation procedures. Consultation will be completed with USFWS concerning threatened and endangered species and their critical habitat per the Endangered Species Act.

6. The USACE–SPL will consult with the Arizona State Historic Preservation Officer (SHPO) and the appropriate Tribal Historic Preservation Officers (THPO), per the National Historic Preservation Act.

7. Availability. The DEIS is presently scheduled to be available for public review and comment by: May 2019. All comments received throughout the review process will become part of the administrative record for the proposed project and subject to public release.

Dated: March 20, 2018.
