**ACTION:** Notice of receipt of permit application; request for comments.

**SUMMARY:** We, the U.S. Fish and Wildlife Service, invite the public to comment on an application for a permit to conduct activities intended to enhance the propagation or survival of an endangered species. With some exceptions, the Endangered Species Act (ESA) prohibits activities that constitute take of listed species unless a Federal permit is issued that allows such activity. The ESA also requires that we invite public comment before issuing these permits.

**SUPPLEMENTARY INFORMATION:** We, the U.S. Fish and Wildlife Service, invite the public to comment on an application for a permit to conduct activities intended to promote recovery of a species that is listed as endangered under the Endangered Species Act (16 U.S.C. 1531 et seq.; ESA). The ESA and our implementing regulations in part 17 of title 50 of the Code of Federal Regulations (CFR) provide for the issuance of such permits and require that we invite public comment before issuing permits for activities involving endangered species.

**Background**

The ESA prohibits certain activities with endangered and threatened species unless authorized by a Federal permit. A recovery permit issued by us under section 10(a)(1)(A) of the ESA authorizes the permittee to conduct activities with endangered species for scientific purposes that promote recovery or for enhancement of propagation or survival of the species. Our regulations implementing section 10(a)(1)(A) for these permits are found at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for

endangered plant species, and 50 CFR 17.72 for threatened plant species.

**Permit Application Available for Review and Comment**

We invite local, State, and Federal agencies, Tribes, and the public to comment on the following application:

**Permit Application Number TE59243C-0**

*Applicant:* Revive and Restore, Sausalito, CA.

The applicant requests a permit to conduct "Phase 1" of a multi-phase process to generate disease-resistant black-footed ferrets (*Mustela nigripes*). This phase would involve research in laboratories located in North Rose, NY, and San Diego, CA. The studies aim to develop, test, and optimize model cisgenic and novel disease-resistance pathways in the black-footed ferret, both *in vitro* and *in vivo*, leveraging domestic ferret resources for comparative genomics, comparative proteomics, and interspecies somatic cell nuclear transfer (iSCNT) reproductive techniques for the purpose of enhancing the species' survival.

Integration of genetically modified black-footed ferrets into wild populations would require careful execution and constitutes "Phase 2" of the long-term program.
