

Form Numbers: Agent Notice of Delegation #5900–172, Certificate of Representation #7610–1, General Account Form #7610–5, Allowance Transfer Form #7610–6, Retired Unit Exemption #7610–20, Allowance Deduction #7620–4.

Respondents/affected entities: Industry respondents are stationary, fossil fuel-fired boilers and combustion turbines serving electricity generators subject to the CSAPR and Texas trading programs, as well as non-source entities voluntarily participating in allowance trading activities. Potential state respondents are states that can elect to submit state-determined allowance allocations for sources located in their states.

Respondents' obligation to respond: Industry respondents: Voluntary and mandatory (Sections 110(a) and 301(a) of the Clean Air Act). State respondents: Voluntary.

Estimated number of respondents: EPA estimates that there are 1,028 industry respondents, including 978 affected sources and 50 non-source entities participating in allowance trading activities, and 27 potential state respondents.

Frequency of response: On occasion, quarterly, and annually.

Total estimated burden: 134,423 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$18,563,878 (per year); includes \$8,207,545 annualized capital or operation & maintenance costs.

Changes in Estimates: There is decrease of 40,699 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due almost entirely to adjustments in the estimated numbers of respondents and transactions and the time required to complete certain activities. Changes in programs—*i.e.*, the removal of Texas units from two CSAPR trading programs and the start of the Texas SO₂ Trading Program—together are responsible for approximately 574 hours of the overall decrease.

Dated: April 3, 2018.

Reid P. Harvey,

Director, Clean Air Markets Division, Office of Atmospheric Programs, Office of Air and Radiation.
