**SUPPLEMENTARY INFORMATION:**

**I. Background**

FDA is announcing the availability of a guidance for industry and FDA staff entitled "Policy Clarification and Premarket Notification [510(k)] Submissions for Ultrasonic Diathermy Devices; Guidance for Industry and Food and Drug Administration Staff." Ultrasonic diathermy devices are class II medical devices regulated under 21 CFR 890.5300(a), Ultrasonic diathermy. Ultrasonic therapy devices must also comply with FDA radiation safety performance standards in 21 CFR part 1010, Performance standards for electronic products: General, and 21 CFR 1050.10, Ultrasonic therapy products. FDA recognizes that there are several IEC standards with which other countries require conformance or recognize for ultrasonic therapy products. This means that manufacturers who distribute these products in the United States and other countries might have to ensure conformance of their products to IEC standards and comply with FDA performance standards. This may cause manufacturers to duplicate their efforts.

This guidance clarifies FDA's policy related to compliance with applicable performance standards and conformance to IEC consensus standards for ultrasonic diathermy devices. If firms provide a declaration of conformity with the relevant provisions of the current FDA recognized versions of the IEC 60601–2–5 and IEC 61689 standards, FDA does not intend to consider whether firms comply with certain requirements of 21 CFR 1050.10. This guidance also provides recommendations for information to provide in 510(k) submissions for ultrasonic diathermy devices.

No comments were received on the draft guidance that was published in the August 31, 2017, **Federal Register** notice (82 FR 41417).

**II. Significance of Guidance**

This guidance is being issued consistent with FDA's good guidance

practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on policy clarification and premarket notification (510(k)) submissions for ultrasonic diathermy devices. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.

**III. Electronic Access**

Persons interested in obtaining a copy of the guidance may do so by downloading an electronic copy from the internet. A search capability for all Center for Devices and Radiological Health guidance documents is available at <https://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/GuidanceDocuments/default.htm>. This guidance document is also available at <https://www.regulations.gov>. Persons unable to download an electronic copy of "Policy Clarification and Premarket Notification [510(k)] Submissions for Ultrasonic Diathermy Devices; Guidance for Industry and Food and Drug Administration Staff" may send an email request to [CDRH-Guidance@fda.hhs.gov](mailto:CDRH-Guidance@fda.hhs.gov) to receive an electronic copy of the document. Please use the document number 1500003 to identify the guidance you are requesting.

**IV. Paperwork Reduction Act of 1995**

This guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in 21 CFR part 807, subpart E have been approved under OMB control number 0910–0120; the collections of information in 21 CFR part 801 have been approved under OMB control number 0910–0485; the collections of information in 21 CFR part 820 have been approved under OMB control number 0910–0073; and the collections of information in 21 CFR parts 1002 through 1050 are approved under OMB control number 0910–0025.
