SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the Burke Museum, University of Washington, Seattle, WA. The human remains were removed from the Aleutian Islands, AK.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by Burke Museum professional staff in consultation with representatives of the Agdaagux Tribe of King Cove; Native Village of Akutan; Native Village of Atka; Native Village of Belkofski; Native Village of False Pass; Native Village of Nelson Lagoon; Native Village of Nikolski; Native Village of Unga; Pauloff Harbor Village; Qagan Tayagungin Tribe of Sand Point Village; Qawalangin Tribe of Unalaska; and Pribilof Islands Aleut Communities of St. Paul and St. George Islands, hereafter known as "The Tribes and Native Villages of the Aleutian Islands."

History and Description of the Remains

At an unknown date prior to 1973, human remains representing, at minimum, one individual were removed from an unknown location in the Aleutian Islands, AK. The human remains were found in collections at the Burke Museum in 1973 (Burke Accn. #1973-58) in a box labeled "Aleutian

Skull, R.C. Barnard." While the label on the box indicates the contents were donated by R. C. Barnard, no donor record exists at the Burke Museum's records for that name. No known individuals were identified. No funerary objects are present.

This individual has been determined to be Native American based on geographical and biological information. Archeological and biological information suggest continuity between past populations and modern Native populations in the Aleutian Islands. The archeological record indicates over 4,500 years of cultural continuity on the Aleutian Islands with unbroken sequences in midden sites (McCartney, 1984). During the 1700s, after contact with the Russians, Unangax/Aleut populations began to decline and by the late 1700s and early 1800s most Unangax/Aleut had relocated, or been removed, to the modern Native Villages. A relationship of shared group identity can reasonably be traced between the human remains and the modern day descendants of the Unangax/Aleut, who are represented by The Tribes and Native Villages of the Aleutian Islands.

Determinations Made by the Burke Museum

Officials of the Burke Museum have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and The Tribes and Native Villages of the Aleutian Islands.

Additional Requestors and Disposition

Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Peter Lape, Burke Museum, University of Washington, Box 353010, Seattle, WA 98195, telephone (206) 685-3849 Ext 2, email plape@uw.edu, by May 21, 2018. After that date, if no additional requestors have come forward, transfer of control of the human remains to The Tribes and Native Villages of the Aleutian Islands may proceed.

The Burke Museum is responsible for notifying The Tribes and Native Villages of the Aleutian Islands that this notice has been published.

History and Description of the Remains

In 1979, human remains representing, at minimum, one individual were removed from the Schaper Site (47-LC-0039) in La Crosse County, WI. The Wisconsin Historical Society conducted investigations at the site during a highway surface survey project that was part of a Wisconsin Department of Transportation Cooperative Agreement. The WHS crew found that the highway bisected one of the site's two mounds. Eroding from the cut bank of this mound they found human remains representing one juvenile individual of indeterminate sex. No known individuals were identified. No associated funerary objects are present.

Between 1969 and 1989, human remains representing, at minimum, two individuals were removed from the Krause Site (47-LC-0041) in La Crosse County, WI. The human remains were donated by the Mississippi Valley Archaeology Center (MVAC) in 1989 to the Wisconsin Burial Sites Preservation Office. MVAC reported the human remains as being collected over several years from different locations within the site. MVAC collected human remains in 1982 and again in 1989 during surface surveys of plowed fields, and additional human remains were donated to MVAC by local landowners and collectors who had collected human remains in 1969 and 1989. Skeletal analysis in 2015 determined that the human remains represent two individuals of indeterminate age and sex. No known individuals were identified. No associated funerary objects are present.

- Pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and any present-day Indian Tribe.
