SUPPLEMENTARY INFORMATION: The purpose of the meeting is for the CPSMT to develop materials, including a proposed purpose and need statement, to assist the Council in establishing the scope for a potential action to revise the Pacific sardine live bait provisions in the Coastal Pelagic Species Fishery Management Plan, when the Pacific sardine biomass is in an overfished condition. The Council established a process that includes scoping at the June 2018 meeting, adopting a range of alternatives at the September 2018 meeting, and final action at the November 2018 meeting.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

ACTION: Notice of a public meeting.

SUMMARY: The South Atlantic Fishery Management Council (Council) will hold a meeting of its Scientific and Statistical Committee (SSC) and Socio-Economic Panel (SEP) to review the seasonal autoregressive integrated moving average (SARIMA) model proposed for use by the Southeast Regional Office (SERO) staff to conduct management analyses. SUPPLEMENTARY INFORMATION: This meeting is held to review the SARIMA model proposed for use in management

analyses by SERO staff. The SSC decided at their October 24-26, 2017 meeting in Charleston, SC that the complexity of the SARIMA model made it less favorable as a management tool. They also determined that the method using the last 3 years of fishery data was likely more representative of the current fishery than using the entire time series, as was done in the SARIMA model. However, the SEP also reviewed the SARIMA model and concluded that in principle, the SARIMA model is superior to using average catch rates from the last 3 years. The SEP's recommendation was to present both models to the Council as both have pros and cons.

Items to be addressed during this meeting

Review the proposed SARIMA model and provide comments and recommendations as necessary.
