The Department will use the information to notify an emergency contact or next-of-kin in the event of an emergency, crisis or death of the employee, or to contact individuals listed in the categories of individuals section in the event of an emergency at the location where they are assigned abroad to determine if they are safe, or to locate an individual listed in the categories of individuals section in the event of a family emergency or death. The Department of State periodically publishes in the **Federal Register** its standard routine uses that apply to all of its Privacy Act systems of records. The notices appear in the form of a Prefatory Statement (published in Volume 73, Number 136, Public Notice 6290, on July 15, 2008). All these standard routine uses apply to the Employee Contact Records, State-40.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are retrievable by individual's name, dependent name, spouse name and GEMS number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

The records retention schedules vary according to function. Some records are transitory in nature and are kept for up to 72 hours while others are kept as long as five years after the employee resigns or retires. These records will be maintained until they become inactive, at which time they will be retired or destroyed in accordance with published record schedules of the Department of State and as approved by the National Archives and Records Administration (NARA) and outlined here <https://foia.state.gov/Learn/RecordsDisposition.aspx>. Access to the Department of State, its annexes and posts abroad is controlled by security guards and admission is limited to those individuals possessing a valid identification card or individuals under proper escort. While the majority of records covered in the Employee Contact Records are electronic, all paper records containing personal information are maintained in secured file cabinets in restricted areas, access to which is limited to authorized personnel. Access to computerized files is password-protected and under the direct supervision of the system manager. The system manager has the capability of printing audit trails of access from the computer media, thereby permitting regular and ad hoc monitoring of computer usage. When it is determined that a user no longer needs access, the user account is disabled.

Before being granted access to Employee Contact Records a user must first be granted access to the Department of State computer system. Remote access to the Department of State network from non-Department owned systems is authorized only to unclassified systems and only through a Department approved access program. Remote access to the network is configured with the authentication requirements contained in the Office of Management and Budget Circular Memorandum A-130. All Department of State employees and contractors with authorized access have undergone a thorough background security investigation.

The Department of State will store records maintained in this system of records in cloud systems. All cloud systems that provide IT services and process Department of State information must be authorized to operate by the Department of State Authorizing Official and Senior Agency Official for Privacy. Only information that conforms with Department-specific definitions for FISMA low or moderate categorization are permissible for cloud usage unless specifically authorized by the Department's Cloud Computing Governance Board. Prior to operation,

all Cloud systems must comply with applicable security measures that are outlined in FISMA, FedRAMP, OMB guidance, NIST Federal Information Processing Standards (FIPS) and Special Publications, and Department of State policy and standards.
