SUPPLEMENTARY INFORMATION:

The Defense Federal Acquisition Regulation Supplement clause 252.204–7012, Safeguarding Covered Defense Information and Cyber Incident Reporting, requires contractors to provide “adequate security” for “covered defense information” that is processed, stored, or transmitted on the contractor’s internal information system or network. To provide adequate security, the contractor must, at a minimum, implement NIST SP 800–171, “Protecting Controlled Unclassified Information in Nonfederal Systems and Organizations.” NIST SP 800–171 states that in order to demonstrate implementation or planned implementation of the security requirements in NIST SP 800–171,

nonfederal organizations should describe in a System Security Plan how the specified security requirements are met, or how organizations plan to meet the requirements, and should develop plans of action that describe how any unimplemented security requirements will be met and how any planned mitigations will be implemented. NIST SP 800–171 further states that, when requested, the System Security Plan and any associated Plans of Action for any planned implementations or mitigations should be submitted to the responsible Federal agency/contracting officer to demonstrate the nonfederal organization’s implementation or planned implementation of the security requirements.

DoD developed the document “DoD Guidance for Reviewing System Security Plans and the NIST SP 800–171 Security Requirements Not Yet Implemented” to facilitate the consistent review and understanding of System Security Plans and Plans of Action, the impact that NIST SP 800–171 Security Requirements that are “not yet implemented” have on an information system, and to assist in prioritizing the implementation of security requirements not yet implemented. The document “Assessing the State of a Contractor’s Internal Information System in a Procurement Action” illustrates how “DoD Guidance for Reviewing System Security Plans and the NIST SP 800–171 Security Requirements Not Yet Implemented” may be used during a procurement for which DoD must assess the state of a contractor’s internal information system.

“DoD Guidance for Reviewing System Security Plans and the NIST SP 800–171 Security Requirements Not Yet Implemented” provides a “DoD Value” to assess the risk that a security requirement left unimplemented has on an information system, to assess the risk of a security requirement with an identified deficiency, and to address the priority for which an unimplemented requirement should be implemented. The guidance also addresses the method(s) to implement the security requirements, and, when applicable, provides clarifying information for security requirements that are frequently misunderstood.

The matrix “Assessing the State of a Contractor’s Internal Information System in a Procurement Action” is provided to illustrate how DoD may choose to assess submitted System Security Plans and Plans of Action in procurement actions that require the implementation of NIST SP 800–171.

To access the documents entitled “DoD Guidance for Reviewing System Security Plans and the NIST SP 800–171 Security Requirements Not Yet Implemented” and “Assessing the State of a Contractor’s Internal Information System in a Procurement Action,” go to the Federal eRulemaking Portal at www.regulations.gov, search for the docket “DARS–2018–0023” click “Open Docket,” and view “Supporting Documents.”

As a result of reviewing this system of records notice, the DSCA proposes to modify this system by updating the following sections: Categories of individuals, categories of records, authorities, routine uses, retention and disposal, notification procedure, record access procedures, and record source categories. This notice also reflects changes to ensure compliance with Office of Management and Budget Circular A–108.

The OSD notices for systems of records subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address in **FOR FURTHER INFORMATION CONTACT** or at the Defense Privacy and Civil Liberties Division website at <https://defense.gov/privacy>.
