

the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);

- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;

- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);

- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104-4);

- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);

- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and

- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's document in PS Docket Nos. 15-91, 15-94; DA 18-302, released on March 28, 2018. It is available on the

Commission's website at <https://www.fcc.gov>.

### Synopsis

1. By this document, DA 18–302, the Public Safety and Homeland Security Bureau (Bureau) of the Federal Communications Commission (Commission) invites interested parties to update the record on the feasibility of including multimedia content in Wireless Emergency Alert (WEA) messages.

2. Currently, the Commission's rules do not specify technical requirements for enabling multimedia content in WEA alert messages. In the 2016 *WEA Report and Order and Further Notice of Proposed Rulemaking (WEA R&O and FNPRM)*, 81 FR 78539, Nov. 8, 2016, the Commission recognized that additional standards development remains necessary. Accordingly, the Commission sought comment regarding the establishment of an appropriate regulatory framework and timeframe for incorporating multimedia capability into WEA alert messages. Numerous stakeholders responded to that request.

3. Since the release of the *WEA R&O and FNPRM*, the Commission has taken measures to strengthen WEA as a tool for emergency managers to communicate with the public. For example, the Commission revised its rules to ensure that emergency managers can geographically target alerts to only those phones located in areas affected by an emergency. When the WEA program launched in 2012, Participating Commercial Mobile Service (CMS) Providers were generally required to send alerts to a geographic area no larger than the county or counties affected by the emergency situation. As of November 1, 2017, all Participating CMS Providers must transmit alerts to a geographic area that “best approximates” the area affected by the emergency situation, and by November 30, 2019, all Participating CMS Providers must match the target area of the alert. In addition to improving the accuracy with which WEA messages must be geo-targeted, the Commission has taken action to improve emergency managers' ability to deliver more effective content in WEA messages. For example, as of November 1, 2017, nationwide Participating CMS Providers must support the inclusion of embedded references (*i.e.*, URLs and phone numbers) in WEA messages. By May 1, 2019, Participating CMS Providers also must support longer WEA alerts (with the maximum Alert Message length increasing from 90 to 360 characters for 4G LTE and future networks) and the transmission of Spanish-language alert

messages. Also as of May 1, 2019, authorized State and local alert initiators will be able to conduct “end-to-end” WEA tests that can be received by members of their communities, in order to assess how WEA is working within their jurisdictions.

4. In response to The Commission continues to consider the *WEA FNPRM's* proposal regarding multimedia alerting, and the Bureau requests that interested commenters refresh the record with any new information or arguments. Commenters should address the technical feasibility for requiring multimedia content in WEA messages, including the current state of multimedia testing and standards development. Commenters should also address with particularity the potential costs and benefits to public safety and Participating CMS Providers for supporting the inclusion of multimedia content in WEA messages, given the other changes to WEA that are currently ongoing.

#### **Magnuson-Stevens Act Provisions; Fisheries Off West Coast States; Pacific Coast Groundfish Fishery; Shorebased Individual Fishing Quota Program**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Advanced notice of proposed rulemaking; request for comments.

**SUMMARY:** This notice provides information on a request by the Pacific Fishery Management Council (Council) to establish a control date of September

15, 2017, for the Pacific Coast groundfish fishery. The Council may use the control date to limit the extent, location, or ability to use non-trawl gear types to harvest individual fishing quota (IFQ) (termed ‘gear switching’) in the Pacific Coast groundfish fishery. The Council may or may not provide credit for any gear switching related activities after the control date in any decision setting limits on gear switching. The control date would account for Pacific Coast groundfish fishery participants with historic investment to engage in gear switching should the Council set limits to future participants eligible to gear switch.

**DATES:** Written comments must be received by May 29, 2018.

**ADDRESSES:** You may submit comments on the proposed rule identified by “NOAA-NMFS-2018-0015” by either of the following methods:

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to [www.regulations.gov/](http://www.regulations.gov/) #!docketDetail;D=NOAA-NMFS-2018-0015, click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.

- **Mail:** Submit written comments to Frank Lockhart, NMFS West Coast Regional Office, 7600 Sand Point Way NE, Seattle, WA 98115.

**Instructions:** Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on [www.regulations.gov](http://www.regulations.gov) without change. All personal identifying information (*e.g.*, name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous).

**SUPPLEMENTARY INFORMATION:** The National Marine Fisheries Service (NMFS) implemented the West Coast Groundfish Trawl Catch Share Program on January 11, 2011. The Catch Share Program changed harvest management in the trawl fishery from a trip limit system, with cumulative vessel trip limits, to a quota system where vessels can harvest quota shares at any time during an open season. The Catch Share Program offers industry increased

flexibility in exchange for additional monitoring and data collection requirements.

The Magnuson-Stevens Fishery Conservation and Management Act requires that fishery management councils review catch share programs within five years after implementation. The Council’s first five-year Catch Share Program review concluded in November 2017. As part of response to this review, the Council is considering changing the gear switching provision in the shorebased trawl IFQ component of the Catch Share Program.

The Council originally included gear switching in the Catch Share Program to provide flexibility to trawl harvesters. Gear switching allows vessels to use any legal non-trawl gear type to prosecute the shorebased trawl IFQ fishery. About two-thirds of shorebased IFQ vessels that have taken advantage of the gear switching provision used fixed gear (pots and longlines) prior to Catch Share Program implementation in 2011, and typically used these gears to target sablefish. The remaining vessels operating under the gear switching provision had not fished in the shorebased IFQ trawl fishery prior to Catch Share Program implementation, and purchased or leased trawl permits and sablefish quota to fish with fixed gear after 2011. The Catch Share Program five-year review identified gear switching as a concern for many participants of the shorebased IFQ trawl fishery. Trawl vessels expressed concern that fixed gear vessels targeting sablefish in the shorebased IFQ fishery both depleted sablefish quota and constrained the trawl fishery before vessels were able to attain quotas for other target species that co-occur with sablefish.

At its September 2017 meeting, the Council developed alternatives to limit the amount of quota available to vessels that are gear switching, and the number of participants eligible to continue gear switching activity. The Council also voted to set a control date of September 15, 2017, to account for participants’ financial investment to engage in gear switching in the shorebased IFQ trawl fishery. By establishing this control date, the Council is notifying industry that it may not provide credit for gear switching related activity after this date, in the event that it adopts restrictions on gear switching.

This announcement does not commit the Council or NMFS to any particular action or outcome. The Council may or may not use the control date as part of any deliberations and decisions on gear switching. The Council may also choose to take no further action.
