Endangered and Threatened Wildlife and Plants; Removing Textual Descriptions of Critical Habitat Boundaries for Mammals, Birds, Amphibians, Fishes, Clams, Snails, Arachnids, Crustaceans, and Insects

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule; technical amendment.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), are removing the textual descriptions of critical habitat boundaries from those designations for mammals, birds, amphibians, fishes, clams, snails, arachnids, crustaceans, and insects for which the maps have been determined to be sufficient to stand as the official delineation of critical habitat. For these entries, the boundaries of critical habitat as mapped or otherwise described will be the official delineation of the designation. The coordinates and/or plot points that we are removing from the Code of Federal Regulations will be available to the public at the lead field office of the Service responsible for the designation and online at the Federal eRulemaking Portal. This action does not increase, decrease, or otherwise change the boundaries of any critical habitat designation. We are taking this action in accordance with our May 1, 2012, revision of the regulations related to publishing textual descriptions of critical habitat boundaries in the Code of Federal Regulations and as part of our response to Executive Order 13563 (January 18, 2011) directing Federal agencies to review their existing regulations and then to modify or streamline them in accordance with what they learned.

DATES: This rule is effective May 29, 2018.

ADDRESSES: This final rule is available online at the Federal eRulemaking Portal at <http://www.regulations.gov>. Supporting documentation used in the preparation of this rule will be available for public inspection, by appointment, during normal business hours at: U.S. Fish and Wildlife Service, Branch of Listing Policy and Support, MS: ES, 5275 Leesburg Pike, Falls Church, VA 22041-3803; telephone 703-358-2171.

SUPPLEMENTARY INFORMATION:**Executive Summary**

Why we need to publish a rule amendment. We have reviewed our critical habitat designations published in the Code of Federal Regulations for mammals, birds, amphibians, fishes, clams, snails, arachnids, crustaceans, and insects. Based on that review, we have found that we can provide more cost-efficient, helpful, and streamlined critical habitat designations by removing the often-lengthy textual descriptions of critical habitat boundaries from those designations for which the maps have been determined to be sufficient to stand as the official delineation of critical habitat. This rule does not increase, decrease, or in any other way alter the critical habitat designations from which we are removing the textual descriptions of boundaries. A change to the Code of Federal Regulations can only be completed by issuing a final rule.

The basis for our action. Executive Order 13563 directs Federal agencies to review their existing regulations and then to modify or streamline them in accordance with what they learned. This action results from our review of our critical habitat regulations. This change will save taxpayer resources and make the critical habitat designations published in the Code of Federal Regulations more user-friendly.

Background

On May 1, 2012, we published a final rule (77 FR 25611) revising our regulations related to publishing textual descriptions of proposed and final critical habitat boundaries in the **Federal Register** for codification in the Code of Federal Regulations (CFR). In the interest of making the process of designating critical habitat more user-friendly for affected parties and the public as a whole, as well as more efficient and cost effective, we maintained the publication of maps of proposed and final critical habitat designations but made optional the inclusion of any textual description of the boundaries of the designation in the **Federal Register** for codification in the CFR. The boundaries of critical habitat as mapped or otherwise described in the Regulation Promulgation section of a rulemaking that is published in the

Federal Register is the official delineation of the critical habitat designation. This approach began with critical habitat designations published after the effective date of the final rule (May 31, 2012).

Specifically, for critical habitat rules published after May 31, 2012, the map(s), as clarified or refined by any textual language within the rule, constitutes the definition of the boundaries of a critical habitat. Each critical habitat area is shown on a map, with more-detailed information discussed in the preamble or the rulemaking documents published in the **Federal Register**. The map published in the CFR is generated from the coordinates and/or plot points corresponding to the location of the boundaries. These coordinates and/or plot points are included in the administrative record for the designation and are available to the public either online or at the Service field office responsible for the designation or both. In addition, if the Service concludes that additional tools or supporting information are appropriate and would help the public understand the official boundary map, we make the additional tools and supporting information available on our internet site and at the Service field office responsible for the critical habitat designation.

The preamble to the May 1, 2012, final rule (77 FR 25611) explained how the Service would handle boundaries for critical habitat that had already been designated before May 31, 2012; the rule states that “for existing critical habitat designations, we also intend to remove the textual descriptions of final critical habitat boundaries set forth in the CFR in order to save the annual reprinting cost, but we must do so in separate rulemakings to ensure that removing the textual descriptions does not change the existing boundaries of those designations” (77 FR 25618). We have now begun applying this approach to critical habitat designations promulgated prior to May 31, 2012. This rule is the second in a series of rules based on our evaluation of the map(s) in each critical habitat designation at 50 CFR 17.95, 17.96, and 17.99 to determine whether or not the map(s) will be sufficient to inform the public of the boundaries of the designations and can therefore stand as the official delineation of the designation.

On October 27, 2017, we published a final rule (82 FR 49751) removing textual descriptions of critical habitat boundaries from those designations for plants on the Hawaiian Islands of Kauai, Niihau, and Hawaii at 50 CFR 17.99.

That final rule established that the map, as clarified or refined by any textual language within the rule, constitutes the definition of the boundaries of the critical habitat for the applicable designation. It did not alter the locations of any boundaries. This is the second rule in a series of rules to remove the textual descriptions of critical habitat boundaries from those designations for which the maps have been determined to be sufficient to stand as the official delineation of critical habitat.

This Rule

For 50 CFR 17.95(a), (b), (d), (e), (f), (g), (h), and (i), the critical habitat designations for mammals, birds, amphibians, fishes, clams and snails, arachnids, crustaceans, and insects, respectively, we evaluated the map(s) in each entry to determine whether or not it can stand as the official delineation of the designation. We looked for a combination of certain map elements, including, but not limited to, the name of the species (or of the grouping of species), the unit number and/or name, the names of counties and/or States shown, a clear map key, and an appropriate map scale, to determine whether or not a map is sufficient to serve as the official delineation of the designation.

In this rule, we are removing the textual descriptions of critical habitat boundaries from those entries at 50 CFR 17.95(a), (b), (d), (e), (f), (g), (h), and (i) that have maps sufficient to stand as the official delineation of the designation. In those entries, we are removing the word "Note:" (or "NOTE:" or "Note:") if it precedes a map that will now stand as the official delineation of the critical habitat designation. For critical habitat designations at 50 CFR 17.95(a), (b), (d), (e), (f), (g), (h), and (i) with maps that do not meet our sufficiency criteria, we are adding a statement ("The map provided is for informational purposes only.") to clarify that the textual descriptions, not the maps, in those entries are the official delineation of critical habitat.

For certain designations, we are retaining the textual descriptions of the boundaries of either the entire designated critical habitat unit or of the areas excluded from the critical habitat designation to clarify or refine the provided map, in accordance with 50 CFR 17.94. We determined that for some designations providing textual descriptions of the boundaries enhanced the clarity of the designation, so we have opted to retain those textual descriptions. In addition, we found that in some instances retaining the textual description of an excluded area is

necessary because the relevant map(s) does not adequately show the excluded area(s), which can be very small within a much larger critical habitat unit. Retaining those textual descriptions ensures that the public has accurate and complete information regarding critical habitat units and areas excluded from critical habitat designation.

Also, for certain designations with unit maps that display multiple units on one map, if a unit or subunit description does not state where the unit map is provided in the regulations, we are adding that information with this rule. This nonsubstantive change will allow users to locate unit maps more easily in our critical habitat regulations.

We are also making the following corrections to our regulations in this rule:

(1) We are correcting the map provided in the CFR for the critical habitat designation at 50 CFR 17.95(e) for yellowfin madtom (*Noturus flavipinnis*). The map in that entry was for the critical habitat designation for the slender chub (*Erimystax = (Hybopsis) cahni*) rather than the correct one published on September 9, 1977, at 42 FR 45526, and republished on September 22, 1977, at 42 FR 47840, for the yellowfin madtom. The map in the critical habitat designation for yellowfin madtom is provided for informational purposes only; because the map is not sufficient to inform the public of the boundaries, the map does not stand as the official delineation of critical habitat for that species.

(2) We are correcting the spelling of the scientific name in the heading of the critical habitat designation for the Leon Springs pupfish at 50 CFR 17.95(e).

(3) We are correcting an erroneous reference to the San Bernardino springsnail (*Pyrgulopsis bernardina*) in paragraph (2) of the entry for Three Forks springsnail (*Pyrgulopsis trivialis*) at 50 CFR 17.95(f).

(4) We are correcting an erroneous reference to multiple "maps" in the entry for the Salt Creek tiger beetle (*Cicindela nevadica lincolniiana*). Only one map is provided in that entry.

This rule does not increase, decrease, or in any other way alter the critical habitat designations from which we are removing the textual descriptions of boundaries. This administrative action will save taxpayer resources. The Service spent approximately \$163,000 to reprint the critical habitat designations at 50 CFR 17.95 for the most-recent print edition of the CFR. Based on a review of the print edition of the CFR, we estimate that this rule will remove approximately 411 pages of the relevant CFR volumes, amounting to

a savings of approximately \$34,935 per year in printing costs for the Service. Over many years, eliminating the need to reprint Universal Transverse Mercator (UTM) coordinate pairs and other textual descriptions at 50 CFR 17.95 will result in a considerable cumulative cost savings for the Service and the public as a whole.

We will publish a series of rules, of which this is the second, to remove the textual descriptions from all of the critical habitat designations at 50 CFR 17.95, 17.96, and 17.99 that have map(s) sufficient to stand as the official delineation of the designation.

The detailed UTM coordinates or other textual descriptions we are removing in this rule will continue to be available online at the Federal eRulemaking Portal (see **ADDRESSES**) and at the lead Service field office responsible for the designation to assist the public in understanding the official boundary.

We note that the Service never maintained that requiring detailed textual descriptions was legally necessary. Instead, the first critical habitat regulations required only that critical habitat designations be "accompanied by maps and/or geographical descriptions" (43 FR 870, 876; January 4, 1978). Although the Service subsequently added the requirement that critical habitat designations include textual descriptions describing the specific boundary limits of the critical habitat, there is nothing in the preamble to that rule indicating that the Service did so because the Act required it. Rather, it was in response to several commenters, who had opined that the proposed rule was not sufficiently clear in setting out the method by which critical habitat boundaries would be described (45 FR 13009, 13015; February 27, 1980).

Removing these unnecessary textual descriptions will significantly reduce the length of some critical habitat designations, making each designation easier to locate in the CFR; will not weaken the effectiveness of the Act; and will not undermine the public's ability to identify the boundaries of critical habitat designations.

The information printed in the CFR is the legally binding delineation of critical habitat. If there is ambiguity due to the scale of the map such that additional regulatory text is needed to ensure that the public has adequate notice of the boundaries, we provide additional regulation text. The only change to the CFR that we are making with this action is removing the detailed textual description of the boundaries of the specific areas designated as critical

habitat (e.g., latitude-longitude and UTM coordinates). We still generate those data, and make them available at <http://www.regulations.gov> and at the lead field office of the Service responsible for the critical habitat designation. Neither the critical habitat designation nor the underlying data on which it is based can be changed without undergoing a further rulemaking.

As stated earlier, the actions we are taking in this rule do not increase, decrease, or otherwise alter the critical habitat boundaries or areas. For 50 CFR 17.95(a), (b), (d), (e), (f), (g), (h), and (i), we are merely removing the reference points (e.g., UTM or latitude-longitude coordinates) of the textual descriptions from existing final critical habitat designations, and we are doing so only where we have determined that the existing maps are sufficient to inform the public of the boundaries of the designations and can therefore stand as the official delineation of critical habitat. However, we will continue to provide the reference points of the textual descriptions at <http://www.regulations.gov> and at the lead field office of the Service responsible for the critical habitat designation.

The actions we are taking in this rule require us to also revise 50 CFR 17.94(b), to set forth an explanation of which critical habitat designations have maps that stand as the official delineation of critical habitat and which do not.

We are publishing this final rule without a prior proposal because we find that there is good cause for doing so pursuant to 5 U.S.C. 553(b)(3)(B). The “good cause” exception applies when an agency finds “that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.” Publication of a proposed rule for this action is unnecessary because this is an administrative action that does not increase, decrease, or otherwise change critical habitat boundaries or areas. Therefore, this action will not affect any legal rights. Rather, it will merely reduce the publication length of some rules designating critical habitat, which will save taxpayer resources and make each designation easier to locate in the CFR. We find that it is in the best interest of the public to promulgate these administrative and technical changes to 50 CFR 17.95 and without undergoing procedures that are unnecessary.

Required Determinations

Regulatory Planning and Review—Executive Orders 12866 and 13563

Executive Order 12866 provides that the Office of Information and Regulatory Affairs (OIRA) will review all significant rules. OIRA has determined that this rule is not significant.

Executive Order 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the nation’s regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. The executive order directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. We have developed this rule in a manner consistent with these requirements.

Executive Order 13771

This rule is not an E.O. 13771 (“Reducing Regulation and Controlling Regulatory Costs”) (82 FR 9339, February 3, 2017) regulatory action because this rule is not significant under E.O. 12866.

Regulatory Flexibility Act (5 U.S.C. 601 et seq.)

Under the Regulatory Flexibility Act (RFA), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), 5 U.S.C. 601 *et seq.*, whenever an agency is required to publish a notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the effects of the rule on small entities (i.e., small businesses, small organizations, and small government jurisdictions). However, no regulatory flexibility analysis is required if the head of the agency certifies the rule will not have a significant economic impact on a substantial number of small entities. The SBREFA amended the RFA to require Federal agencies to provide a statement of the factual basis for certifying that the rule will not have a significant economic impact on a substantial number of small entities.

According to the Small Business Administration, small entities include small organizations such as

independent nonprofit organizations; small governmental jurisdictions, including school boards and city and town governments that serve fewer than 50,000 residents; and small businesses (13 CFR 121.201). Small businesses include such businesses as manufacturing and mining concerns with fewer than 500 employees, wholesale trade entities with fewer than 100 employees, and retail and service businesses with less than \$5 million in annual sales. In general, the term “significant economic impact” is meant to apply to a typical small business firm’s business operations.

This rule will not have a significant economic impact on a substantial number of small entities as defined under the RFA. This rule is an administrative action to remove the textual descriptions from critical habitat designations at 50 CFR 17.95(a), (b), (d), (e), (f), (g), (h), and (i) that have maps sufficient to stand as the official delineation of critical habitat. This action does not increase, decrease, or in any other way alter the areas or boundaries of the critical habitat designations from which we are removing the textual descriptions of boundaries.

This action will save taxpayer resources. The Service spent approximately \$163,000 to reprint the critical habitat designations at 50 CFR 17.95 for the most-recent print edition of the CFR. Based on a review of the print edition of the CFR, we estimate that this rule will remove approximately 411 pages of the relevant CFR volumes, amounting to a savings of approximately \$34,935 per year in printing costs for the Service. While over many years, eliminating the need to reprint Universal Transverse Mercator (UTM) coordinate pairs and other textual descriptions at 50 CFR 17.95 will result in a considerable cumulative cost savings to the Service and the public as a whole, this rule will result in only a small annual savings to the Service and the public.

Therefore, for the reasons above, we certify that this rule will not have a significant economic impact on a substantial number of small entities.

Unfunded Mandates Reform Act (2 U.S.C. 1501 et seq.)

In accordance with the Unfunded Mandates Reform Act (2 U.S.C. 1501 *et seq.*), the Services make the following findings:

a. This rule will not produce a Federal mandate. In general, a Federal mandate is a provision in legislation, statute, or regulation that would impose an enforceable duty upon State, local, or

tribal governments, or the private sector and includes both “Federal intergovernmental mandates” and “Federal private sector mandates.” These terms are defined in 2 U.S.C. 658(5)–(7). “Federal intergovernmental mandate” includes a regulation that “would impose an enforceable duty upon State, local, or tribal governments” with two exceptions: (1) “a condition of Federal assistance” or (2) “a duty arising from participation in a voluntary Federal program,” unless the regulation “relates to a then-existing Federal program under which \$500,000,000 or more is provided annually to State, local, and tribal governments under entitlement authority”; the provision would either “increase the stringency of conditions of assistance” or “place caps upon, or otherwise decrease, the Federal Government’s responsibility to provide funding”; and the State, local, or tribal governments “lack authority . . . to amend their financial or programmatic responsibilities to continue providing required services.” At the time of enactment, these entitlement programs were: Medicaid; AFDC work programs; Child Nutrition; Food Stamps; Social Services Block Grants; Vocational Rehabilitation State Grants; Foster Care, Adoption Assistance, and Independent Living; Family Support Welfare Services; and Child Support Enforcement. “Federal private sector mandate” includes a regulation that “would impose an enforceable duty upon the private sector, except (i) a condition of Federal assistance or (ii) a duty arising from participation in a voluntary Federal program.” This rule does not produce a Federal mandate under either of these definitions.

b. This rule will not significantly or uniquely affect small governments, because the revisions to the regulations in this rule should make our critical habitat designations more user-friendly and will make the process more cost-effective for the Service and the public as a whole. As such, we do not believe that a Small Government Agency Plan is required.

Takings—Executive Order 12630

In accordance with Executive Order 12630 (“Government Actions and Interference with Constitutionally Protected Private Property Rights”), we have evaluated this rule, and we have determined that this rule does not pose significant takings implications. The revisions to the regulations set forth in this rule do not involve individual property rights.

Federalism—Executive Order 13132

In accordance with Executive Order 13132 (Federalism), the rule does not have significant Federalism effects. A federalism summary impact statement is not required. The revisions to the regulations addressed in this rule are intended to promote the usability of the regulations and make the process of designating critical habitat more cost-effective, and thus should not significantly affect or burden the authority of the States to govern themselves.

Civil Justice Reform—Executive Order 12988

In accordance with Executive Order 12988 (Civil Justice Reform), this rule follows the Civil Justice Reform principles for regulations that do not unduly burden the Federal judicial system, by meeting the requirements of sections 3(a) and 3(b) of the Executive Order. The revisions to the regulations addressed in this rule should not significantly affect or burden the judicial system.

Paperwork Reduction Act of 1995

This rule does not contain any new collections of information that require approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This rule will not impose recordkeeping or reporting requirements on State or local governments, individuals, businesses, or organizations. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

National Environmental Policy Act (NEPA)

We analyzed this rule in accordance with the criteria of the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*), 43 CFR part 46, and 516 Departmental Manual (DM) 2 and 8.

A categorical exclusion from NEPA documentation applies to policies, directives, regulations, and guidelines that are “of an administrative, financial, legal, technical, or procedural nature” (43 CFR 46.210(i)). This rule falls within this categorical exclusion because it is administrative and technical in nature—it affects only the format in which the critical habitat boundaries are delineated in the regulations.

However, even if an individual Federal action falls within a categorical exclusion, the Service must still prepare environmental documents pursuant to NEPA if one of the 12 exceptions listed

in 43 CFR 46.215 applies. We have reviewed each of the 12 exceptions and have found that because this rule is administrative in nature, none of the exceptions apply. Although the exception at 43 CFR 46.215(h) applies to actions that “have a significant impact” on listed species or designated critical habitat, this action will not have any such significant impact, because it is administrative in nature and affects only the format in which critical habitat boundaries are delineated and not the substance of the critical habitat designations. Therefore, this action meets the requirements for a categorical exclusion from the NEPA process.

Government-to-Government Relationship With Tribes

In accordance with the President’s memorandum of April 29, 1994, “Government-to-Government Relations with Native American Tribal Governments” (59 FR 22951), Executive Order 13175 “Consultation and Coordination with Indian Tribal Governments,” and the Department of the Interior Manual at 512 DM 2, we readily acknowledge our responsibility to communicate meaningfully with recognized Native American Tribes on a government-to-government basis. We have evaluated the potential effects on federally recognized Tribes from these revisions to our regulations. We have determined that there are no potential effects to federally recognized Tribes, as the revisions to the regulations are intended to promote the usability of critical habitat designations and save taxpayer monies. We will continue to coordinate with Tribes as we promulgate critical habitat designations.

Energy Supply, Distribution, or Use

Executive Order 13211 (Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use) requires agencies to prepare Statements of Energy Effects when undertaking certain actions. “Significant energy action” means any action by an agency (normally published in the **Federal Register**) that promulgates or is expected to lead to the promulgation of a final rule or regulation, including notices of inquiry, advance notices of proposed rulemaking, and notices of proposed rulemaking that is a significant regulatory action under Executive Order 12866 or any successor order, and is likely to have a significant adverse effect on the supply, distribution, or use of energy; or that is designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. This rule does

not qualify as a significant regulatory action under Executive Order 12866 and will not have a significant adverse effect on the supply, distribution, or use of energy, and has not been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. Therefore, this action is not a significant energy action and no Statement of Energy Effects is required.

Regulation Promulgation

Accordingly, we amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as follows:

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

■ 1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 1531–1544; 4201–4245, unless otherwise noted.

■ 2. Amend § 17.94 by revising paragraph (b) to read as follows:

§ 17.94 Critical habitats.

* * * * *

(b) Maps.

Table with 2 columns: 'If the critical habitat map appears in . . .' and 'Then . . .'. It contains two rows of text detailing map designations and their corresponding regulatory treatments.

- 3. Amend § 17.95 as follows:
■ a. Amend paragraph (a) as follows:
■ i. In the entry for "Mariana Fruit Bat (Pteropus mariannus mariannus)..."
■ ii. In the entry for "Virginia Big-eared Bat (Plecotus townsendii virginianus)..."
■ iii. In the entry for "Fresno Kangaroo Rat (Dipodomys nitratooides exilis)..."
■ iv. In the entry for "Morro Bay Kangaroo Rat (Dipodomys heermanni morroensis)..."
■ v. In the entry for "San Bernardino Kangaroo Rat (Dipodomys merriami parvus)..."
■ vi. In the entry for "Alabama Beach Mouse (Peromyscus polionotus ammobates)..."
■ vii. In the entry for "Choctawhatchee Beach Mouse (Peromyscus polionotus allophrys)..."

- (6)(ii); by removing paragraph (7)(ii) and redesignating paragraph (7)(iii) as (7)(ii); by revising paragraph (8)(ii); by removing paragraph (9)(ii) and redesignating paragraph (9)(iii) as (9)(ii); by removing paragraph (10)(ii) and redesignating paragraph (10)(iii) as (10)(ii); and by removing "Note:" at the beginning of newly redesignated paragraphs (7)(ii), (9)(ii), and (10)(ii).
■ viii. In the entry for "Perdido Key Beach Mouse (Peromyscus polionotus trissyllepsis)..."
■ ix. In the entry for "Preble's Meadow Jumping Mouse (Zapus hudsonius preblei)..."
■ x. In the entry for "St. Andrew Beach Mouse (Peromyscus polionotus peninsularis)..."
■ xi. In the entry for "Northern Sea Otter (Enhydra lutris kenyoni), Southwest Alaska Distinct Population

- Segment," by adding a sentence to the end of paragraph (1).
■ xii. In the entry for "Silver Rice Rat (Oryzomys palustris natator (=O. argentatus))..."
■ xiii. In the entry for "Peninsular Bighorn Sheep, A Distinct Population Segment of Desert Bighorn Sheep (Ovis canadensis nelsoni)..."
■ xiv. In the entry for "Sierra Nevada Bighorn Sheep (Ovis canadensis sierrae)..."
■ xv. In the entry for "Mount Graham Red Squirrel (Tamiasciurus hudsonicus grahamensis)..."
■ xvi. In the entry for "Amargosa Vole (Microtus californicus scirpensis)..."

- b. Amend paragraph (b) as follows:
- i. In the entry for “Akekee (*Loxops caeruleirostris*),” by adding a sentence to the end of paragraph (1).
- ii. In the entry for “Akikiki (*Oreomystis bairdi*),” by adding a sentence to the end of paragraph (1).
- iii. In the entry for “Whooping Crane (*Grus americana*),” by revising the note above each of the four maps.
- iv. In the entry for “Mariana Crow (*Corvus kubaryi*),” by removing and reserving paragraph (4)(ii)(A); by removing paragraphs (4)(iii)(A) and (C); by redesignating paragraph (4)(iii)(B) as (4)(iii)(A) and paragraph (4)(iii)(D) as (4)(iii)(B); by revising the introductory text of newly redesignated paragraph (4)(iii)(A); and by removing the word “Note:” from the beginning of paragraph (4)(ii)(B) and newly redesignated paragraph (4)(iii)(B).
- v. In the entry for “Spectacled Eider (*Somateria fischeri*),” by adding a new second sentence.
- vi. In the entry for “Steller’s Eider (*Polysticta stelleri*),” in paragraph 1, by removing the words, “The maps are for reference only” and by adding in their place the words, “The maps provided are for informational purposes only”.
- vii. In the entry for “Oahu Elepaio (*Chasiempis sandwichensis ibidis*),” by adding a sentence to the end of paragraph (1).
- viii. In the entry for the “Coastal California Gnatcatcher (*Polioptila californica californica*),” by revising paragraphs (6)(i), (8)(i), (9)(i), (11)(i), (12)(i), (13)(i), (14)(i), (15)(i), and (16)(i) to read as set forth below; by removing and reserving paragraphs (7)(i) and (10)(i); and by removing “Note:” from the beginning of paragraphs (6)(ii), (7)(ii), (8)(ii), (9)(ii), (10)(ii), (11)(ii), (12)(ii), (13)(ii), (14)(ii), (15)(ii), and (16)(ii).
- ix. In the entry for “Guam Micronesian Kingfisher (*Halcyon cinnamomina cinnamomina*),” by removing and reserving paragraph (4)(ii)(A), and by removing the word “Note:” from the beginning of paragraph (4)(ii)(B).
- x. In the entry for “Everglade Snail Kite (*Rostrhamus sociabilis plumbeus*),” by revising the note.
