SUPPLEMENTARY INFORMATION:

I. Abstract

The United States Patent and Trademark Office (USPTO) administers the Trademark Act, 15 U.S.C. 1051 et seq., which provides for the Federal registration of trademarks, service marks, collective trademarks and service marks, collective membership marks, and certification marks. Individuals and businesses that use or intend to use such marks in commerce may file an application to register their marks with the USPTO.

The information gathered in this collection covers various communications submitted by individuals and businesses to the USPTO occurring after registration of a trademark. One type of communication...
is a request to amend their registrations to delete goods or services that are no longer being used by the registrant. A second type of communication is a declaration of use. Registered marks remain on the register for ten years and can be renewed, but will be cancelled unless the owner files with the USPTO a declaration attesting to the continued use of the mark in commerce, and a renewal application, within specific deadlines. Registration owners may also request to amend or divide a registration, respond to a post-registration Office action, and surrender a registration.

The information in this collection is used to maintain the quality of the trademark register. The register information may be accessed by an individual or by businesses to determine the availability of a mark. A current and accurate register reduces the possibility that parties initiate the use of a mark previously adopted by another. It is in the interest of all parties to update and correct the registry as their needs for and use of marks evolve. Thus, the Federal trademark registration process may reduce unnecessary litigation and its associated costs and burdens.
