NUCLEAR REGULATORY COMMISSION

[Docket No. 40–8943; NRC–2012–0281]

Crow Butte Resources, Inc.; Marsland Expansion Area

AGENCY: Nuclear Regulatory Commission.

ACTION: Environmental assessment and finding of no significant impact; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an amendment to source materials license SUA–1534 that would authorize Crow Butte Resources, Inc., to construct and operate an in situ uranium recovery (ISR) expansion facility at the Marsland Expansion Area (MEA) site in Dawes County, Nebraska. The NRC staff has prepared an environmental assessment (EA) and finding of no significant impact (FONSI) for this licensing action.

DATES: The EA and FONSI referenced in this document are available on May 3, 2018.

ADDRESSES: Please refer to Docket ID NRC–2012–0281 when contacting the NRC about the availability of this document. You may obtain publicly-available information related to this document using any of the following methods:

• Federal Rulemaking website: Go to http://www.regulations.gov and search for Docket ID NRC–2012–0281. Address questions about NRC dockets to Jennifer Borges; telephone: 301–287–9127; email: Jennifer.Borges@nrc.gov. For technical questions, contact the individual listed in the FOR FURTHER INFORMATION CONTACT section of this document.

• NRC’s Agencywide Documents Access and Management System (ADAMS): You may obtain publicly-available documents online in the ADAMS Public Documents collection at http://www.nrc.gov/reading-rm/adams.html. To begin the search, select “ADAMS Public Documents” and then select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or via email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.

• NRC’s PDR: You may examine and purchase copies of public documents at the NRC PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

SUPPLEMENTAL INFORMATION:

I. Introduction

The NRC staff is considering a request for an amendment to source materials license SUA–1534, issued to Crow Butte Resources, Inc. (CBR or the licensee), to authorize construction and operation of the MEA, an ISR expansion facility that would be located in Dawes County, Nebraska. In accordance with NRC’s regulations in part 51 of title 10 of the Code of Federal Regulations (10 CFR), “Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions,” that implement the National Environmental Policy Act of 1969, as amended (NEPA) (42 U.S.C. 4321 et seq.), the NRC staff has prepared an EA documenting its environmental review of the license amendment application that included an environmental report (ADAMS Accession No. ML17325B322) and technical report, as amended (ADAMS Accession Nos. ML15328A422, ML16155A267, ML16155A268, and ML17193A314).

On December 15, 2017 (82 FR 59665), the NRC issued the draft FONSI and draft EA for the proposed MEA license amendment for public review and comment. The NRC received 20 comments. Appendix A of the EA contains the NRC’s responses to those comments. Based on the environmental review and consideration of comments received on the draft EA, the NRC staff has determined that the proposed action will not significantly affect the quality of the human environment and preparation of an environmental impact statement is not required, and therefore a FONSI is appropriate.

II. Summary of Environmental Assessment

The EA is publicly available in ADAMS using ADAMS Accession No. ML18103A145. A summary description of the proposed action and expected environmental impacts is provided in this notice.

Description of the Proposed Action

The proposed Federal action is approval of CBR’s license amendment application, which would authorize the expansion of CBR’s commercial-scale uranium recovery operations to the MEA. Under the proposed action, the licensee would perform construction, uranium recovery operations, aquifer restoration, and decommissioning activities at the proposed MEA, which would encompass approximately 4,622 acres (1,870 hectares). The CBR has proposed eleven production units in the MEA, which is located 11.1 miles (17.9 kilometers) south-southeast of the central processing facility (CPF) at the existing CBR license area. Uranium recovery operations at the MEA would include injection of lixiviant into and pumping of water from the uranium-bearing aquifer, removal of uranium from the pumped water using ion exchange, and transport of loaded ion exchange resin to the CPF at the existing CBR license area for further processing into yellowcake. Approval of the proposed action would authorize CBR to conduct uranium recovery operations at the MEA in accordance with its license amendment application, source materials license SUA–1534, and the requirements in 10 CFR part 40, “Domestic Licensing of Source Material.”

Environmental Impacts of the Proposed Action

In the EA, the NRC staff assessed the potential environmental impacts from the construction, operation, aquifer restoration, and decommissioning of the proposed MEA on the following resource areas: Land use; geology and soils; water resources; ecological resources; climatology, meteorology, and air quality; historic and cultural resources; demographics and socioeconomics; environmental justice; transportation; noise; scenic and visual resources; public and occupational health; and hazardous materials and waste management. The NRC staff also considered the cumulative impacts from past, present, and reasonably foreseeable future actions when combined with the proposed action.

All long-term impacts were determined to be SMALL. The NRC staff concluded that approval of the proposed action would not result in a significant increase in short-term or long-term radiological risk to public health or the environment. The NRC staff identified a potential for MODERATE short-term impacts to a few resource areas, including noise (temporary impacts to the nearest resident to the MEA during construction), ecological resources (localized and temporary impacts resulting from the loss and slow recovery of forest habitat), and groundwater resources (short-term lowering of the potentiometric surface of the Basal Chadron Sandstone aquifer). While potential MODERATE impacts would be expected for specific aspects of these resource areas, the
impacts are short-term and temporary. Therefore, the NRC staff concluded that the overall impacts related to these resource areas would be SMALL. Furthermore, the NRC staff found that there would be no significant negative cumulative impact to any resource area from the MEA when added to other past, present, and reasonably foreseeable future actions, and that a potential positive cumulative socioeconomic impact could result from additional tax revenue, employment, and local purchases.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (i.e., the "no-action" alternative). Under the no-action alternative, the NRC would not authorize CBR to construct and operate the MEA. In situ uranium recovery activities would not occur within the MEA and the associated environmental impacts also would not occur.

III. Finding of No Significant Impact

In accordance with the NEPA and 10 CFR part 51, the NRC staff has conducted an environmental review of CBR’s request for a license amendment to NRC source materials license SUA–1534 that would authorize construction and operation of the MEA. Based on its environmental review of the proposed action, as documented in the EA, the NRC staff has determined that granting the requested license amendment would not significantly affect the quality of the human environment. Therefore, the NRC staff has determined, pursuant to 10 CFR 51.31, that preparation of an environmental impact statement is not required for the proposed action and a FONSI is appropriate.

Dated at Rockville, Maryland, this 30th day of April, 2018.

Craig G. Erlanger,
Director, Division of Fuel Cycle Safety, Safeguards, and Environmental Review, Office of Nuclear Material Safety and Safeguards.

ACTION: Notice and request for comments.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to publish a Notice in the Federal Register notifying the public that the agency is modifying an existing previously approved information collection for OMB review and approval and requests public review and comment on the submission. Comments are being solicited on the need for the information; the accuracy of OPIC’s burden estimate; the quality, practical utility, and clarity of the information to be collected; and ways to minimize reporting the burden, including automated collected techniques and uses of other forms of technology.

DATES: Comments must be received within sixty (60) calendar days of publication of this Notice.

ADDRESSES: Mail all comments and requests for copies of the subject form to OPIC’s Agency Submitting Officer: James Bobbitt, Overseas Private Investment Corporation, 1100 New York Avenue NW, Washington, DC 20527. See SUPPLEMENTARY INFORMATION for other information about filing.

FOR FURTHER INFORMATION CONTACT: OPIC Agency Submitting Officer: James Bobbitt, (202) 336–8558.

SUPPLEMENTARY INFORMATION: All mailed comments and requests for copies of the subject form should include form number OPIC–129 on both the envelope and in the subject line of the letter. Electronic comments and requests for copies of the subject form may be sent to James.Bobbitt@opic.gov, subject line OPIC–129.

Summary Form Under Review

Type of Request: Revision of currently approved information collection.

Title: Sponsor Disclosure Report.

Form Number: OPIC–129.

Frequency of Use: One per investor per project.

Type of Respondents: Business or other institution (except farms); individuals.

Standard Industrial Classification Codes: All.

Description of Affected Public: U.S. companies or citizens investing overseas.

Reporting Hours: 500 (1 hour per form).

Number of Responses: 500 per year.

Federal Cost: $27,455 ($54.91 × 500 x 1).

Authority for Information Collection: Sections 231, 234(a), 239(d), and 240A of the Foreign Assistance Act of 1961, as amended.

Abstract (Needs and Uses): The information provided in the OPIC–129 is used by OPIC as a part of the Character Risk Due Diligence/background check procedure (similar to a commercial bank’s Know Your Customer procedure) that it performs on each party that has a significant relationship (10% or more beneficial ownership, provision of significant credit support, significant managerial relationship) to the projects that OPIC finances or insures. OPIC has a robust due diligence process that includes access to electronic databases. Certain questions that can be addressed through such electronic databases have been removed from the OPIC–129 form to eliminate duplication. These search tools provide immediate results, and thus, the OPIC–129 form is only one aspect of the due diligence review. The form has also been revised to update the electronic input fields in a manner that is consistent with new programming at OPIC. The form will include limited drop-down menus tailored to the specific applicant and OPIC business line.

Nichole Skoyles, Administrative Counsel, Department of Legal Affairs.

OPIC Agency Submitting Officer: James Bobbitt, Overseas Private Investment Corporation, 1100 New York Avenue NW, Washington, DC 20527. See SUPPLEMENTARY INFORMATION for other information about filing.

FOR FURTHER INFORMATION CONTACT: OPIC Agency Submitting Officer: James Bobbitt, (202) 336–8558.

SUPPLEMENTARY INFORMATION: All mailed comments and requests for copies of the subject form should include form number OPIC–129 on both the envelope and in the subject line of the letter. Electronic comments and requests for copies of the subject form may be sent to James.Bobbitt@opic.gov, subject line OPIC–129.
