SUPPLEMENTARY INFORMATION: Greater Sage-Grouse is a state-managed species that is dependent on sagebrush steppe ecosystems. These ecosystems are managed in partnership across the range of the Greater Sage-Grouse by federal, state, and local authorities. Efforts to conserve the species and its habitat date back to the 1950s. Over the past two decades, state wildlife agencies, federal agencies, and many others in the range of the species have been collaborating to conserve Greater Sage-Grouse and its habitats. The United States Department of the Interior (DOI) and the BLM have broad responsibilities to manage federal lands and resources for the public benefit. Nearly half of Greater Sage-Grouse habitat is managed by the BLM. The BLM is committed to being a good neighbor and investing in on-the-ground

conservation activities through close collaboration with State governments, local communities, private landowners, and other stakeholders.

In September 2015, the U.S. Fish and Wildlife Service (USFWS) determined that the Greater Sage-Grouse did not warrant listing under the Endangered Species Act of 1973. The USFWS based its “not warranted” determination, in part, on the conservation commitments and management actions in the BLM and U.S. Forest Service (Forest Service) Greater Sage-Grouse land use plan amendments and revisions (2015 GRSG land use plan decisions), as well as on other private, state, and federal conservation efforts. Since 2015 the BLM, in discussion with partners, primarily Governors and state wildlife management agencies, recognized that several refinements and policy updates could help strengthen conservation efforts, while providing increased economic opportunity to local communities. The BLM and Department of Interior worked closely with Governors charged with managing Greater Sage-Grouse to determine whether some, none, or all of the 2015 Land Use Plans should be amended. After carefully considering the Governors input, and using its discretion and authority under FLPMA, as well as under direction from the Secretary, including Secretary’s Order (SO) 3353, the BLM proposes amending the Nevada and Northeastern California Greater Sage-Grouse land use plans that address GRSG management. This action is proposed to enhance cooperation and improve alignment with the state plans or management strategies, in accordance with the BLM’s multiple use and sustained yield mission. The BLM prepared the Nevada and Northeastern California Greater Sage-Grouse Draft RMP Amendment/Draft EIS to address alternatives that will build upon its commitment to conserve and restore Greater Sage-Grouse habitat, while improving collaboration and alignment with state management strategies for Greater Sage-Grouse. The BLM seeks to improve management alignment in ways that will increase management flexibility, maintain access to public resources, and promote conservation outcomes. The BLM used internal, agency, and public scoping to identify issues considered in the environmental analysis. As part of this analysis, the BLM also examined the range of alternatives evaluated in the BLM’s 2015 GRSG land use plan decisions and their supporting NEPA analyses.

This Draft RMP Amendment/Draft EIS is one of six separate planning efforts that are being undertaken in response to
