

compliance. DWW may not resume their activities until notified by NMFS.

(ii) In the event that DWW discovers an injured or dead marine mammal, and the lead PSO determines that the cause of the injury or death is unknown and the death is relatively recent (*e.g.*, in less than a moderate state of decomposition), DWW shall immediately report the incident to the NMFS Office of Protected Resources and the NMFS Greater Atlantic Stranding Coordinator. The report must include the same information identified in condition 6(b)(i) of this IHA. Activities may continue while NMFS reviews the circumstances of the incident. NMFS will work with DWW to determine whether additional mitigation measures or modifications to the activities are appropriate.

(iii) In the event that DWW discovers an injured or dead marine mammal, and the lead PSO determines that the injury or death is not associated with or related to the specified activities (*e.g.*, previously wounded animal, carcass with moderate to advanced decomposition, or scavenger damage), DWW shall report the incident to the NMFS Office of Protected Resources and the NMFS Greater Atlantic Stranding Coordinator within 24 hours of the discovery. DWW shall provide photographs or video footage or other documentation of the sighting to NMFS.

7. This Authorization may be modified, suspended or withdrawn if the holder fails to abide by the conditions prescribed herein, or if NMFS determines the authorized taking is having more than a negligible impact on the species or stock of affected marine mammals.

Request for Public Comments

We request comment on our analyses, the draft authorization, and any other aspect of this Notice of Proposed IHA for the proposed marine site characterization surveys. Please include with your comments any supporting data or literature citations to help inform our final decision on the request for MMPA authorization.

On a case-by-case basis, NMFS may issue a one-year renewal IHA without additional notice when (1) another year of identical or nearly identical activities as described in the Specified Activities section is planned, or (2) the activities would not be completed by the time the IHA expires and renewal would allow completion of the activities beyond that described in the Dates and Duration section, provided all of the following conditions are met:

- A request for renewal is received no later than 60 days prior to expiration of the current IHA.

- The request for renewal must include the following:

(1) An explanation that the activities to be conducted beyond the initial dates either are identical to the previously analyzed activities or include changes so minor (*e.g.*, reduction in pile size) that the changes do not affect the previous analyses, take estimates, or mitigation and monitoring requirements.

(2) A preliminary monitoring report showing the results of the required monitoring to date and an explanation showing that the monitoring results do not indicate impacts of a scale or nature not previously analyzed or authorized.

- Upon review of the request for renewal, the status of the affected species or stocks, and any other pertinent information, NMFS determines that there are no more than minor changes in the activities, the mitigation and monitoring measures remain the same and appropriate, and the original findings remain valid.

DEPARTMENT OF DEFENSE

Department of the Army; Corps of Engineers

Joint Notice of Availability for the Draft Matagorda Ship Channel Project Integrated Feasibility Report and Environmental Impact Statement

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of availability.

SUMMARY: Pursuant to the National Environmental Policy Act (NEPA), the U.S. Army Corps of Engineers, Galveston District (USACE) announces the release of the Draft Integrated Feasibility Report and Environmental Impact Statement (DIFR–EIS) for the Tentatively Selected Plan of the Matagorda Ship Channel Improvement Project, Calhoun and Matagorda Counties, TX. The DIFR–EIS documents the existing condition of environmental resources in and around areas considered for development, and potential impacts on those resources as a result of implementing the alternatives.

DATES: The Galveston District will hold a public meeting for the DIFR–EIS on May 15, 2018 from 6:00–8:00 p.m. USACE will accept written public comments on the DIFR–EIS from May 7, 2018 to June 21, 2018. Comments on the DIFR–EIS must be postmarked by June 21, 2018.

ADDRESSES: The Public Meeting will be held at the Bauer Exhibit Building, 186 Henry Barber Way, County Road 101, Port Lavaca, TX 77979.

FOR FURTHER INFORMATION CONTACT:

Questions and comments regarding the proposed draft EIS should be addressed to USACE, Galveston District, Attn: Dr. Harmon Brown, Environmental Compliance Branch, Regional Planning and Environmental Center, P.O. Box 1229, Galveston, TX 77553–1229; (409) 766–3837; harmon.brown@usace.army.mil.

SUPPLEMENTARY INFORMATION:

Authority: The lead agency for this proposed action is USACE. This study has been prepared under the authority of Section 216 of the 1970 Flood Control Act (Pub. L. 91–611), as amended. The non-Federal sponsor is the Calhoun Port Authority.

Background: This DIFR–EIS was prepared as required by the National Environmental Policy Act (NEPA) to present an evaluation of potential impacts associated with the Matagorda Ship Channel (MSC) Project Tentatively Selected Plan (TSP). The USACE and the non-Federal sponsor for the study, the Calhoun Port Authority, have conducted this study and prepared the DIFR–EIS. The purpose of this project is to reduce transportation costs and increase operational efficiencies of maritime commerce movement through the Port. The majority of deep-draft ships using the MSC have design drafts in excess of the operating depth of the channel. By expanding channel dimensions, cargo vessels could reduce or eliminate light loading measures, and larger cargo vessels could begin calling on the Port and adjacent facilities.

The need for changes to the MSC is derived from an analysis of current and projected vessel transits, cargo tonnage, and capacity at existing and proposed terminal facilities. This need is becoming more critical given increasing levels of maritime traffic, increasing vessel size, and the desire of Port users to capture transportation efficiencies. By expanding channel dimensions, cargo vessels could reduce or eliminate light loading measures, and larger cargo vessels, unable to transit the existing channel configuration, could begin calling on the Port and adjacent facilities.

The 26-mile MSC is located 125 miles southwest of Galveston, Texas and 80 miles northeast of Corpus Christi, Texas. The northern reach of the MSC is located in Calhoun County and the southern reach and Entrance Channel are in Matagorda County. The MSC is comprised of an Entrance Channel about
