Type of Request: New.

Number of Respondents: 600.

Responses per Respondent: 1.

Annual Responses: 600.

Average Burden per Response: 35 minutes.

Needs and Uses: This study, exploratory in nature, is designed to capture baseline data prior to transition and at three subsequent data points after the transition out of service. The purpose of data capture before, during, and after transition is to allow the

Participants will be recruited during a set nine month window in which Service Members have self-identified as transitioning out of the service within the six months. Participation in the study is voluntary and participants will be consented twice, once at baseline (time point 1) while the Service Member is still active duty and then again at time point 2 as civilians. This burden information only accounts for the public being affected.
