Average Hours per Response: 5 minutes.

The objective of the short survey will be to understand how anglers respond to changes in trip costs and fishing regulations in the Gulf of Mexico. We are conducting this survey to improve our ability to predict changes the number of fishing trips anticipated with changes in economic conditions or fishing regulations. This will improve the analysis of the economic effects of proposed changes in fishing regulations and changes in economic factors that affect the cost of fishing such as fuel prices.

The population consists of those anglers who fish in the Gulf of Mexico from Florida, including those who possess a license to fish, and those who are not required to have a license (*e.g.*, seniors). We plan to independently sample from the frame designed for the Fishing Effort Survey (FES) of the Marine Recreational Fishing Program (MRIP). Anglers will be mailed a postcard that directs them to a website to complete the survey.

Affected Public: Individuals or households.
