3. Social Security Number Verification Services—20 CFR 401.45—0960–0660. Internal Revenue Service regulations require employers to provide wage and tax data to SSA using Form W-2, or its electronic equivalent. As part of this process, the employer must furnish the employee’s name and Social Security number (SSN). In

addition, the employee’s name and SSN must match SSA’s records for SSA to post earnings to the employee’s earnings record, which SSA maintains. SSA offers the Social Security Number Verification Service (SSNVS), which allows employers to verify the reported names and SSNs of their employees match those in SSA’s records. SSNVS is

a cost-free method for employers to verify employee information via the internet. The respondents are employers who need to verify SSN data using SSA’s records.
